Mr. Vilbig replied to Chairman Mahone, "I am not aware of any."

Commission Member Davis stated, "This is one hundred percent R-6 (Single Family Residential) District surrounded. Other than just wanting to maximize profit and build houses, what was the thinking?"

Mr. Vilbig replied to Commission Member Davis, "Exactly that."

Blake Vaughn, 10601 Clarence Drive, Suite 250, Frisco, TX 75033

Mr. Vaughn explained, "It is about 75 lots, every lot we are planning to build here will be over 6,000 square feet, there were a couple that may have been shy of 6,000 square feet but we can adjust some boarders and still get them over 6,000 square feet and the reason I say that is we are currently zoned for 6,000 square foot lots. R-6 (Single Family Residential) District zoning is already in place we don't have to change a single thing in fact if we wanted to we could probably get closer to 100 lots on this particular piece with the current zoning that is in place. I am not doing that and the reason I am not doing that is because as a builder, I am not just a developer, we build a specific product called Epcon Communities. They built over 30,000 homes, it is an active adult community kind of a retirement community these are smaller homes that are meant to age in place, they have a HOA [Homeowners Association] community that takes care of all the exterior landscaping for the entire property. The type of home we build is a longer product. With the current zoning in place it is a 60 foot wide lot but we don't build a wide home we build a long home. The reason we build that is because our typical home has a side courtyard."

Commission Member Davis asked Mr. Vaughn, "Do people own these homes or are they a lease/rental?"

Mr. Vaughn replied to Commission Member Davis, "No, they own them. We are not doing a build to rent. We would sell the individual lots, now we would not build a home until someone buys it."

Commission Member Davis asked Mr. Vaughn, "They can't buy the lot and build their home, they have to use you?"

Mr. Vaughn replied to Commission Member Davis, "Correct. The only thing I build is Epcon. If I was to not get this particular zone change then the more feasible project would be to sell the lots and bring in a builder like Highland Homes or some other builder that can fit within the constraints the way it is."

Sherman Planning and Zoning
Board of Directors
220 W. Mulberry Street
Sherman, TX 75090

To Whom It May Concern:

I am writing you this letter in regard to the requested zone change at the 3001 Block West Washington Street location.

This property is currently zoned R-6 (Single-Family Residential). The request is to change this property to R-5 (Single Family Residential).

I think Sherman has done a great job with offering R-5 and R-4 lots throughout the city. In fact, I believe the majority of the new development in Sherman fits these categories. However, that does not mean that all available land should be changed to R-5.

This particular request is looking to change the zoning to R-5 to maximize the land usage for the profitability of the developer. Of course, they all want to do that. In this case it would be a dramatic change to the existing character of the surrounding neighborhoods and I do not believe it would increase the aesthetic appeal of the community. The avg. sized lot adjoining this zone change request is around 1 acre. The average value house touching this land (not to mention all the surrounding neighborhoods which only bumps the value up) is in the $850,000 + range.

We understand growth is here and is continuing to come. We hope that there can be a vision for Sherman to maintain some of the neighborhood areas to continue to represent what they are.

Thank you for what you do for the City. I am asking to keep the R-6 zoning to hopefully maintain the existing aesthetic appeal of this neighborhood and the overall community.

Sincerely,

Amber Dobbs

Dear Commissioners,

I am writing this email to express my opposition to the proposed zoning request change for the property located at 3001 Block West Washington St.

The surrounding neighborhoods are composed of homes on larger lots of land. Each property on Timbercreek has at least 2.5 acres. Having a subdivision just north of Timbercreek with 50 foot lots would be out of place for both my neighborhood, as well as the nearby Wellington neighborhood. In addition to this issue, a high-density subdivision would increase the traffic on an already busy Washington.
This concept just has the look of a crammed-in subdivision like you might see in an overcrowded suburb like Frisco. And we don't want Sherman to be just another Frisco.

Sincerely,

Subject: Objection to Zoning Change Request for 3001 Block West Washington Street

Honorable P&Z Board,

Please accept this objection to the Zoning Change Request for 3001 Block West Washington Street. My wife, Rosalind Motley and I live at 600 Cinrose Lane, just west of the proposed development. The original proposed plat for the property was shown to us some time ago by a couple of the investors in Washington Bend, LLC presumably in conformance with R-6. If I recall correctly, it had a total density of approximately 24 - 30 homes with several homes having large lots which blended in somewhat with the current density of the surrounding neighborhoods, a requirement of the Core Neighborhood category of the Master Development Plan. Our subdivision requires at least 3 acre lots and was developed back in the 80's. Timbercreek and Wellington also require larger lots and homes. There are maybe 8 to 10 homes in our neighborhood; maybe 15 or so in Timbercreek and maybe 8 to 10 in Wellington.

When we began our investigation in preparation for our objection, Lauren Marlow, Development Services Coordinator, was kind enough to tell us that the developer is intending to build 70 homes and reduce the lot sizes and setback lines etc. which would severely change the character and aesthetic appeal of the surrounding community. The rezoning plan **is not in compliance** with the Core Neighborhood category as I read the designation in the agenda Item 25. That category **"encourages infill development that maintains the existing character, while increasing the aesthetic appeal of the community."** Folks, squeezing 70 homes on the property in the manner planned does not maintain the existing character of the neighborhood (8 to 15 homes) and certainly does not increase the aesthetic appeal of the community (larger style homes with at least an acre or so of space). It does the opposite. In fact, I'm not sure the original plat we saw of 24-30 homes would comply.

Currently, there are a number of higher density subdivisions planned or currently underway which have the approval of the surrounding neighborhoods. Those are in areas where the higher density is not an issue or in areas where higher density is already established. Our investigation thus far seems to indicate that the property is subject to a projected sale conditioned upon this rezoning request. If so, notwithstanding that the planned development does not comply with the Core Neighborhood category, a zoning change would be improper and result in damage to the surrounding property owners, my wife and I included.

We certainly understand the need for housing in Sherman, but based on what we have uncovered thus far, a change to higher density is unwarranted in this area, doesn't comply with the current Core Neighborhood category of the Master Development Plan and would legally damage surrounding neighbors. We respectfully ask that the zoning change be denied.

Dear Mr Rae,

I oppose the zone change from R-6 to R-5 for the 22+ acres located on West Washington St.

Having lived in the neighborhood for 36 years, I have witnessed many changes including the building of several subdivisions. While each subdivision is unique they all offer large spacious lots. The proposed 50 foot lot size is not cohesive with the rest of the area. I was happy to read in the documentation posted on the P&Z website explaining a Core Neighborhood is intended to protect and enhance the existing residential areas. My question is how can the City consider a subdivision with 50 ft wide lots in this area? This does not follow their own Master Plan.

I purchased the property adjoining this 22 acres knowing this would be a subdivision but the owners said they were building 35 houses with the pond and green space. This sounded like a great fit with the surrounding area. Unfortunately they could not get financing so they are forced to sell. It is hard to fantom 70+ houses in that area as that type of a development would probably decrease the home value in the surrounding area.

Obviously, the traffic 70 homes would add to W Washington adds another concern. This road has not been resurfaced in 20 years. The neglect of this road has resulted in the sides chipping off, potholes and over grown tree limbs. I have spoken with Clint Philpot and Phyllis James regarding this issue but nothing is ever done. Until roads become a priority in Sherman housing construction should be slowed.

This plan shows the retention pond being filled in and houses built on top. I am unable to find the elevation plan on your website. Will the back of this property be built up? Where will the water go? If your reply is "City engineers will design/approve the site plan" then I have a major concern my land will be flooded causing erosion. The City engineering department approved the Wilder Trail neighborhood that boarders the south side of my property and I just discovered the last two house built have caused constant water drainage and erosion on my property. I don't have a lot of faith in the city engineering department. There are laws regarding changing water flow then causing erosion and depreciation to your neighbor's property. Please explain where the water will be directed or contained if the City allows this retention pond to be filled.

Thank you for your time.

Dear Rob Rae ,

Please be informed that we are in opposition to agenda 25 in the upcoming P & Z meeting scheduled 04/18/23. The request from Washington bend LLC et al (3100 block West Washington st) for a zone change from R-6 to R-5 fails to comply with the spirit of the city's Master Plan Designation for a Core Neighborhood in two important ways.

"This category encourages infill development that maintains the existing character, while increasing the aesthetic appeal of the community." An R-5 designation would: 1) fail to maintain the existing character and 2) would not increase the aesthetician appeal of the community.

Regarding item #25 on the P&Z Agenda for April 18,2023, I would like to concur with the other opposition letters currently posted that I would oppose the zoning change to allow higher density development for this property. There is absolutely nothing like it on Washington once you get off 1417 and it would simply not fit in well with the surrounding developments in the area. I would oppose the change from R-6 to R-5 as the current zoning is dense enough for this part of town.

We are opposed to the passing of Agenda Item No. 25. The requested zone change would violate the Master Plan designation of the "Core Neighborhood" category which is intended to "protect and enhance the **existing residential areas** of Sherman." The Core Neighborhood category encourages development that "maintains the existing character, while increasing the aesthetic appeal of the community," neither of which this zone change would do. The zone change requested is not in line with the established Master Plan; therefore, we oppose it.

LETTER OF OPPOSITION

To Proposed Rezoning From R-6 to R-5 at 3001 Block West Washington Street

To Whom It May Concern:

We are Trina and Rodney Wecker, Sherman residents living at 2912 W. Washington St. We live within two hundred feet of the property located at 3001 West Washington Street. We are writing to express our opposition to the proposed rezoning from R-6 to R-5 at this property.

We have lived in Sherman for 16 years. Our first house was located in a historical neighborhood on N. Leslie Ave. After several years, we realized we were outgrowing our back yard. We began the search for a house in Sherman that would fit our family of five and our needs for a larger yard. At that time, the choices were limited. After a few years of not finding a good fit in the real estate market, we decided to build at our West Washington location.

Purchasing a lot in Washington Bend came with a set of covenants, conditions, and restrictions developed and filed by Stephen H. Klas and Phillip A. Klas (also the original owner of the 22 acres). The covenants were developed "**for the purpose of enhancing and protecting the value, attractiveness, and desirability of the lots or tracts constituting each subdivision.**" Because they cared deeply about the integrity of our neighborhood, they went to the great extent to create a set of covenants.

It is the duty of the city to protect and enhance the existing residential areas of Sherman. The rezoning from R-6 to R-5 will not protect and enhance our West Washington neighborhood. Sadly, it will forever change the character of the neighborhood. We had the opportunity to build in a high-density area, but we specifically chose West Washington.

Please DO NOT rezone this site to R-5.

Sincerely,

Trina and Rodney Wecker

Dear P&Z Board,

I would like to join Mr. Motley in objecting to the requested zone change for 3001 Block West Washington Street, and echo his insightful thoughts and well- reasoned email to you. My wife and I own property on Cinrose Lane (Four acres) which is located just west of the property in question. We are not anti-development but if our understanding is correct that a zone change would permit the developer to place 60-70 homes on the Property, we respectfully object to the requested zone change. We purchased our property in reliance on the zoning regulations then in effect in the area and with the understanding that those zoning regulations would be honored absent some essential need not to do so. The requested zone change would allow a development to exist that would be inconsistent with the character of the surrounding neighborhoods and less aesthetically appealing. c . We can see no legitimate reason to approve the requested zone change and respectfully request that it be denied. Thank you.

Subject: Proposed subdivision on West Washington

To whom it may concern:

Please let this email register the objection my wife and I have to a request to rezone property located at 3001 West Washington. We currently live in Timbercreek. We moved there ten years ago. I can assure you, we would not have purchased that property if there was a 70 retirement community across Washington from Timbercreek. That is in essence a fundamental change to the entire neighborhood, and surrounding neighborhoods. Certainly the look and feel of the entire neighborhood will change, market values will decline, and the corresponding significant increase in traffic.

We certainly understand people have a right to develop their property. However, my understanding is new developments are not to undermine the current character and feel of a neighborhood. It cannot be argued there will be no change to our neighborhood and surrounding neighborhoods if a development like this is permitted at that location. If a subdivision is to be put at that location, it should be required to complement the current neighborhoods, not fundamentally change them for the worse.

Growth is coming to Sherman. Certainly there will be a market for larger lots and homes in that area. There should not be a deviation from standards to force a large number of smaller lots and homes on this neighborhood.

Thank you for your consideration.

Respectfully,

Brian and Cheryl Gary

Mike Wynne, 707 West Washington Street, Sherman, TX 75092
Mr. Wynne explained, "If this Zone Change is granted we believe it will deviate from the existing neighborhoods and the aesthetic appeal of the neighborhood. There are approximately 50 people from Wellington Street, Cambridge Way, Creekbend Circle, West Washington Street and Timbercreek Road who have all signed a petition opposing this Zone Change. There are certain factors that you consider in determining whether or not to approve a Zone Change request like this and one of the first factors I read when I looked at the City's Codes was, is the requested change consistent with the Comprehensive Plan and when you look at it the zoning map it is abundantly clear that the answer to that is no because all of the surrounding areas is R-6 (Single Family Residential) District. The second factor that I understand that you look at is the character of the surrounding or near by properties. The Master Plan designates the area where the subject property is as a Core Neighborhood. The purpose of the Core Neighborhood category is to protect and enhance the existing residential areas secondly it is to encourage development that maintains the existing character while increasing the aesthetic appeal. The proposed change does neither of those things. These are established surrounding neighborhoods that consist of lots and homes that are much larger than what would be required of a Developer in a R-5 (Single Family Residential) District situation. Placing 75 homes here on 22 acres we don't believe would maintain the character of the neighborhood. The density would be too much and certainly we believe it would be less aesthetically appealing. Another factor the Commissioners may want to consider is the extent in which traffic problems might be created by this. If you are looking at 75 lots and an average of two licensed drivers per household you are at least 150 vehicles going up and down Washington Street in addition to the traffic that you already have. What we are merely asking this Board to do is to follow the Comprehensive, Zoning and Future Land Use Plan that has been adopted by the City and to give consideration to the vested interest of these folks that reside in the surrounding neighborhood and core neighborhood. This property is going to be developed at some point of time, there is little doubt of that, but we respectfully request that we do it the right way and adhere to the land use and zoning regulations that are in place and ask that you deny this request."

Adrienne Fife, 3712 Delta Drive, McKinney, TX 75071
Mrs. Fife explained, "My husband and I own a lot on Cinrose but for the last several years we have lived in McKinney. We have been looking for the right property to bring us back to Sherman. We finally found that property on Cinrose Lane across the street from the proposed development. As you

drive down Washington it is easy to see the unique characteristics that drew us to the neighborhood, its large green lots, houses setback from the road and overall cohesive flow of the neighborhoods that blend well together. The proposed Zone Change would diminish and take away from the characteristics mentioned and would disrupt the natural transition of development that currently exists. This neighborhood offers something that can't be found anywhere else in Sherman, McKinney or any other surrounding communities nearby. Sherman needs neighborhoods like this one to retain their distinct characteristics so that we can draw out new members to the community that are seeking these rare opportunities. According to Sherman's Comprehensive Plan, the City has a duty to regulate density which is achieved by promoting and encouraging defined density in the appropriate locations."

Larry Morriss, 1404 Bentbrook Lane, Sherman, TX 75092
Mr. Morris explained, "I am representing the 30 residents that are in Bentbrook. Our main concern is density and the traffic. Long ago in the 90s when I was on the City Council we went through a revamping of our Master Plan for that area and Washington at one time was designated as a major thoroughfare that was moved over to McGee Street. As far as the traffic that is there now, I don't know what the development agreement is in place but at a minimum when Bentbrook went in we had to put in escrow to improve Washington Street that is adjacent to our subdivision. If this is developed I would ask for you to consider and to make sure that policy is still in place. Rob is that policy still in place as far as requiring development to put in escrow?"

Mr. Rae replied to Mr. Morriss, "Sort of, it depends. The requirement for traffic impact improvements is a minimum of 100 homes. They would fall under requiring a TIA (Traffic Impact Analysis) to be completed and subject to impact fees."

Mr. Morris stated, "I would just concur with what you have already heard, we are definitely opposed."

Bill Magers, 4 Timbercreek Road, Sherman, TX 75092
Mr. Magers explained, "I along with support of my neighbors are in support of the current R-6 (Single Family Residential) District zoning on this development. This is not about lot sizes; the difference is the character, and the key thing is in this neighborhood a 60-foot lot is a small lot. The area we are in is called the Fairway; it has historically been where Sherman has had larger homes. In Washington Place the average lot size is 0.36 acres with a depth of 310 feet, Bentbrook has an average lot size of 1.4 acres and a depth of 1,200 foot. Creekbend is a little smaller with 0.39 acres, Wellington has lots from 0.6 acres and Timbercreek Road has lot sizes of 3.22 acres and the lot depth is 2,800 feet. If you were to take all our averages, the average lot size is 61,000 square feet and this proposed development is 6,400 square feet, which is ten times the size. We are going to have 25

percent of developed lots on 7 percent of the land, that is not the character of this neighborhood."

Mr. Vaughn stated, "As far as matching the character, this is a luxury product. Our starting home price will probably be around $450,000 which I know is a lot less than the homes around here, but it is a smaller home. Most of the complaints seem to be around density and I am not changing the density. We can already build 70 lots; I don't need to change. I can still build what I build at 70 lots, I am just trying to get to 75 lots to maximize the use of the land. If I don't build what I am building I can get more than that, I can get up to 100 lots with the current zoning that is in place. I am not asking for you to change anything that is impacting the density, some builder is going to build 70 homes here or more rather it is me or not. I am asking you to make an adjustment so I can build a courtyard home for a retirement community."

Chairman Mahone stated, "I understand what you are saying about what you would propose to build but the communities main concern is the change to an R-5 (Single Family Residential) District then allows potentially a lot more if it wasn't you that stays there."

Mr. Vaughn replied to Chairman Mahone, "If it was an R-5 (Single Family Residential) District and didn't build ours but maximized it would be 120 lots. I am fine if we did a Planned Development to define lot sizes."

Chairman Mahone replied to Mr. Vaughn, "I feel that would be a totally different application."

Mr. Rae stated, "It would, and we don't allow for any Planned Developments less than 200 acres."

E. PUBLIC HEARING AND REPLAT OF USOW SHERMAN ADDITION, PHASE TWO

PROPERTY LINE AND SIDE SETBACK ON NORTH PROPERTY LINE

ZONE CHANGE – C-2 AND R-6 TO C-2

SITE PLAN – OFFICE/WAREHOUSE /FACILITY

REPLAT – USOW SHERMAN ADDITION, PHASE TWO 2450 AND 2522 NORTH FRISCO ROAD (USOW, LLC)

The property is located at 2450 Frisco Road between East James Street and Baker Drive.

<u>Kent Hughlett, 177 Timberbrook Circle, Denison, TX 75021</u>
Mr. Hughlett explained, "We are requesting a Variance on the required side setback for a wood fence along the South and West side of the property and a Variance for the North side of the property to discourage tenants from storing items behind the building. The residential property is not platted, and we have decided to plat the whole property. We are also requesting a Zone Change for the residential lot to a C-2 (General Commercial) District and Site Plan approval for an office/warehouse facility to match the adjoining property on the South."

Chairman Mahone asked Mr. Hughlett, "On the north side of the property it looks like there is some commercial building already there and the south side is residential?"

Mr. Hughlett replied to Chairman Mahone, "Correct. There is one house behind the building."

Vice Chairman Downtain asked Mr. Hughlett, "How long has that been there? It changed in December, right?"

Mr. Rae replied to Vice Chairman Downtain, "They got their Building Permit. They had platted and got Site Plan approval for Building 1, 2 and then there was a 3 and a 4 earlier so they

had vested rights to be able to start the construction of that first building, so they do have a building permit for that, and they are allowed to fall under the old rules. As soon as they Replat it all as one, request a Zone Change and present a new Site Plan the vested rights that they have on the other buildings go away. They would have to follow the new ordinance on these new proposed buildings."

Mr. Hughlett stated, "These buildings are going to be climate-controlled office warehouses, primary target market is for small businesses like t-shirt shops and small contractors. The reason for the Zone Change was for a noisy type of business-like automobile/mechanic shop that would be close to someone's back yard. There is a detention pond that we have put in to control the drainage from the neighborhood."

Chairman Mahone asked Mr. Lee, "Is he saying that Nall Street drains towards his property?"

Mr. Lee replied to Chairman Mahone, "It drains to and across his property."

Chairman Mahone asked Mr. Lee, "So the work he is doing is actually going to retain that?"

Mr. Lee replied to Chairman Mahone, "He has it directed to his detention pond."

Vice Chairman Downtain asked Mr. Rae, "Was the building permit only issued for Building 1 or Building 1 and 2?"

Mr. Rae replied to Vice Chairman Downtain, "No just Building 1."

Commission Member Blagg asked Mr. Hughlett, "Is there pavement behind Building 3?"

Mr. Hughlett replied to Commission Member Blagg, "Yes. I did that mainly to keep the drainage flowing behind there."

Commission Member Blagg replied to Mr. Hughlett, "Can you pull Building 3 in if it is all pavement? On Building 2 your old plan was six bays, and it stops short and now it went to seven and pushing it right to the property line."

Mr. Hughlett replied to Commission Member Blagg, "Just trying to maximize the area."

Chairman Mahone stated, "It looks like the Future Land Use Map shows this is Regional Commercial, there is a lot of residential there now. I don't see that on the list as compatible."

Mr. Rae replied to Chairman Mahone, "It is likely those residential properties won't redevelop."

Commission Member Blagg asked Mr. Rae, "Refresh my memory on the Ordinances, this looks like a metal building but no exposed metal façade?"

Mr. Rae replied to Commission Member Blagg, "We can't regulate the building materials in this area. Only in our Overlay Districts can we regulate the architectural style."

Chairman Mahone asked if they had seen the Staff Review Letter.

Mr. Hughlett replied, "Yes, they had seen the Staff Review Letter and would abide by the Recommendations."

No other citizens appeared before the Planning and Zoning Commission to discuss the Variance, Zone Change, Site Plan and Replat.

Mr. Burdette explained, "We are requesting a Specific Use Permit and Site Plan for an auto and marine mechanic shop in an existing building."

Chairman Mahone asked Mr. Burdette, "Is this a business that is currently operating somewhere else or is this a new business?"

Mr. Burdette replied to Chairman Mahone, "It is a new business."

Chairman Mahone asked Mr. Burdette, "Have you been in this industry?"

Mr. Burdette replied to Chairman Mahone, "I have partnered with a mechanic. I am more of a shadetree mechanic, so I have knowledge of mechanics in general."

Chairman Mahone asked Mr. Burdette, "How many employees do you expect to have?"

Mr. Burdette replied to Chairman Mahone, "A maximum of eight to ten employees."

Commission Member Davis asked Mr. Rae, "For the façade is this something that changes or is it out of the zoning?"

Mr. Rae replied to Commission Member Davis, "There may be some legal responses on that, at some point with the agenda item there has been Variances and some Exceptions granted for this property such as Exceptions to allow a parking surface that is not concrete, an Exception to allow existing metal buildings in lieu of the required masonry, these are all things that have been granted at some point. Ultimately this is still in the 1417 Overlay, the desire of the City is for that corridor to have a consistent look to it but I don't believe we are required to make them bring those up to standards because of those Variances."

Chairman Mahone replied to Mr. Rae, "The one I am thinking of is the January 17, 2017, it says there was an Exception for the metal buildings with a condition of five years."

Mr. Rae replied to Chairman Mahone, "That is correct. That is one that did have the condition of five years."

Chairman Mahone asked Mr. Burdette, "These are still metal buildings, right?"

Mr. Burdette replied to Chairman Mahone, "They are, yes."

Chairman Mahone asked Mr. Burdette, "Do you know if there are any plans to comply with that?"

Mr. Burdette replied to Chairman Mahone, "Not that I am aware of, I am a tenant to the property owner."

Chairman Mahone requested an Executive Session and stated, "The Planning & Zoning Commission will now hold a closed executive session pursuant to the Texas open meetings act at section 551.001 to consult with the city attorney."

ADJOURNMENT

On Motion duly made and carried, the meeting adjourned for an Executive Session at 6:35 p.m. **ADJOURNMENT**

The property is located at 2626 Hilltop Drive between Texoma Parkway and Cox Street.

This item was tabled at the February 21, 2023, meeting.

Chuck Edwards, P.O. Box 2966, Sherman, TX 75091
Mr. Edwards explained, "We are requesting a Variance for a ten foot fence along the East railroad property."

Chairman Mahone asked Mr. Edwards, "The building on the railroad side is basically your fencing on that side and South of the building you are going to have ten foot fence?"

Mr. Edwards replied to Chairman Mahone, "Yes, it will all be ten foot around."

Mr. Rae stated, "What was approved at the last months meeting was a six-foot ornamental fence in the front yard, and that covers the front yard and the area that goes along the front part of the parking lot. The fence went South within the building area as a ten-foot chain link fence across to the West property line. What we determined is that since the fence was not technically in the front yard that they are allowed to have a ten-foot chain link fence in that area. When they first applied for the Variance, the graphic showed the fence going all the way along the front; that change makes it conform to our ordinance. Based on the decision that was made last month, the only thing that wasn't approved by the Board of Adjustment is that ten-foot fence on the Eastern property line, that is still within the front yard."

Chairman Mahone stated, "Okay."

Chairman Mahone asked if they had seen the Staff Review Letter.

Mr. Edwards replied, "Yes, they had seen the Staff Review Letter and would abide by the Recommendations."

No other citizens appeared before the Planning and Zoning Commission to discuss the Variance.

Chairman Mahone stated, "Looks like you have residential on at least three sides, already. What is next to you on the south side?"

Mr. Ochoa replied to Chairman Mahone, "That is a house."

Chairman Mahone asked Mr. Rae, "Am I reading this map right, is the house on the south side also zoned commercial?"

Mr. Rae replied to Chairman Mahone, "I believe it is, just that hard corner of Maxey and Odneal is zoned C-1 (Retail Business) District."

Chairman Mahone asked Mr. Ochoa, "Is there a building there currently?"

Mr. Ochoa replied to Chairman Mahone, "No sir."

Chairman Mahone asked Mr. Ochoa, "Is it just open land?"

Mr. Ochoa replied to Chairman Mahone, "Yes sir."

Commission Member Davis asked Mr. Ochoa, "Are there many duplex's in this neighborhood?"

Mr. Ochoa replied to Commission Member Davis, "I have seen a couple that have been there for a while. As far as the new construction goes, it is mostly residential."

THE REQUEST OF SARIKA MANDAVILLI (OWNER), VAMSI KRISHNA CHITLURI (REPRESENTATIVE), WRIGHT GROUP (ARCHITECTS-PLANNER) AND COPLEY LAND SURVEYING (SURVEYOR) CONCERNING THE PROPERTY LOCATED AT 2505 NORTH HICKORY STREET, CONSISTING OF 1.673 ACRES IN THE J.B. MCANAIR SURVEY, ABSTRACT NO. 763, AND CURRENTLY ZONED MF-30 (MULTI-FAMILY RESIDENTIAL) DISTRICT, AS FOLLOWS:

BOARD OF ADJUSTMENT

A. PUBLIC HEARING AND VARIANCE UNDER SECTION 14.02.012 TO ALLOW A LOT AREA OF 1.673 ACRES IN

LIEU OF THE REQUIRED 5 ACRES IN AN MF-30 (MULTI-FAMILY RESIDENTIAL) DISTRICT. (DENIED)

PLANNING AND ZONING COMMISSION

B. SITE PLAN FOR THE FAB APARTMENT HOMES.

C. PRELIMINARY PLAT OF THE FAB APARTMENT HOMES.

The property is located at 2505 North Hickory Street between West Lamberth Road and West Peyton Street.

Terry Wright, 1430 South Broadway Street, Carrollton, TX 75006

Mr. Wright explained, "We are requesting a Variance to allow the existing lot area in lieu of the recent adopted ordinance. When we started this project, it was in compliance, but the land size requirement did change during the time frame of us working on the project."

Chairman Mahone asked Mr. Wright, "When did you start the project?"

Mr. Wright replied to Chairman Mahone "Last fall. We are compliant to everything, but the one item that does not comply is the land size."

Chairman Mahone asked Mr. Rae, "This is three stories. What is our maximum height for MF-30 (Multi-Family Residential) District?"

Mr. Rae replied to Chairman Mahone, "It is fifty feet."

Chairman Mahone stated, "Are your residents mostly viewing North and South?"

Mr. Wright replied to Chairman Mahone, "Yes and we also set back from the oil storage tanks; you have the distance in there to make sure there are no bedrooms in those areas."

Chairman Mahone asked Mr. Wright, "Where are these storage tanks?"

Mr. Wright replied to Chairman Mahone, "They are so far away, we are clear. One hundred and twenty feet does get into the fire lane, but we are still outside of that."

Commission Member Davis asked Mr. Rae, "In the master plan what would be the thought for this part of town? Is the master plan a three-story building?"

Mr. Rae replied to Commission Member Davis, "Yes, multi-family would be a permitted use or a permitted Zone Change in this area but I believe the Future Land Use category is Suburban Neighborhood or Core Neighborhood and both of those allow for multi-family but our Zoning Ordinance changed from a minimum of 10,000 square foot to a minimum of 5 acres and that is to avoid having apartment complex's right next to single family."

Chairman Mahone stated, "It still seems like an awful lot of density for 1.6 acres. How many units is this?"

Mr. Wright replied to Chairman Mahone, "Thirty-six units. With that density, the parking requirements reduces the size of the building."

Chairman Mahone asked Mr. Wright, "What is the total height of the building?"

Mr. Wright replied to Chairman Mahone, "We would be in the thirty-five-foot range."

Chairman Mahone asked if they had seen the Staff Review Letter.

Mr. Wright replied, "Yes, they had seen the Staff Review Letter and would abide by the Recommendations."

No other citizens appeared before the Planning and Zoning Commission to discuss the Variance, Site Plan and Preliminary Plat.

Chairman Mahone asked Ms. Cotton, "Do we have to make any motion on the Site Plan and Preliminary Plat?"

Ms. Cotton replied to Chairman Mahone, "We would like for you to take action on the Site Plan and Preliminary Plat."

Mr. Rae stated, "That is just because the Site Plan does not meet our Ordinances without the Variance approved. Because of the Shock Clock Rule State Law, if you don't deny it than it can potentially be automatically approved."

(ARCHITECT) CONCERNING THE PROPERTY LOCATED IN THE 3600 BLOCK CROSSROADS BOULEVARD, CONSISTING OF 1.00 ACRE IN THE PRESTON KITCHEN SURVEY, ABSTRACT NO. 667, AS FOLLOWS:

A. PUBLIC HEARING AND VARIANCE UNDER SECTION 14.03.007(7) TO ALLOW A 37.3' SIDE SETBACK FOR THE MAIN STRUCTURE IN LIEU OF THE REQUIRED 55.7' IN THE BLALOCK INDUSTRIAL PARK PLANNED DEVELOPMENT/BLALOCK COMMERCIAL OVERLAY DISTRICT.
B. PUBLIC HEARING AND VARIANCE UNDER SECTION 14.03.007(7) TO ALLOW A 36.9' SIDE SETBACK FOR A CANOPY STRUCTURE IN LIEU OF THE REQUIRED 55.7' IN THE BLALOCK INDUSTRIAL PARK PLANNED DEVELOPMENT/BLALOCK COMMERCIAL OVERLAY DISTRICT.

PLANNING AND ZONING COMMISSION

C. SITE PLAN FOR NEIGHBORHOOD CREDIT UNION
D. PRELIMINARY PLAT OF SHERMAN CROSSROADS COMMERCIAL ADDITION

The property is located at 3600 Block Crossroads Boulevard between West Travis Street and West FM 1417 and located in the Blalock Industrial Park Planned Development/Blalock Commercial Overlay District.

Alek Strimple, P.E., 7413 East Wick Avenue, McKinney, TX 75071

Mr. Strimple explained, "We are requesting a Variance for the side setback and the design and construction of a Neighborhood Credit Union bank. The side setback Variance is primarily because the Blalock Commercial Overlay District we are in has a standard of 55.7' side setback, our use is allowed by right in that overlay but the 55.7' side setback on a one-acre pad site, you end up with almost an unusable small space for the building. In our request letter we had mentioned doing potentially a 25' side setback, in this request it is listed 37.3' side setback and 36.9' side setback. That is exactly the measurements from the edge of the building on one side and the edge of the drive-thru awning on the other side."

Chairman Mahone stated, "Procedurally we have the ability to be more stringent than what is advertised to the public but not less stringent on those setbacks."

Jim Gahl, GAHL Architecture, Inc., 3875 Regent Drive, Dallas, TX 75201
Mr. Gahl explained, "I agree with Alek, putting the building right at the edge of where we are saying we are going to put it is kind of impossible. This canopy is a unique canopy to this client, it is a different canopy than what we have done in the past. It would be good to give us a couple feet than just coming right to the two tips of the building."

Commission Member Manley stated, "Wasn't this what you requested?"

Mr. Gahl replied to Mr. Manley, "We requested 25' side setback not 37.3' side setback and 36.9' side setback."

Chairman Mahone asked Mr. Rae, "How does that work?"

Mr. Rae replied to Chairman Mahone, "When the Site Plan is submitted to our office we look at what the Site Plan shows and our staff asked for those dimensions of where the building was. I understand you asked for a 25' side setback but we have to request the Variance based on the Site Plan that was given not a hypothetical Site Plan. That is why we have it like that."

Chairman Mahone stated, "One option is if you wanted to table this, you would have the opportunity to adjust those numbers."

Mr. Strimple replied to Chairman Mahone, "That would not be something we would not want to pursue."

Chairman Mahone asked if they had seen the Staff Review Letter.

Mr. Strimple replied, "Yes, they had seen the Staff Review Letter and would abide by the Recommendations."

No other citizens appeared before the Planning and Zoning Commission to discuss the Variance, Site Plan and Preliminary Plat.

Mr. Cristy explained, "We are requesting a Variance for the side yard setback to allow the canopies of the vacuum bays and entrance canopies to encroach into the side yard setback and the development of a carwash facility with 20 vacuum bays."

Chairman Mahone asked Mr. Rae, "The canopy, we have enough language in here that restricts that setback to just that canopy, correct?"

Mr. Rae replied to Chairman Mahone, "Yes."

Commission Member Manley asked Mr. Rae, "Why do they call it an Automobile Laundry, Carwash?"

Mr. Rae replied to Commission Member Manley, "The Specific Use Permit language has to match with what is in our ordinance. That is how the use chart demonstrates it in our Zoning Ordinance."

MOTION CARRIED.

THE COMMISSION FOUND THE REQUEST CONFORMS TO THE INTENT OF THE ORDINANCE.

PUBLIC HEARING, SITE PLAN AND ZONE CHANGE
THE REQUEST OF SHERMAN REAL ESTATE VENTURES, LLC (OWNER), CHARLES BRANCH (REPRESENTATIVE), WESTWOOD PROFESSIONAL SERVICES INC. (ENGINEER) AND UNDERWOOD DRAFTING & SURVEYING (SURVEYOR) CONCERNING THE PROPERTY LOCATED AT 4441 WEST HOUSTON STREET, BEING 28.665 ACRES IN THE FIELDING BACON SURVEY, ABSTRACT NO.119, AS FOLLOWS: PLANNING AND ZONING COMMISSION

PUBLIC HEARING, SITE PLAN AND ZONE CHANGE – R-A TO MF-15 4441 WEST HOUSTON STREET (SHERMAN REAL ESTATE VENTURES, LLC)

PUBLIC HEARING, SITE PLAN AND ZONE CHANGE FROM A R-A (RESIDENTIAL AGRICULTURE) DISTRICT TO AN MF-15 (MULTI-FAMILY RESIDENTIAL) DISTRICT.

The property is located at 4441 West Houston Street between North Friendship Road and Ridgeview Road.

Matthew Lee, Westwood Professional Services, 2901 Dallas Parkway, Plano, TX 75093

Mr. Matthew Lee explained, "The owner is requesting a Zone Change for the development of multi-family residential units. We have had an Environmental Assessment done since the site was a junk yard. We have also had a Traffic Impact Analysis done as well."

Chairman Mahone asked Mr. Wayne Lee, "Have you review this Traffic study?"

Mr. Wayne Lee replied to Chairman Mahone, "Yes, the amount of traffic generated, TxDOT requires a deceleration lane to be installed. As far as the effect on traffic it is fairly minimal, as far as decreasing the level of service out here. I have no comments concerning the Traffic Impact Analysis that was prepared."

Chairman Mahone asked Mr. Wayne Lee, "Who makes sure the deceleration lane get put in appropriately? Is that before the project gets started?"

Mr. Wayne Lee replied to Chairman Mahone, "That will be part of their civil drawings that they submit to Engineering."

Chairman Mahone asked Mr. Wayne Lee, "What about the Environmental Assessment? Were you able to review that?"

Mr. Wayne Lee replied to Chairman Mahone, "No.

Chairman Mahone asked Mr. Matthew Lee, "Can you tell us what the Environmental Assessment tells us?"

Mr. Matthew Lee replied to Chairman Mahone, "They went out and looked at the debris that was on site and it came back pretty favorable."

Commission Member Sims asked Mr. Matthew Lee, "Anything major that they found just car oil?"

Mr. Matthew Lee replied to Commission Member Sims, "Not nearly like I said from what you'd expect."

Commission Member Davis asked Mr. Matthew Lee, "Are these homes?"

Mr. Matthew Lee replied to Commission Member Davis, "Yes sir, these are single family rental units, one to two bedroom units."

Vice Chairman Downtain asked Mr. Matthew Lee, "Is all the parking exterior or is there a garage?"

Mr. Matthew Lee replied to Vice Chairman Downtain, "Yes and the units currently don't have attached garages."

Vice Chairman Downtain asked Mr. Matthew Lee, "What is that two story structure?"

Mr. Matthew Lee replied to Vice Chairman Downtain, "Some of the units are two stories."

Vice Chairman Downtain stated, "Is that not a garage shown in the picture?"

Commission Member Davis replied to Vice Chairman Downtain, "The two story looks like a garage."

Charles Branch, 3721 South Stonebridge, McKinney, TX 75070
Mr. Branch stated, "The two stories do have the one car garage in the front."

Katrina Moss, 104 Seasons West, Sherman, TX 75092
Mr. Moss explained, "My home sits directly across from this property. We as a community, we don't want apartments across the street from us that close to our homes. Even if you put a slowdown I'm afraid they are still going to try and use that and somebody could get hit. My other concern is, I don't want an apartment that close to my home. We are single family homes."

Larry Goodman, 211 Seasons West, Sherman, TX 75092
Mr. Goodman explained, "The place they are wanting to build the apartments is already a hazard with traffic and a turn lane would not really help a whole lot and I am looking at how many units they have in that, that is going to increase our traffic flow a lot. I have been there for 15 years, and we have already had four accidents. I don't think there have been any fatalities but there is a little club up the street and sometimes on Friday nights it gets a bit wild. With that many apartment buildings, that is going to create a lot more traffic. That road would need to be widened out more."

Mr. Branch stated, "I understand the concerns about traffic, that is why we went ahead and did the traffic study. The deceleration lane will offer the opportunity for a slow down before it gets to the development, and it won't interfere with any of the traffic. If I am not mistaken, I believe that is going to be a six-lane highway."

Mr. Matthew Lee stated, "The ultimate widening will be in control with TxDOT and their timeline."

Vice Chairman Downtain asked Mr. Wayne Lee, "Do you happen to have any idea on that timeline?"

Mr. Wayne Lee replied to Vice Chairman Downtain, "I've got nothing from TxDOT, now the Traffic Impact Analysis does mention that there might be a need for a left turn lane to be added to this section."

Chairman Mahone asked Mr. Wayne Lee, "So when the Traffic Impact Analysis says there might need to be one. Who decides when there actually is one?"

Mr. Wayne Lee replied to Chairman Mahone, "The Traffic Impact Analysis says that after the development is established an additional Traffic Impact Analysis would address the need of additional lanes. We did make a request to TxDOT to lower the speed limit along this section of Highway 56 and they did a study. We will be putting signs out that lower the speed limit five miles per hour from current posted signage that is out there. City Council approved TxDOT lowering the speed limit. There should be signage going out there sometime in the near future."

Chairman Mahone asked if they had seen the Staff Review Letter.

Mr. Matthew Lee replied, "Yes, they had seen the Staff Review Letter and would abide by the Recommendations."

No other citizens appeared before the Planning and Zoning Commission to discuss the Site Plan and Zone Change.

PUBLIC HEARING, SITE PLAN AND SPECIFIC USE PERMIT
THE REQUEST OF STAR MIDWAY, LLC (OWNER), ADAM MCGREGOR (PASSAGE EDUCATION, LLC) (TENANT/REPRESENTATIVE), DAVID PETREE (LAND SURVEYOR) AND OLD REPUBLIC (SITE MANAGEMENT SERVICES) CONCERNING THE PROPERTY LOCATED AT 4800 TEXOMA PARKWAY, CONSISTING OF 42.8134 ACRES

PUBLIC HEARING, SITE PLAN AND SPECIFIC USE PERMIT – SCHOOL, COMMERCIAL OR TRADE

IN THE JOHN HENDRIX SURVEY, ABSTRACT NO. 503, THE W.F. PATTERSON SURVEY, ABSTRACT NO. 969, THEY DANIEL SHELP SURVEY, ABSTRACT NO. 1097 AND THE T.J. SHANNON SURVEY, ABSTRACT NO. 1136, LOTS 1 AND 3, BLOCK 1, MIDWAY MALL, AS FOLLOWS:
PLANNING AND ZONING COMMISSION
PUBLIC HEARING, SITE PLAN AND SPECIFIC USE PERMIT UNDER SECTION 14.06.009 TO ALLOW A SCHOOL, COMMERCIAL OR TRADE IN A M-1 (LIGHT MANUFACTURING) DISTRICT.

4800 TEXOMA PARKWAY
(STAR MIDWAY, LLC)

The property is located at 4800 Texoma Parkway between North Frisco Road and Fallon Drive.

Adam McGregor, 15300 US Highway 75, Van Alstyne, TX 75495

Mr. McGregor explained, "We are requesting a Site Plan and Specific Use Permit for a commercial driver's license training school that trains drivers to attain their Commercial Driver's License (CDL). Passage Education will be licensed by the Texas Workforce Commission as a Career School. Commercial Driver's License (CDL) students are required to complete the written portion of the Commercial Driver's License (CDL) test, obtain their Commercial Learners Permit, and have knowledge of operating a commercial vehicle prior to performing the training. An experienced Commercial Driver's License (CDL) instructor must be on-site and present when performing the training and will monitor the students at all times."

Chairman Mahone asked Mr. McGregor, "Presumably they will not be doing their maneuvers in the red box in addition to going on the road?"

Mr. McGregor replied to Chairman Mahone, "The behind the wheel includes the basic parking maneuvers and for road training you have to do it on public roads which is required by Department of Public Safety. We wanted to pick somewhere close where they could enter and exit the mall without disturbing any operations."

Vice Chairman Downtain asked Mr. McGregor, "Would that area be fenced?"

Mr. McGregor replied to Vice Chairman Downtain, "We won't put any permanent structures up, it would just be parking cones and in Summer a temporary canopy which we would take down every day."

Commission Member Davis asked Mr. McGregor, "There is going to be primarily two semi vehicles parked there on evenings and weekends."

Mr. McGregor replied to Commission Member Davis, "Yes sir, that is the plan."

Commission Member Davis asked Mr. McGregor, "Are they working on these trucks? Are you doing repairs?"

Mr. McGregor replied to Commission Member Davis, "No, we are not working on trucks. They are fairly new and no issues with them. They have to learn how to do a pre-trip inspection required by the Texas Department of Public Safety."

Commission Member Davis asked Mr. McGregor, "How long is the school?"

Mr. McGregor replied to Commission Member Davis, "It is a full month program."

Chairman Mahone asked Mr. Rae, "They are going to have these trucks outside of the red box, is this going to be a problem in the future?"

Mr. Rae replied to Chairman Mahone, "No, the property is currently zoned M-1 (Light Manufacturing) District and having trucks parked there is a permitted use. The thing not permitted without the Specific Use Permit is to have the school."

Vice Chairman Downtain asked Mr. McGregor, "How many students at a time are in the classroom?"

Mr. McGregor replied to Vice Chairman Downtain, "We expect five to ten students, but it could go up to about twenty. You want one instructor per twelve students and that is what the Department of Public Safety requires. If we have twenty students averaging at any given time, we will have three instructors to cover that."

Chairman Mahone asked if they had seen the Staff Review Letter.

Mr. McGregor replied, "Yes, they had seen the Staff Review Letter and would abide by the Recommendations."

No other citizens appeared before the Planning and Zoning Commission to discuss the Site Plan and Specific Use Permit.

Bank Drive through car stack

This letter goes into the current situation with Bank drive through traffic and how the drop off in car stack in the past 6 years has changed site design for Banks and Credit Unions. I will briefly go over how the evolution of technology and the saturation of the Banking market has had a dramatic effect in the drop off in drive thru traffic.

Technology in the past 6 years has evolved greatly in the Banking industry. I have attached multiple articles that go into the dramatic change of Banking technology and how it has affected drive thru traffic. One of the biggest technology advances is the ability to use online or mobile banking. The ability to use your phone to deposit checks has greatly reduced the need for people to visit the bank. Roughly 25% of our Bank clients in the last couple of years open Bank facilities without a drive thru because of this fact.
The second greatest technology advancement is the use of teller Cash recyclers. A teller cash recycler is a machine that is used by the Bank teller that counts and recycles the cash and coin that is being deposited or requested by the customer. The machine that is being used by First Texas National Bank can speed up a transaction time by as much as 35%-40% reducing the amount of wait time in a drive thru and reducing the number of cars stacking up.

Market Share plays a big part in the expectations of how many cars a Bank can expect in a drive thru. For example, the City of Sherman in a three-mile radius of the First Texas National Bank site has at least eleven competitors. With the population of Sherman Texas in relation to the number of competitors First Texas National Bank can expect to have a lower than average turn out in drive thru traffic.
Lastly, we can say from our experience as a design firm that does a high volume of financial institutions, we have a lot of existing Bank clients that can attest to the reduction of drive thru traffic. At a Banks peak time of drive thru traffic at its worst can have a three-car stack. The following are some of our recent clients that can attest to this.

- First National Bank of central Texas (Waco, Hillsboro, Gatesville)
- Alliance Bank (Plano, Sulphur Springs)
- Frontier Bank (Austin, Round Rock, Taylor, Lindal)
- Texas Bank (Leander, Anna, Henderson)
- Community National Bank (Waxahachie)
- Access Bank (Denton, Dallas, Fort Worth, Ponder)
- First Lockhart Bank (Lockhart, San Marcus)
- Shelby Savings Bank (Center, Lindale)
- Relyon Credit Union (Forney, Kaufman)

Employee Parking

The site plan also shows angled parking adjacent to the drive thru labeled employee parking only and is accessed by the drive thru access lane. A concern was brought up by the city that this parking would not be accessible if the drive thru stacked up more than 3 cars in each lane. However, the Banks employees arrive 30 min before the bank opens to the public and they leave 30 min after the bank closes.

In Conclusion bank site design is a result of the banks building/drive thru design needs working with the property constraints and City requirements. We feel we meet all the City's criteria and still meet the needs of the bank. First Texas National Bank is fully aware of the property's constraints and does not ever expect to see a four car or five car stack in three drive thru lanes.

Sincerely, Sean Neal

Top 4 Reasons to Implement Teller Cash Recyclers (TCRs)

One of the technologies that continues to gain traction in the US market is Teller Cash Recyclers (https://www.qualitydatasystems.com/cash-automation)(TCRs). Prized for their security and efficiency, there are numerous benefits and strategies for their utilization.

In this article, we'll review the key reasons for implementation and how they have direct and indirect benefits to financial institutions.

Teller Cash Recycler Benefit #1 – Security

With many Financial Institutions implementing open branch concepts or just looking to offer better security

branch concepts or just looking to offer better security of cash on the retail floor, TCRs have become the staple to provide that security.

TCRs offer 24 hour vaults, so that cash is always locked in a secure place and cash doesn't need to be moved the vault nightly. This provides security and reduces labor time and exposure shuffling cash to the vault to be secured.

In an open branch or pod style concept, cash exposure can be a big concern. It can be especially concerning for clients that are taking in any sort of larger cash deposits. The TCR allows you to process those larger cash deposits quickly and get it secured in a matter of a few minutes, versus having it sit out on an open teller counter or POD counter exposed.

One of the key security principles is removing the temptation, and being able to secure cash faster, removes the opportunity for easy snatch and grab type robberies.

Teller Cash Recycler Benefit #2 – Transaction Speed

Transaction speed and efficiency is the primary target benefit that many executives and operations leaders gravitate towards when considering TCRs. This is a very powerful benefit of teller cash recyclers, in that it dramatically speeds up transaction times, especially for medium to large size deposits or withdrawals.

To use industry averages, the withdrawal time with a TCR is 6-8 seconds versus 45 seconds for a manual drawer. On the deposit transactions, timing is reduced to 30 seconds to 2 minutes, depending on size of deposit. A manual deposit process might range from 5-10 minutes or even longer depending on size and complexity of the deposit.

The typical rule of thumb is that 2 tellers or universal

The typical rule of thumb is that 2 tellers or universal staffers with a TCR can do the work of 3. We typically see that a TCR runs .5 to 1 FTE per unit and staffing model.

For example a higher volume branch with 6 tellers, could implement 2 TCRs and drop FTE count to 4, providing on average a $40,000 a year savings for a scenario like this. We also see that a single person can manage 3 lanes of drive through by themselves or 2 handle up to 5 lanes.

The other major part of speed and efficiency is the balancing process. A typical teller balancing process may range from 8-15 minutes to close out at the end of the shift. With TCRs that is typically reduced to 1-2 minutes per teller, reducing labor overages as well as driving more accurate balancing.

Teller Cash Recycler Benefit #3 – Vault Transactions

This is often the largest ROI of time and efficiency, but it can be overlooked at times during the decision process. Most of the time by implementing TCRs, you can drive your vault transactions down to 0-2 per day, where in a manual environment that might be 5-20 depending on branch volume. Many FIs don't realize how much time and effort their vault or head teller spends on a busy day shuttling cash back and forth to the vault to keep the tellers within their drawer limits. We typically see an efficiency gain on vault transactions alone north of 90%.

By putting TCRs into the environment, not only do you get your best teller back serving clients instead of other tellers, but now any other teller can buy or sell to the TCR in single control. This can be especially impactful in lower staffed branches where lunches can make dual control very difficult to maintain.

Since the TCR acts as the second control, many

Financial Institutions can open with fewer staff and handle the lunch time rotations better without having to get a branch manager or other staff member involved in maintaining dual control.

Teller Cash Recycler Benefit #4 – Universal Staffing

One feedback concept that typically rings true in most branch environments, is both sides of the house are not usually busy at the same time. Platform or Service representatives are not slammed at the same time as the tellers are.

One of the most frequent complaints we get is that platform people aren't willing to get a drawer and help a busy teller line, because they don't want to have to count, balance and close-out at the end of the day just to run 2-3 transactions during a peak time.

If you implement universal staff that can handle both transaction types and provide them a TCR, now to run a few teller transactions can be a quick and painless process and platform associates are more willing to help work the line down.

If you are entertaining moving to universal staff, check out this article for more specific information. (/why-financial-institutions-should-implement-universal-tellers)

Secondly, by implementing TCRs in a universal staffing world, it gives quick, convenient access to platform associates to do transactions like cash deposits or check cashing for clients who are opening CDs or moving money between accounts.

Since the process is simple and secure, they no longer have to have the client go "wait at the teller line" to accomplish the simple task.

The universal staff member can simply walk out to the TCR, sign on, and run their transaction in a matter of seconds, and return back to the office to finish the session with the client.

Conclusion

Overall teller cash recyclers provide several staffing level benefits, transaction efficiencies and even back end cash management efficiencies. In addition to providing higher security, the branch operates more efficiently allowing your staff to focus more on engaging with clients and less time handling cash.

Branches that implement TCRs typically see higher cross-sell ratios, lower cash outages, and certainly robbery drives down to near zero. If you are still unsure about if TCRs would help your branch environment or which TCR is right for you, QDS is here to help!

A couple of tellers – and many vacant windows. This is a common scene in banks, especially in the older brick-and-mortar locations. Many of these branches were built before online banking, fintech and mobile check deposit existed.

Those innovations, which allow transactions to be conducted virtually anywhere, are just a few reasons the Bureau of Labor Statistics forecasted in 2017 that teller jobs would decline around 8 percent through 2026. Just one year after that forecast, tellers had already decreased a little more than 8 percent – from 502,700 to 481,490.

“You’re seeing that function, that traditional banking job role start to decline,” says Jim Edrington, chief member engagement officer at the American Bankers Association. “But I think more importantly you’re seeing it start to morph.”

The teller of the future does much more than accept cash deposits and fill out money orders. This employee is vital to keeping branch banking alive and relevant in the digital banking world.

The position taking the place of tellers

The future bank teller is morphing into a universal banker, says Edrington. A universal banker is a bank employee who both is on the platform – in the branch desk area where more in-depth conversations take place – and on the teller line. Edrington, who was a teller himself in college, says the universal banker made its retail banking debut around 2010.

“Right after the financial downturn you started to see that whole job wall evolve,” says Edrington.

The evolution means the separation between tellers and platform workers is quickly fading. The universal banker takes away the divide between platform and teller.

Around five or six years ago, the American Bankers Association started offering a universal banker certificate. The series of courses took off immediately, Edrington says.

“We figured, ‘Well, we’ll see the teller piece just drop off,’” Edrington says. “Well

interestingly enough, the universal banker piece is going quite well. But there's still a nice bit of education business for us around our bank teller certificate."

Tellers still have a vital role

From customer retention to the customer experience, the teller can be the differentiator between a physical branch and an online bank. No position in the bank sees more customers than a bank teller. And consumers want personalized help, even in the online age. More than three quarters of U.S. retail bank customers are interested in receiving financial advice or guidance from their bank, according to the J.D. Power 2019 U.S. Retail Banking Advice Study.

These days, technology can help a bank teller determine what conversation might be the best one to have with a particular customer. This customized advice can be

a more useful conversation for both the customer and the bank. It can be argued that the teller is even more important than ever.

“Banks have gotten smart with technology that when someone comes to the teller window or engages with a universal banker, they can pull up…their account and even recommend certain things that that bank employee should maybe mention or talk (about),” Edrington says.

A teller can be the difference between a customer simply walking in and out of a bank for what may be a rare visit, or a conversation that leads to more business for the bank in another product or service and a need filled for the customer.

“There’s a huge role here for connecting customers with the expertise, with the correct expertise inside the bank — whether that’s business banking, or mortgage or getting help with the mobile app,” says Paul McAdam, senior director, banking services at J.D. Power. “Or whatever the financial need may be.”

Fewer transactions means every customer interaction must be great

Routine branch transactions have been declining. That’s why every bank experience is crucial for the survival of brick-and-mortar banks – since for some customers, bank visits are few and far between.

“When these younger digital-only customers come in, it’s a really important moment of truth because this may only happen every two or three years,” McAdam says.

Since these digital customers bank in person so infrequently, assuming the bank interaction/visit goes well, satisfaction can go up quite a bit according to the J.D. Power retail banking study, McAdam says.

“So it can be very meaningful,” McAdam says. “Or it can be a bad moment of truth as well.”

Even though most depositors use online banking, a majority of those who use online banking still visit brick-and-mortar banks, according to the triennial Survey of Consumer Finances (SCF).

ATMs and advertisements when you login to online banking or on the bank’s mobile app can be effective in some situations. But a conversation with a teller may be the most effective approach for certain customers. Customers actually in a branch had a choice between visiting a bank or taking care of their banking via a mobile app or an ATM. So it makes sense that these customers may be more receptive to a human interaction than they are to a computer prompt.

“I think more and more are doing that,” Edrington says. “Certainly the very large banks have honed that quite well. But I think you’re seeing a lot of moves through some of the innovative technology companies out there to offer that kind of functionality to even the community banks.”

Weren’t ATMs supposed to eliminate tellers?

At Bank of America, the ATM similar to the one we are familiar with today, was piloted in September 1969. The prediction that ATMs would have eliminated the

need for bank tellers decades ago would have made sense. As a Bureau of Labor Statistics article notes, tellers survived the period after ATMs were expected to lead to fewer jobs.

“I think that was the number one fear, that they would replace traditional banking or branch banking. And it never happened,” Edrington says with a laugh. “It just provided additional convenience for the customer. And the branches certainly rode that wave very effectively.”

But ATMs actually, unexpectedly, lengthened banking hours without eliminating teller job opportunities, according to a June 1982 article in Monthly Labor Review. Suburban expansion and the increase in retail branches caused demand for tellers to increase.

For some transactions, convenience and speed are more important

Technological advances in banking – from mobile check deposits to ATM check deposits and ATM cash withdrawals – may eliminate the need for a brick-and-mortar bank for some simple transactions.

“When it comes to automation — consumers are interested in getting quick answers through automated means – absolutely,” McAdam says. “Quick transactions. Quick answers. The convenience of not having to deal with the complications that can sometimes arise in a personal face-to-face communication. That’s why we love Google and we love our apps. We can get our answers very quickly.”

Some banks are utilizing Interactive Teller Machines (ITMs). These allow a face-to-face video interaction with a teller. The same teller is able to help customers at multiple ITM locations in a day because they're based at a centralized location.

"Even branches with tellers, the interaction with that teller – it's not going to be over a counter," says Greg McBride, CFA, Bankrate's chief financial analyst. "It's going to be through a video screen. The tellers are going to be increasingly centrally located but may serve multiple branches through video technology."

This greater efficiency is how the teller might still be around in the future.

Planning & Zoning Commission

Final Plat of Sonoma Acres, Lots 1, 2, 3, 4, Block A.

Background:

The property is located at 801 Pleasant Home Road at the corner of Riddels Road and Pleasant Home Road. The owner would like to plat the property into four lots for residential development.

The following has been approved for this location:

- February 21, 2023 - Preliminary Plat of Sonoma Acres.

Adjacent Zoning:

R-6 (Single-Family Residential) District
ETJ (Extra Territorial Jurisdiction)

Origination:

Gerardo Solis, Sonoma Construction, LLC (Owner)
Helvey-Wagner Surveying, Inc. (Surveyor)

Master Plan Designation:

Suburban Neighborhood category is intended to allow primarily single-family detached in a "complete neighborhood" setting. New subdivisions should include a mix of housing products and lot sizes. Areas of supporting local commercial should be integrated into the neighborhoods, primarily along major streets near the entrance of neighborhoods. Community amenities such as parks, trails, open spaces, and civic uses should also be included in the creation of new subdivisions. This category gives flexibility for the creation of master-planned neighborhoods that are compatible with the surrounding area.

Intent & Character

The Core Neighborhood category is intended to protect and enhance the existing residential areas of Sherman. This area is generally located in the center of the city, east and west of US-75. A majority of the Core Neighborhood category encompasses what is known as east Sherman. This category encourages infill development that maintains the existing character, while increasing the aesthetic appeal of the community. In certain areas, an increase in density can be appropriate through the development of single-family attached products, like townhomes or quad-plexes.

Appropriate Land Use Types

- Single-family detached
- Single-family attached
- Local/neighborhood commercial and office
- Parks and open space
- Schools and civic uses

Compatible Zoning Districts

- Single-Family Residential (R-5, R-4, R-2F, and R-TH)
- Multi-Family Residential (MF-15 and MF-30)
- Manufactured Housing
- Retail Business
- Neighborhood Commercial

Considerations

- Infill that increases density should match the character of the surrounding structures.
- Small-scale commercial uses are appropriate along larger streets and should be compatible with the surrounding residential development.

Subject: Proposed Zoning Change for the Property at Washington Bend

EXTERNAL EMAIL: -- Avoid clicking on links or files -- Be safe!

Planning and Zoning Committee,
Sherman, Texas

Dear Committee Members,

We are homeowners directly adjacent to a 22-acre property at W. Washington Street that is being considered for development as well as a residential zoning change, to be discussed at the P&Z meeting on April 18. We have spoken with representatives of the development company who are requesting the zoning change, and learned that their plan is to build 75 homes at this property for the mostly 55+ age group.

According to City of Sherman zoning codes, the change from R6 to R5 zoning will allow for:

- A decrease in the minimum lot size
- A decrease in the minimum home size
- A decrease in setbacks
- An increase in the percent of the gross area of the home on the lot

We object not just to the change from R6 to R5 intended to increase housing density, but to the whole idea of a drastic change to the character of this neighborhood. We currently enjoy the quiet, open feel to our neighborhood. It is peaceful, even somewhat rural. Before we purchased our home adjacent to the said 22-acre property in 2021, we learned that it was for sale with a proposed plat for approximately 20 homes. We felt this would be in line with the neighborhood.

The proposed development with 75 homes is much higher-density housing than currently exists anywhere close to the property, and will not only look out of place, but will bring crowding, traffic nuisances, and will likely decrease existing home values within the vicinity.

The developer states they plan for high-quality homes, but this does not change the disturbing fact these would be *high-density* homes. We believe the proposed development is inappropriate at this location, and ask the P&Z Committee to consider the wishes of us and our other neighbors. We plan to attend the meeting on April 18.

Kind Regards,
Wesley and Janet Hennard

Ms. Marlow.

Thank You so much for your reply and clarification.
I would like to oppose this change as that area of West Washington was designed to be a lower density development with more larger lots and not so much traffic. This will change that. I don't mind the development but it has to remain as R-6.
I am fairly certain the rest of Timbercreek, and the other developments will want that as well.

Thanks

To Whom it May Concern:

We are **opposed** to any change to the existing Zone R-6 for the above reference property, to a Zone R-5. We do not want to reduce the size of the lots to less than 60 feet wide as is the R-6 requirements. This would have a negative effect on the value of our home/property. Please do not change the Zone to a Zone R-5.

If you have any questions, please let us know.

Subject: Zoning Request Change 3001 Block West Washington Street

EXTERNAL EMAIL: -- Avoid clicking on links or files -- Be safe!

Dear Commissioners,

I am writing this email to express my opposition to the proposed zoning request change for the property located at 3001 Block West Washington St.

The surrounding neighborhoods are composed of homes on larger lots of land. Each property on Timbercreek has at least 2.5 acres. Having a subdivision just north of Timbercreek with 50 foot lots would be out of place for both my neighborhood, as well as the nearby Wellington neighborhood. In addition to this issue, a high-density subdivision would increase the traffic on an already busy Washington.
This concept just has the look of a crammed-in subdivision like you might see in an overcrowded suburb like Frisco. And we don't want Sherman to be just another Frisco.

Sincerely,
Gary Marlow MD

REGIONAL COMMERCIAL

Intent & Character

The Regional Commercial category is intended to promote large-scale commercial development along US-75, while promoting community character through design. US-75 serves as the major gateway to and through the community; therefore, aesthetics and design should be promoted in this corridor. This category should allow large-scale commercial uses that serve the region and the community alike. A mix of uses and inter-connectivity between parcels should be encouraged.

Appropriate Land Use Types

- Retail and Restaurants
- Multi-Family Living
- Office Complex
- Medical
- Mixed Use
- Indoor Entertainment

Compatible Zoning Districts

- Retail Business
- General Commercial
- Office
- Multi-Family Residential (MF-15 and MF-30)
- Planned Development (for larger tracts)

Considerations

- Site design considerations should be given to parking, landscaping, and building articulation.
- Where possible, parking should be screened from view or well-landscaped with native, drought-tolerant plants.
- All buildings facades fronting a public street or within significant public view should have aesthetically-pleasing horizontal and vertical articulation.
- Signage should be multi-tenant, where possible, and should match the character of the primary structure.
- High density residential should be included in mixed use developments.
- High density residential is appropriate behind commercial areas, with inter-connectivity.
- If high density is stand alone, the surrounding uses and connectivity should be considered to avoid an "island."

Project Narrative
2450 Frisco Road Office Warehouse

The current zoning for this site is C-2. We are joining the one acre property to the North. That one acre property had an old house that has been demolished. This one acre is currently zoned residential so we are requesting that property be rezoned to match the C-2 on the South adjoining property. We are replatting both tracts into a single tract for the development of office/warehouse buildings.

We are requesting a 15′ setback variance in lieu of the 60′ setback along the South and West sides of the property. 15′ was the required setback on the previous zoning ordinance for C-2. We are going to install wood fence to separate the property from the existing residential property. We are requesting a 5′ setback variance in lieu of the 15′ setback along the North side of the property. This side of the property borders an existing paved access to the existing buildings facing Baker Road. We are wanting to keep the area behind the buildings reduced to discourage tenants from storing items behind the buildings.

Kerri,

I apologize for the confusion of the zoning change, it was our intention to have it changed to CN, I just left it as C-1 in application as it was my understanding that CN was a "sub-zone" of the overall C-1 zoning classification. If it has already been posted as C-1, we will just withdraw and resubmit for the next Planning and Zoning meeting in May. Are the documents we originally submitted sufficient, or is there anything else we should add?

REGIONAL COMMERCIAL

Intent & Character

The Regional Commercial category is intended to promote large-scale commercial development along US-75, while promoting community character through design. US-75 serves as the major gateway to and through the community; therefore, aesthetics and design should be promoted in this corridor. This category should allow large-scale commercial uses that serve the region and the community alike. A mix of uses and inter-connectivity between parcels should be encouraged.

Appropriate Land Use Types

- Retail and Restaurants
- Multi-Family Living
- Office Complex
- Medical
- Mixed Use
- Indoor Entertainment

Compatible Zoning Districts

- Retail Business
- General Commercial
- Office
- Multi-Family Residential (MF-15 and MF-30)
- Planned Development (for larger tracts)

Considerations

- Site design considerations should be given to parking, landscaping, and building articulation.
- Where possible, parking should be screened from view or well-landscaped with native, drought-tolerant plants.
- All buildings facades fronting a public street or within significant public view should have aesthetically-pleasing horizontal and vertical articulation.
- Signage should be multi-tenant, where possible, and should match the character of the primary structure.
- High density residential should be included in mixed use developments.
- High density residential is appropriate behind commercial areas, with inter-connectivity.
- If high density is stand alone, the surrounding uses and connectivity should be considered to avoid an "island."

Good Afternoon Kerri,

We're looking to submit the attached plat this week and having trouble getting a signature from one of the owners. We have 1 of 2 signatures but just wanted to see if there was any grace period to get the signed application in. I don't think there's any risk of not signing, it's just a manner of hunting him down and getting the signature.
