Mr. McAllister stated, "You have a creek and trees that but up to the Hara property and there is an easement that is behind the fence, is that there?

Mr. Rae replied, "I don't know about the easement that we discussed. There is currently a sewer line easement that goes through the property. The applicant is not here to

present on this, but this is a collaboration between the City of Sherman and Young Enterprises. They are platting these two lots. The northern lot is to be dedicated as a park, they already have a sponsor to put in the park infrastructure and the southern lot will remain C-1 (Retail Business) District. They do not know what they want to do yet."

Mr. McAllister replied, "Is that the 3R-B you are talking about?"

Mr. Rae replied to Mr. McAllister, "Yes, that is correct."

Mr. Lee asked Mr. McAllister, "There is a 150' wide drainage utility easement shown on the plat. Is that what you are referring to?"

Mr. McAllister replied to Mr. Lee, "Yes, so nothing will happen in that area because of trees and water through there?"

Mr. Lee replied to Mr. McAllister, "No, not for buildings."

THE REQUEST OF BROGAN H. VICKREY (OWNER), CHRIS VICKREY (REPRESENTATIVE) AND HELVEY-WAGNER SURVEYING, INC. (SURVEYOR) CONCERNING THE PROPERTY AT 214 NORTH HARRISON AVENUE, CONSISTING OF 0.454 ACRES IN THE G.B. PILANT SURVEY, ABSTRACT NO. 963, BEING LOT 9, BLOCK 33 OF THE REPLAT OF LOTS 7 AND 8, AND THE NORTH ONE-HALF OF LOT 9, BLOCK 33 OF COLLEGE PARK ADDITION, AS FOLLOWS:

BOARD OF ADJUSTMENT
PUBLIC HEARING AND VARIANCE UNDER SECTION 14.03.007 (7) TO ALLOW A 15.5' FRONT SETBACK IN LIEU OF THE REQUIRED 20' FOR THE EXISTING STRUCTURE IN AN R-6 (SINGLE-FAMILY RESIDENTIAL) DISTRICT.

The property is located at 214 North Harrison, the northwest corner of East Pecan Street and North Harrison Avenue.

Brogan Vickrey, 1220 Hyde Park Drive, McKinney, TX 75069 and Chris Vickrey, 7212 Scottland Court, Plano, TX 75024
Mr. Chris Vickrey explained, "We are requesting a Variance for the front setback of the existing structure to align with the other building around the property."

Chairman Mahone asked Mr. Chris Vickrey, "How many square feet are you adding on?"

Mr. Chris Vickrey replied to Chairman Mahone, "I believe it is 580 square feet."

Chairman Mahone asked Mr. Chris Vickrey, "What is the current square footage?"

Mr. Chris Vickrey replied to Chairman Mahone, "With the removed portion of what is existing is 810 square feet, so it would make it 1400 square foot, three bedroom and two bath home."

Chairman Mahone asked Mr. Chris Vickrey, "Have you reviewed the parking requirements?"

Mr. Chris Vickrey replied to Chairman Mahone, "Yes, we have. This is on a corner lot with the front setback off Harrison Street and side street Pecan. There will be plenty of parking off Pecan and the pre-existing crumbled asphalt driveway has been removed and we are prepping it for new asphalt driveway."

Commission Member Manley asked Mr. Chris Vickrey, "What all is happening with the existing structure?"

Mr. Brogan Vickrey replied to Commission Member Manley, "We started doing demolition work after I received the permit about nine months ago and once, we started doing the work we found out about the setback."

Chairman Mahone asked Mr. Rae, "If they were not doing the addition, just doing the siding and new surfaces would they be required to get this exception?"

Mr. Rae replied to Chairman Mahone, "Possibly not, no."

Mr. Chris Vickrey stated, "We were informed that if we were just doing a renovation to the current structure, this would not be necessary."

Mr. Rae replied to Mr. Chris Vickrey, "The addition triggers them to get the Variances."

Commission Member Manley asked Mr. Chris Vickrey, "Is the front setback is very consistent with other buildings on the street?"

Mr. Chris Vickrey replied to Commission Member Manley," Yes, if I took a photograph all the way down the street it would be completely aligned."

Chairman Mahone stated, "So you say it conforms to the neighborhood?"

Mr. Chris Vickrey replied to Chairman Mahone, "Yes."

Chairman Mahone asked if they had seen the Staff Review Letter.

Mr. Chris Vickrey replied, "Yes, they had seen the Staff Review Letter and would abide by the Recommendations."

No other citizens appeared before the Planning and Zoning Commission to discuss the Variance.

Gary Leese, 2305 S.W. 11th Street, Lawton, OK 73501
Mr. Leese explained, "We are requesting a Variance to bring the existing self-storage facility into conforming status and a Variance for a proposed building expansion to an existing structure that is adjacent to the railroad right-of-way. We are requesting a Site Plan and Specific Use Permit for a mini-warehouse."

Chairman Mahone asked Mr. Rae, "Is this item caught up in the ordinance change?"

Mr. Rae replied to Chairman Mahone, "Yes, originally there was not a side setback requirement for commercial but now there is a setback of 15'."

Commission Member Davis stated, "What is the parking lot material?"

Mr. Leese replied to Commission Member Davis, "It would be 5" concrete, 3500 PSI."

Commission Member Davis asked Mr. Leese, "What is it now? They had an exception for gravel in the past."

Mr. Leese replied to Commission Member Davis, "Currently the entire facility is concrete."

Mr. Rae stated, "I looked at it today and I didn't notice any gravel."

Commission Member Blagg asked Mr. Rae, "I feel like we have seen other storage units where the building is the perimeter. Is that correct? This is common for this use?"

Mr. Rae replied to Commission Member Blagg, "They can, to allow the building to be the fence to add that as security."

PUBLIC HEARING AND VARIANCE – FENCE 2626 HILLTOP DRIVE (GREG PITTMAN, MEALS ON WHEELS)

(ITEM B TABLED)

PUBLIC HEARING AND VARIANCE
THE REQUEST OF GREG PITTMAN, MEALS ON WHEELS (OWNER), CHUCK EDWARDS (REPRESENTATIVE), HELVEY-WAGNER SURVEYING, INC. (SURVEYOR), CORGAN (ARCHITECT) AND GLENN ENGINEERING (ENGINEER) CONCERNING THE PROPERTY LOCATED AT 2626 HILLTOP DRIVE, CONSISTING OF, AS FOLLOWS:
BOARD OF ADJUSTMENT

A. **PUBLIC HEARING AND VARIANCE UNDER SECTION 14.04.004(4)(E) TO ALLOW A 10' TALL, BLACK VINYL CHAIN-LINK FENCE TO BE CONSTRUCTED ON THE EAST, SOUTH AND WEST PROPERTY LINES IN LIEU OF THE ALLOWED 10' WITHIN THE REQUIRED BUILDING AREA IN A C-2 (GENERAL COMMERCIAL) DISTRICT.**
B. **PUBLIC HEARING AND VARIANCE UNDER SECTION 14.04.004(4)(C) TO ALLOW A 10' TALL, BLACK VINYL CHAIN-LINK FENCE TO BE CONSTRUCTED IN THE FRONT YARD ON THE EAST AND WEST PROPERTY LINES IN LIEU OF THE ALLOWED 4' DECORATIVE FENCE IN A C-2 (GENERAL COMMERCIAL) DISTRICT.**
C. **PUBLIC HEARING AND VARIANCE UNDER SECTION 14.04.004(4)(C) TO ALLOW A 6' ORNAMENTAL FENCE IN THE FRONT YARD IN LIEU OF THE ALLOWED 4' ALONG HILLTOP DRIVE IN A C-2 (GENERAL COMMERCIAL) DISTRICT.**

The property is located at 2626 Hilltop Drive between Texoma Parkway and Cox Street.

Chuck Edwards, P.O. Box 2966, Sherman, TX 75091
Mr. Edwards explained, "We are requesting a Variance to the perimeter fencing to provide security for Meals on Wheels."

Chairman Mahone asked Mr. Edwards, "What is this ornamental fence?"

Mr. Edwards replied to Chairman Mahone, "It is just a black steel wrought iron like Ameristar."

Commission Member Davis asked Mr. Edwards, "What are you trying to secure in the parking lot?"

Mr. Edwards replied to Commission Member Davis, "The vans are there. We have seven to eight kitchens because we have 3 different counties, we are consolidating into one; then the vans take the prepared meals back for distribution. We have a lot of vagrant traffic in the area."

Mr. Rae stated, "The reason for the Variance is because they are proposing it on their property lines as opposed in their building area. The front yard you all are familiar with the max height is 4' decorative, so they are requesting that to be 6' on the property line with 10' on the sides."

Commission Member Manley asked Mr. Edwards, "The 6' ornamental, it doesn't run all the way along Hilltop Drive, right?"

Mr. Edwards replied to Commission Member Manley, "Yes, it is all 6' ornamental to the point of the entrance then goes to 10' chain-link fence."

Chairman Mahone asked Mr. Edwards, "Is there already a fence on the west side?"

Mr. Edwards replied to Chairman Mahone, "No sir, that backs up to City Limits. That really isn't a fence, it is a utility easement through there."

Commission Member Manley stated, "The left where it is a 10' chain-link fence going horizontal, I see trees pictured there."

Mr. Edwards replied to Commission Member Manley, "That is all our landscape, there are no trees there right now."

Mr. Rae stated, "It is part of their Site Plan."

Commission Member Manley stated, "So that portion because it is on the building area, it conforms?"

Mr. Rae replied to Commission Member Manley, "It does."

Commission Member Manley asked, "Variance B; is that the height and the building material or just the height?"

Mr. Rae replied to Commission Member Manley, "It is for both. Within the front part of the property, you cannot have over 4' ornamental fence. They are proposing a 6' ornamental fence along the front but a 10' chain-link fence on the sides within the front yard."

Commission Member Manley asked Mr. Rae, "It's the 10' chain-link fence to the left that runs parallel to Hilltop Drive, you are saying that conforms?"

Mr. Rae replied to Commission Member Manley, "Yes, I think that conforms. It is not in their front yard."

Commission Member Manley asked Mr. Rae, "Materials too?"

Mr. Rae stated, "I'd have to look that up and double check on that."

Chairman Mahone asked Mr. Edwards, "I'm guessing you won't have security on site. Will you have surveillance?"

Mr. Edwards replied to Chairman Mahone, "We plan to, yes but this operates from five in the morning until about noon."

Commission Member Manley stated, "Meals on Wheels is a great organization, but I don't want this piece of property to look like a prison from Hilltop Drive."

Mr. Edwards replied to Commission Member Manley, "I agree, we have been working at this for a year trying to figure out what to do."

Chairman Mahone asked Mr. Edwards, "Currently is there no fence anywhere?"

Mr. Edwards replied to Chairman Mahone, "There is along the railroad."

Chairman Mahone asked Mr. Edwards, "Have you had security issues in the past?"

Mr. Edwards replied to Chairman Mahone, "Before we got the building it had been ransacked and broken into."

Chairman Mahone asked Mr. Edwards, "How about since you have had the building? How long have you had the building?"

Mr. Edwards replied to Chairman Mahone, "No, not since we have had the building. We haven't had anything out and we

just started closing it in. We have had the building about a year now."

Chairman Mahone asked Mr. Edwards, "You haven't been operating out of it?"

Mr. Edwards replied to Chairman Mahone, "No, we have been trying to get the funds to finish the project."

Commission Member Manley asked, "To continue the 6' ornamental all the way to the western property line, would that be cost prohibited?"

Mr. Edwards replied to Commission Member Manley, "It is just the cost for us."

Commission Member Davis asked Mr. Rae, "Is this a security or is this a fence that we are discussing?"

Mr. Rae replied to Commission Member Davis, "Well their purpose is to construct it for security. The reference we discussed with Mr. Edwards is that security fences, that reference is in our fence ordinance Section 14.04.004 Subsection (4)(e); security fences may be erected to a height of ten (10) feet in commercial and manufacturing districts within the required building area."

Chairman Mahone asked if they had seen the Staff Review Letter.

Mr. Edwards replied, "Yes, they had seen the Staff Review Letter and would abide by the Recommendations."

No other citizens appeared before the Planning and Zoning Commission to discuss the Variance.

Commission Member Blagg asked Mr. Rae, "The Specific Use Permit, is it automatically tied to the applicant, or do we have to state that?"

Mr. Rae replied to Commission Member Blagg, "If you add a condition then you can do that to tie to the applicant. That is a similar process we have done for other applicants as well."

C. **SITE PLAN OF JACK IN THE BOX RESTAURANT.**

The property is located in the 3200 South Highway 75 between West Travis Street and West FM Highway 1417.

<u>David Gregory, DCG Engineering, 1668 Keller Parkway, Suite 100, Keller, TX 76248</u>
Mr. Gregory explained, "We are requesting Variances for side and rear setbacks in order to maintain a 10-car drive

thru stack and to be able to install the menu board canopy structure that protect the patron from inclement weather while ordering food. We are requesting Site Plan of Jack in the Box Restaurant."

Chairman Mahone asked Mr. Gregory, "Are you familiar with the other restaurants that are directly next door and their layouts?

Mr. Gregory replied to Chairman Mahone, "Yes sir."

Commission Member Manley asked Mr. Gregory, "So the building boundary, the rectangle piece is that the building perimeter?"

Mr. Gregory replied to Commission Member Manley, "Yes sir."

Commission Member Manley asked Mr. Gregory, "What is around it? Concrete?"

Mr. Gregory replied to Commission Member Manley, "No that is primarily turf, we have a large sidewalk on the side then there are some large turf areas."

Commission Member Manley asked Mr. Gregory, "What is that for?"

Mr. Gregory replied to Commission Member Manley, "In order to get our drive thru stack, what we had found is pre COVID-19 most QSRs (Quick Service Road) were running 70-75% of their businesses through drive thru. During COVID-19 as we all know that went up to 100% when all the dining rooms were shut down. Since COVID-19 has relaxed, what we are finding is that the dining rooms are being used but at a much lower percentage, so they are still running about 85-90% of the business through the drive thru. What you are finding with all the different QSR (Quick Service Road) brands is that they are going to the double drive thru similar to what we are proposing."

Commission Member Blagg asked Mr. Gregory, "With these new post COVID-19 dining scenarios, is this building even smaller? Do you know their previous footprints of the building?"

Mr. Gregory replied to Commission Member Blagg, "Yes, they are. With this particular style what they have set up is a modular building, Jack in the Box sets it up to where it has different styles of kitchens and dining rooms. This is a high production kitchen, but it has the smallest dining room they offer."

Chairman Mahone asked if they had seen the Staff Review Letter.

Mr. Gregory replied, "Yes, they had seen the Staff Review Letter and would abide by the Recommendations."

No other citizens appeared before the Planning and Zoning Commission to discuss the Variance and Site Plan.

<u>Julio Torres, 415 East Orange Street, Sherman, TX 75090</u>
Mr. Torres explained, "The owner would like to Replat the property into two lots for residential development and is requesting a Zone Change from C-2 (Retail Business) District to an R-6 (Single Family Residential) District."

Chairman Mahone asked Mr. Torres, "Are there any preliminary plans for what you are trying to do?"

Mr. Torres replied to Chairman Mahone, "We are trying to build a house on the empty lot that is there but currently the whole block is zoned commercial. We can't do any renovations on our house unless rezone to residential."

Chairman Mahone asked Mr. Torres, "Renovations? I thought there wasn't a building there. Is there a building on the plat currently?"

Mr. Torres replied to Chairman Mahone, "Yes, there is a house on one side, and we want to split it up. We want to sell or rent the other house then build on the empty lot."

Chairman Mahone stated, "Looks like you got plenty of residential adjacent and I guess across the street is residential?"

Mr. Torres replied to Chairman Mahone, "Yes, our whole block is residential."

Chairman Mahone stated, "So no set plans but you probably want to build residential there?

PUBLIC HEARING AND TEMPORARY USE PERMIT UNDER SECTION 14.06.008 TO ALLOW A CONCRETE BATCH PLANT IN A PD (PLANNED DEVELOPMENT) DISTRICT.

The property is located at 3200 Northgate Drive between West Travis Street and West FM Highway 1417.

Mark Miller, Holcim-SOR, Inc, 15900 Dewey Road, Addison, TX 75001
Mr. Miller explained, "We are requesting a Temporary Use Permit to allow a concrete batch plant that will be operated by GlobalWafers development to supply concrete to the construction project. The project is intended to last twelve months. Upon completion of the project, the batch plant will be dismantled and removed from the site with appropriate restoration as required by future construction project use."

Chairman Mahone asked Mr. Rae, "A Temporary Use Permit like this typically has a six-month limit."

Mr. Rae replied to Chairman Mahone, "That is correct."

Chairman Mahone asked Mr. Rae, "And we have the ability to extend that?"

Mr. Rae replied to Chairman Mahone, "That has been our method with Board of Adjustment, just a correction though that in the past the Board of Adjustment would approve this item but with our Zoning Ordinance update we changed that to the Planning and Zoning Commission to approve Temporary Use Permit."

Chairman Mahone asked Mr. Miller, "How long do you expect to need it?"

Mr. Miller replied to Chairman Mahone, "This project is expected to last approximately one year not withholding the weather in Texas."

Commission Member Blagg asked Mr. Rae, "Does the one-year transfer to Planning and Zoning when it used to be the Adjustment Board?"

Mr. Rae replied to Commission Member Blagg, "Yes, and the language says two weeks to six months with the exception of a concrete batch plant which may request a time period of up to two years."

Commission Member Blagg asked to Mr. Rae, "How do we quantify that? Our code says the applicant can request up to two years; the applicant is saying twelve months. We can state that in our motion?"

Mr. Rae replied to Commission Member Blagg, "Yes."

Chairman Mahone asked if they had seen the Staff Review Letter.

The property is located at 2103 West Houston Street between Arapaho East Trail and Archer Drive.

David Vilbig, Vilbig & Associates, Inc., 517 West Woodard Street, Denison, TX 75020
Mr. Vilbig explained, "We are requesting a Variance and Site Plan for a new structure for Lange Veterinary Clinic. We had this Site Plan approved back in May 2020 and because of all kinds of reasons and delays it had expired and in the mean

time you had passed a new ordinance that required a 15' setback in lieu of our setback that was 0' on that east line and so we are asking for that as a variance and on the Staff Review Letter, Item No. 10 it says all fire lanes shall be a minimum of 24' wide, we have a 20' fire lane on the west side and we got that approved by the Fire Marshal two years ago."

Chairman Mahone stated, "I suspect that you will have to see the Fire Marshal again."

Mr. Vilbig replied to Chairman Mahone, "I have his signature here."

Chairman Mahone replied to Mr. Vilbig, "I don't know if there was a time limit on that."

Commission Member Davis asked Mr. Vilbig, "From the original build has anything else changed?"

Mr. Vilbig replied to Commission Member Davis, "No sir.

Chairman Mahone asked Mr. Vilbig, "What is to the east of you?"

Mr. Vilbig replied to Chairman Mahone, "Mini-warehouses are to the east, they are well below the hill and mini-warehouses to the west that are above. There is residential to the north, and we are going to put a screening fence on that."

D. FINAL PLAT OF DOUBLE D MACHINING ADDITION
E. SITE PLAN OF DOUBLE D MACHINING ADDITION

The property is located at 2513 South First Street near the intersection of East Ida Road and South First.

<u>Dylan Garza, 2513 South First Street, Sherman, TX 75092</u>
Mr. Garza explained, "We are requesting Variances for an addition to the existing structure and to allow gravel to the parking lot with a concrete or asphalt approach. We are requesting a Final Plat and Site plan for Double D Machining. In December of 2019 we had constructed Building A and planned to construct Building B, but COVID-19 had slowed us down and had to postpone. At that time with Building A, the ordinance was a 10' setback which we built to 16' and with the changed ordinance it has been moved to 25'. We would like to have the new structure in line with Building A. On the approach it was gravel, but I would like to have a concrete entry way."

Chairman Mahone asked Mr. Garza," How many feet do you have between A and B and the green building?"

Mr. Garza replied to Chairman Mahone, "There is 44' there and 27' of driveway with the rest being a ditch that runs parallel with the green building. If I moved the building south, it would obstruct my fire lane."

Chairman Mahone asked Mr. Garza, "Is Building B a free-standing building or a true addition?"

Mr. Garza replied to Chairman Mahone, "It would be an addition. It would be identical to Building A except for the front apron and bathroom that is in Building A. Building B would be strictly open which would store high dollar material which sits on a concrete slab. We are hoping to get the material put away and out of the weather."

Chairman Mahone asked Mr. Garza, "What is the green building for?"

Mr. Garza replied to Chairman Mahone, "The green building is partially storage and machine shop where my office is located."

Chairman Mahone asked Mr. Garza, "Do you have the option to asphalt that parking area?

Mr. Garza replied, it would be nice but when it is all done it would be a third of the price. I don't do any work for the general public, we have seven employees that drive in, in the morning then drive out."

Chairman Mahone stated, "Tell me about neighbors on the north or south side of you."

Mr. Garza replied to Chairman Mahone, "The north side is heavily wooded, and I have a new neighbor north of Building B off of Ida Road."

Commission Member Davis asked Mr. Garza, "What is the deal on storage? I noticed you have quite a bit of outside storage."

Mr. Garza replied to Commission Member Davis, "Yes sir but we need to get the high dollar materials out of the weather."

Commission Member Davis asked Mr. Garza, "Is there fencing?"

Mr. Garza replied to Commission Member Davis, "Yes sir, there is fencing already around the entire perimeter."

Chairman Mahone asked if they had seen the Staff Review Letter.

Marin Corarrubias, M & G Homebuilders, 1218 Brents Avenue, Sherman, TX 75090
Mr. Corarrubias explained, "We are requesting a Zone Change to build two residential structures on two existing tracts of land. We plan to build patio homes with an attached garage on each tract."

Chairman Mahone asked Mr. Rae, "When we updated the zones, did certain zones automatically become R-6 (Single Family Residential) District?"

Mr. Rae replied to Chairman Mahone, "That is correct."

Chairman Mahone asked Mr. Corarrubias, "How wide are these lots?"

Commission Member Davis replied to Chairman Mahone, "They are 40' to 43'."

Chairman Mahone asked Mr. Rae, "What is the minimum lot width for R-4 (Patio Home Residential) District?"

C. PRELIMINARY PLAT OF B.H. MOORE HEIRS ADDITION LOTS 4R-A, 4R-B AND 4R-C, BLOCK 7.

The property is located at 300 and 302 West Moore Street between South Elm Street and South Rusk Street.

Luis Moran, 600 Moore Street, Sherman, TX 75090 and Corby Hosea, 12 Vaughn Drive, Denison, TX 75020

Mr. Hosea explained, "We are requesting Variances to allow three new single-family residences. We are expecting 5,000 employees that are headed this way between Texas Instruments and GlobiTech, they will need a place to live. We are requesting to Replat the 18,500 square foot lot into three smaller lots so they face Elm Street. The houses will be front facing with three bedrooms, two bath and two garage houses that mix with the neighborhood well. It is my understanding that I could have requested to build four separate lots but to be a good partner with the neighborhood, I didn't feel it would be consistent with the neighborhood."

Chairman Mahone asked Mr. Hosea and Mr. Moran, "You want all three of these to be R-6 (Single Family Residential) District?"

Mr. Moran replied to Chairman Mahone, "Yes."

Mr. Moran stated, "The Future Land Use for this, falls within the Core Neighborhood, which would allow for four 40' wide lots but we are requesting 60'."

Mr. Hosea stated, "And each of the houses will have a different elevation and color scheme, so they will look different on Elm Street to provide variety for the neighborhood."

Linda and John Nelson, 1310 South Crockett Street, Sherman, TX 75090

An email was received on February 13, 2023, at 10:13 a.m. stating, "We don't support the proposed change."

Derek Gilmore

A letter was received on February 14, 2023, at 8:30 a.m. stating, "In my opinion, there should be no changes in this area of south Sherman. It's Historic and it should stay the same for the residents that have worked so hard to keep it there."

Glenda Perry, 1018 South Crockett Street, Sherman, TX 75090

A letter was received on February 14, 2023, at 8:30 a.m. on the Public Notification stating, I object to request for a zoning change as set forth above."

Jim and Sheri Fallon, 1204 South Crockett Street, Sherman, TX 75090
An email was received on February 14, 2023, at 2:51 p.m. stating, "We would like to voice our objection to the Variance requested for the above referenced property to divide it into three lots. This Variance would set a bad precedent for the neighborhood as it creates lots which would appear to be much smaller than the surrounding lots. The South Crockett and South Elm areas have been improving over the last several years and this would be a step back. Lots and the houses built on those lots would likely be built for rental use and not ownership. Over time this would deteriorate much like the existing house on the lots. I would assume three houses facing Elm Street on lots of the proposed size would create parking on the street which is already a problem."

Kim Perry, 910 South Crockett Street, Sherman, TX 75090
An email was received on February 15, 2023, at 5:03 p.m. stating, "I object to the requests made in the attached February 2, 2023, notice of hearing relating to the referenced property."

Jim Fallon, 1204 South Crockett Street, Sherman, TX 75090
Mr. Fallon explained, "I think parking is going to be a problem. You are converting a single house lot into three houses and that is going to increase parking. He stated they are going to be rent houses and I think that is a problem. There are rent houses over there and over time they get worse. My biggest concern is precedence setting is a slippery slope, you do it once, a month from now somebody comes up saying well you gave that guy a variance and I'm only asking for another 4'."

Debbie Odom, 814 South Elm Street, Sherman, TX 75090
Ms. Odom explained, "I am disturbed to hear they are going to paint the houses all different colors like some kind of carousel. There is not adequate parking on the narrow streets and any overflow would fall on my property causing disturbance day and night."

Kim Perry, 910 South Crockett Street, Sherman, TX 75090
Ms. Perry explained, "I foresee the reduction in the lot size and the number of houses created an unsightly and problematic parking situation as to be seen in other sections on Moore Street. The Comprehensive Plan 2022 states the Core Neighborhood category is intended to protect and enhance the existing residential areas of Sherman."

Chairman Mahone asked Mr. Rae, "The bright yellow is all R-6 (Single Family Residential) District, right?"

Mr. Rae replied to Chairman Mahone, "That is correct."

Chairman Mahone asked, Mr. Rae, "The dark orange color is that multi-family?"

Mr. Rae replied to Chairman Mahone, "It is multi-family. That whole area was zoned R-2 (Multi-Family Residential) District originally before we changed it and it is now zoned MF-30 (Multi-Family Residential) District."

Diane Lovin, 900 South Crockett Street, Sherman, TX 75090
Ms. Lovin explained, "I wanted to add that codes are written for a reason, the code that is written for this city is intended to promote low density and if we allow three houses on less than half an acre that is not low density, that is high density. I am also very concerned about the parking."

Robin Phillips, 1126 South Crockett Street, Sherman, TX 75090
Ms. Phillips explained, "I live in that neighborhood because I love old houses. The subject property they want to tear down is a beautiful turn of the century home, it is worth preserving."

Rick Magers, 926 South Crockett Street, Sherman, TX 75090
Mr. Magers explained, "The City of Sherman designated Heritage Row to retain the Historical nature of that area many years ago. I don't feel this is in keeping with that area. These plats would be within 20' of the Historical area. Elm Street is a very narrow street and won't be able to maintain the traffic there."

Larry Phillips, 1126 South Crockett Street, Sherman, TX 75090
Mr. Phillips explained, "Moore Street is a boulevard, if you go down, you'll see it is wide and Elm Street is a tiny road; those places where they have made exceptions before it is horrible to drive through there, it is not safe. You have kids running around, you can't see them because of cars because of that density."

Mr. Hosea explained, "There are a lot of homes that need a lot of work, and I am offering to build three new attractive homes, not duplexes. A lady mentioned colors, I am not sure how I can paint them different colors or keep it the same color because if I keep it the same color, they look identical, if I change the color, it gives variety. The parking, I understand that, but in my perspective, I am actually improving that situation because the houses there don't have driveways or garages, they are parking on the street. The ones that have driveways with no garages, they are parking in the driveway and the street. I am offering two spaces in the garage and two in the driveway. The density is coming with the multiple billion-dollar project that is going to be bringing 5,000 employees and need a place to stay. One person commented that it effects the Historical District, but it is not in the Historical District."

Mr. Murphy explained, "We are requesting a Variance and Site Plan for the proposed development of Whataburger. It is not feasible to provide adequate parking, trash storage and pickup, drive-thru service and a suitable building with the requirement currently in place. It is our intent to match

Commission Member Manley asked Mr. Murphy, "The island parking you have on the right side, what is going on around that? Is that landscaping?"

Mr. Murphy replied to Commission Member Manley, "There is an access drive along the outer side of the parking to the north and in between that, Travis Street and Highway 75 would be landscaping."

Commission Member Manley asked Mr. Murphy, "Is there a reason why you chose island parking as opposed to around the perimeter?"

Mr. Murphy replied to Commission Member Manley, "Yes, the cross-access drive was platted by the overall owner and that was already in place for our site. If we did two rows of parking, we wouldn't be able to get the access drives to provide access to those parking spaces."

Chairman Mahone asked if they had seen the Staff Review Letter.

Mr. Murphy replied, "Yes, they had seen the Staff Review Letter and would abide by the Recommendations."

No other citizens appeared before the Planning and Zoning Commission to discuss the Variance and Site Plan.

PUBLIC HEARING AND ZONE CHANGE – R-6 TO R-5 2900-3200 BLOCKS NORTH HICKORY STREET (JEROME HILL, AJH ENTERPRISES, LTD)

PUBLIC HEARING AND ZONE CHANGE
THE REQUEST OF JEROME HILL, AJH ENTERPRISES, LTD (OWNERS), BRYAN WEISGERBER (REPRESENTATIVE) AND UNDERWOOD DRAFTING & SURVEYING, INC.(SURVEYOR) CONCERNING THE PROPERTY LOCATED IN THE 2900-3200 BLOCKS NORTH HICKORY STREET, CONSISTING OF 48.292 ACRES IN THE J.B. MCANAIR SURVEY, ABSTRACT NO. 763, AS FOLLOWS:
PLANNING AND ZONING COMMISSION
PUBLIC HEARING AND ZONE CHANGE FROM R-6 (SINGLE-FAMILY RESIDENTIAL) DISTRICT TO AN R-5 (SINGLE-FAMILY RESIDENTIAL) DISTRICT.

The property is located at 2900-3200 Blocks North Hickory Street between West US Highway 82 and Oxford Drive.

Bryan Weisgerber, 1720 West Virginia Street, McKinney, TX 75069
Mr. Weisgerber explained, "We are requesting a Zone Change to develop approximately 48 acres of the property as R-5 (Single Family Residential) District. The subject property had a Preliminary Plat (The Hills of Sherman) submitted last May. It is our goal to change direction from a Patio Home (PH) Specific Use Permit and comply with the city's recently updated zoning district R-5 (Single Family Residential) District."

Commission Member Davis stated, "We have received a couple of letters concerned about water runoff."

Mr. Weisgerber replied to Commission Member Davis, "Yes, that was part of the delay. On this site we have multiple detention ponds. We have one at the southwest corner, we have a placeholder for another one, we added another one at the southeast corner and there is a proposed regional detention pond for this other development and ours."

Chairman Mahone asked Mr. Weisgerber, "Currently the three detention ponds don't exist?"

Mr. Weisgerber replied to Chairman Mahone, "Correct and we are going to work with the city to over detain."

Chairman Mahone asked Mr. Lee, "Do you have any comments on this? This is something you would have to ultimately approve, right?"

Mr. Lee replied to Chairman Mahone, "Yes and he is correct, we have worked many months to create a scenario that over detains the improvement survey to address know flooding issues."

Donor Penn, 2810 Yorkshire Drive, Sherman, TX 75092

An email was received on February 12, 2023, at 4:11 p.m., "I write in opposition to re-zoning and construction that does not provide adequate protection from stormwater flooding. We have lived at 2810 Yorkshire Drive for more than 50 years. The city made mistakes in allowing recent development around our neighborhood without adequate stormwater planning that has caused flooding events to become much more frequent in the past few years. The water flow from the acreage under consideration (as well as tracts that might follow) will reduce water absorption and thereby create additional runoff. The runoff will flow to the culvert under Yorkshire Drive between Devonshire Drive and Windsor Drive. That culvert has limited capacity. Recent property development north and northeast of the intersection of North Ricketts Street and Yorkshire Drive has caused water to backup and overflow onto properties' back yards on Yorkshire Drive and Windsor Drive. It has also caused flooding into the garage of the house at 2810 Devonshire Drive. Stormwater from the subject property needs to be either redirected to the stream bed that runs east of North Travis and flows south into larger culverts. The stormwater might also be captured and stored on the subject property with either a retention basis or a detention basin to moderate the flow rate downstream as it is redirected to the stream bed on the east side of North Travis. The zoning change request will increase the development density and create higher water runoff rates and volumes if allowed as requested. The request must be denied as submitted and only considered once adequate stormwater runoff planning has occurred."

<u>Karen Slater, 2810 Devonshire Drive, Sherman, TX 75092</u>
A letter was received on February 14, 2023, at 1:09 p.m. stating, "Please consider this letter my formal opposition to the above request to change zoning. I live in the direct path of the storm water flow of the above-mentioned property. I have attached a video of the current flow of a gentle rain occurring this very morning. The video is from my back yard's view of the current storm drain. As you can see, even a gentle rain causes quite a flow behind my home. I have very serious flooding concerns associated with the proposed housing development. There does not seem to be adequate planning for the additional storm water problems that will be caused by this development. The current drainage culvert behind my home is already inadequate. My driveway and garage flood on a regular basis. This proposal is unacceptable unless it includes major storm water planning. Please consider our beautiful, long-established neighborhood as you plan for growth in our area."

Chairman Mahone asked if they had seen the Staff Review Letter.

Mr. Weisgerber replied, "Yes, they had seen the Staff Review Letter and would abide by the Recommendations."

PUBLIC HEARING, SITE PLAN AND SPECIFIC USE PERMIT– COMMERCIAL AMUSEMENT CENTER, INDOOR OR OUTDOOR 4801 NORTH FM 1417 (HERITAGE PARKWAY) (BRIAN PREVIATY)

PUBLIC HEARING, SITE PLAN AND SPECIFIC USE PERMIT
THE REQUEST OF BRIAN PREVIATY (OWNER) AND UNDERWOOD DRAFTING & SURVEYING, INC. (SURVEYOR) CONCERNING THE PROPERTY LOCATED AT 4801 NORTH FM 1417 (HERITAGE PARKWAY) CONSISTING OF 5.742 ACRES IN THE ALFRED HUME SURVEY, ABSTRACT NO. 522, AS FOLLOWS:
PLANNING AND ZONING COMMISSION
PUBLIC HEARING, SITE PLAN AND SPECIFIC USE PERMIT UNDER SECTION 14.06.009 TO ALLOW A COMMERCIAL AMUSEMENT CENTER, INDOOR OR OUTDOOR, IN A C-2 (RETAIL BUSINESS) DISTRICT.

The property is located at 4801 North FM 1417 (Heritage Parkway) near the intersection of Plainview Road and North Heritage Parkway.

Mark Underwood, 2530 West White, McKinney, TX 75071
Mr. Underwood explained, "We are requesting a Specific Use Permit and Site Plan for Four Seasons Racquet Club at Sherman. The Club included seven lighted outdoor tennis courts, two indoor tennis courts, and a swimming pool. Outside, they will restore the seven outdoor tennis courts and the swimming pool. Inside, they will revert the warehouse to two indoor courts that can be used for either Tennis or pickleball."

Chairman Mahone asked Mr. Underwood, "Directly below the pool is a metal building, is that correct?"

Mr. Underwood replied to Chairman Mahone, "Yes."

Chairman Mahone asked Mr. Underwood, "It looks like you are adding some paved parking? Is there not paved parking now?"

Mr. Underwood replied to Chairman Mahone, "There is paved parking. Under the City of Sherman's Ordinances, the outdoor swimming pool creates a fairly large need for parking which states one parking space for every 100 square feet of water and pool deck surface. We will need about 58 parking spaces."

Chairman Mahone asked if they had seen the Staff Review Letter.

Mr. Underwood replied, "Yes, they had seen the Staff Review Letter and would abide by the Recommendations."

OTHER BUSINESS

PUBLIC HEARING AND CONSIDERATION OF AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF SHERMAN, TEXAS, AMENDING CHAPTER 14 (ZONING ORDINANCE) OF THE CODE OF ORDINANCES OF THE CITY OF SHERMAN, TEXAS; ADOPTING REGULATIONS PERTAINING TO PROPERTY NOTIFICATION SIGNS FOR AMENDMENTS TO THE ZONING ORDINANCE/DISTRICT AND ADMINISTRATIVE PROCEDURES, VARIANCE PROCEDURES, SPECIAL EXCEPTIONS, TEMPORARY USE PERMIT (TUP) APPLICATION AND REVIEW, AND SPECIFIC USE PERMIT (SUP) APPLICATION AND REVIEW TO BE CODIFIED AT ARTICLES 14.06.005-009 OF THE CODE OF ORDINANCES; PROVIDING FOR INCLUSION IN THE CODE OF ORDINANCES; PROVIDING REPEALING AND SEVERABILITY CLAUSES; PROVIDING A PENALTY NOT TO EXCEED $2,000; FINDING AND DETERMINING THAT THE MEETING AT WHICH THIS ORDINANCE IS PASSED WAS NOTICED AND IS OPEN TO THE PUBLIC AS REQUIRED BY LAW.

Rob Rae

Mr. Rae explained, "This is a minor change to the new Ordinance. In the old Ordinance we had a requirement that applicants were required to post for Zone Changes with a 4' X 8' size sign. What motivated us to look at this and change this was one of the items a few months ago we had a sign out for a residential Replat, and the neighborhood came out worried that it was Zone Change because the sign is misleading. The new signs will state what the request is, so there is less confusion."

Commission Member Davis asked Mr. Rae, "We would use them over and over, right?"

Mr. Rae replied to Commission Member Davis, "We don't, that is not what we are proposing."

Mr. Rae stated, "What is written in the Proposed Ordinances is the applicants are required to post the sign 14 days before the meeting then they must take it down within 3 days after their action whether it is a Variance with Planning and Zoning or Board of Adjustment or City Council. We have come up with the proposed criteria for placement of signs, it would be the applicant's responsibility to put the signs up and would be at their cost. The 4' X 4' sign is $150.00 and will be required for any property over an acre. For any property that is an acre or less they would only be required to put up a 2' X 2' sign which is $50.00. We have been covering the cost of the signs, once the Ordinance is updated then it would be the applicant's responsibility."

Commission Member Davis asked Mr. Rae, "So the city is no longer going to drive around and put the signs out?"

Mr. Rae replied to Commission Member Davis, "No, we will request that the applicant put them up."

<u>Peter Tracy 705 South Valentine, Sherman, TX 75090</u>
Mr. Tracy stated, "Is the City going to provide this to the applicant so there is a consistency?"

Chairman Mahone asked Mr. Rae, "Do they use an approved shop, or do they pay the city and the city furnishes the sign?"

Mr. Rae replied to Chairman Mahone, "Right now they pay the city, and we furnish the signs so that we keep that consistent."

Chairman Mahone stated, "I think what we really need to be concerned with is, is there a requirement, what size is the requirement, who is going to police it, and what department is going to deal with it."

Mr. Rae stated, "What would come back to you all is if they don't post it correctly then we would ask you all to table the item."

No other citizens appeared before the Planning and Zoning Commission to discuss the Proposed Zoning Ordinance Change.

Mathias Haubert, Bohler Engineering, 2600 Network Blvd, Suite 310, Frisco, TX

Mr. Haubert explained, "We are requesting Zone Changes and Site Plan approval to allow a mixed-use development consisting of commercial uses and residential uses. The commercial uses will be along Highway 75. The proposed low-density, multi-family residential will offer the local workforce a quality residence. There are locations in McKinney, Texas and a location under construction in Melissa, Texas."

Commission Member Manley asked Mr. Haubert, "Can you explain how the parking would work?"

Mr. Haubert replied, "There are parking spaces along the main access corridors. Not every unit would have a parking space directly in front but there would be a network of sidewalks that lead to each unit."

Commission Member Manley asked Mr. Haubert, "What is the square footage of these units?

Mr. Haubert explained, "The minimum is 800 square feet, and some duplexes are 690 square feet. All are one story."

Chairman Mahone asked Mr. Rae, "What kind of requirements do they have for open space in a MF-15 (Multi-Family Residential) District?"

Mr. Rae replied, "They do not have any at this time."

ENSURE LAWN AREAS AND SWALES ARE GRADED FOR PROPER DRAINAGE. AREAS NEXT TO SIDEWALKS AND CURBS SHALL BE GRADED DOWN TO ONE (1) INCH BELOW FINISHED GRADE TO ALLOW FOR THICKNESS OF GRASS BUILD-UP.

SOD: AREAS WILL BE PLANTED WITH SOD AS INDICATED ON THE PLANS. ALL SOD SHALL BE DARK RICH GREEN, FREE OF WEEDS AND PLACED SO JOINTS ARE FLUSH BETWEEN PIECES. SOD IS TO HAVE ROOT DEVELOPMENT THAT WILL SUPPORT ITS OWN WEIGHT WITHOUT TEARING, WHEN SUSPENDED VERTICALLY BY HOLDING THE UPPER TWO CORNERS. SODDED AREAS SHALL BE ROLLED WITH A 2OO POUND ROLLER IMMEDIATELY AFTER LAYING, WATERED THOROUGHLY AND REROLLED. ASLL SODDED GRASS AREAS SHALL BE FERTILIZED AT THE RATE OF FOUR (4) POUNDS PER 1000 SQUARE FEET, PRIOR TO LAYING SOD. DEAD PATCHES OF SOD SHALL BE REMOVED AND REPLACED IMMEDIATELY.

BUFFALO GRASS HYDROMULCH (MAY 15 - AUGUST 15):
THE HYDROMULCH IS TO BE COMPOSED OF VIRGIN WOOD, GREEN COLOR ADDITIVE, CELLULOSE FIBER BY CONWED OR WEYERHAUSER. CERTIFIED HULLED COMMON BUFFALO GRASS SEED SHALL HAVE MINIMUM PURITY OF 98 PERCENT AND A MINIMUM GERMINATION RATE OF 95 PERCENT. THE FERTILIZER SHALL BE GRANULAR FORM AND BE HOMOGENIZED. APPLY AT THE FOLLOWING RATES PER 1000 SQUARE FEET: FIFTY (50) POUNDS HYDROMULCH, TWO AND ONE-HALF (2.5) POUNDS SEED, AND TWELVE (12) POUNDS FERTILIZER. AREAS OF HYDROMULCH THAT DO NOT GERMINATE WILL BE REHYDROMULCHED IMMEDIATELY. SUBSTANTIAL STAND OF GRASS MUST BE APPARENT PRIOR TO INITIAL ACCEPTANCE.

WHEN CLIMATIC CONDITIONS ARE SUCH THAT A HEALTHY STAND OF GRASS CANNOT BE DEVELOPED PRIOR TO ONSET OF COOL WEATHER, SEED WITH WINTER RYE AS AN INTERIM GROUNDCOVER, AND RETURN IN THE SPRING WHEN CONDITIONS ARE APPROPRIATE FOR ACTIVE SEED GERMINATION. REMOVE EITHER CHEMICALLY OR BY EXCAVATION, INCLUDING ENTIRE ROOT SYSTEM, ALL EXISTING WINTER RYE AND PREPARE SOIL FOR NEW APPLICATION OF BERMUDAGRASS SEED HYDROMULCH BY THE STEPS PREVIOUSLY SPECIFIED. APPLY HYDROMULCH MIXTURE AS PREVIOUSLY SPECIFIED.

Executive Summary

The proposed Molinos USA-Lawrence development is located along Progress Drive in between Flanary Road and Howe Drive in Sherman, Texas. This study is intended to identify traffic generation characteristics and the effects of the new development on the roadway network compared to background conditions and recommend improvements if necessary.

The following intersections were evaluated as part of this study:

- FM 1417/Heritage Parkway at Flanary Road
- FM 1417/Heritage Parkway at Howe Drive
- Progress Drive/Dorset Drive at Howe Drive
- US 75 SBFR at Dorset Drive
- Flanary Road at Progress Drive
- New Road at Progress Drive
- New Road at Site Driveway

The traffic operation conditions were analyzed for these intersections for the following scenarios:

- 2023 Existing Traffic Volumes
- 2025 Background Traffic
- 2025 Background Plus Site Traffic

The proposed development includes 57,050 square feet of manufacturing use. This study analyzes the site with an ultimate buildout date of 2025. The proposed development is expected to produce 45 trips in the AM peak hour, 32 trips in the PM peak hour, and 418 total weekday trips.

Intersection capacity analysis was performed on study intersections and a two-lane facility analysis was performed for FM 1417/Heritage Parkway between Flanary Road and Howe Drive. Traffic operation was acceptable in 2025 background plus site conditions and no roadway improvements were recommended. A traffic signal was not warranted for FM 1417/Heritage Parkway at Howe Drive in 2023 existing conditions nor 2025 background plus site conditions.

1.0 Introduction

1.1 Purpose

BGE, Inc. was requested on behalf of Meinhardt & Associates to conduct a Traffic Impact Analysis (TIA) for the proposed Molinos USA-Lawrence development located along Progress Drive (Future) in between Flanary Road and Howe Drive in Sherman, Texas. This study will estimate traffic created by this development, analyze the surrounding roadway network, and determine improvements to the roadway network made necessary by this additional traffic. **Figure 1** shows a vicinity map of the proposed location. **Figure 2** shows the proposed Molinos USA-Lawrence development's site plan and the proposed building layout. A full-sized copy of the proposed site plan is in **Appendix A**.

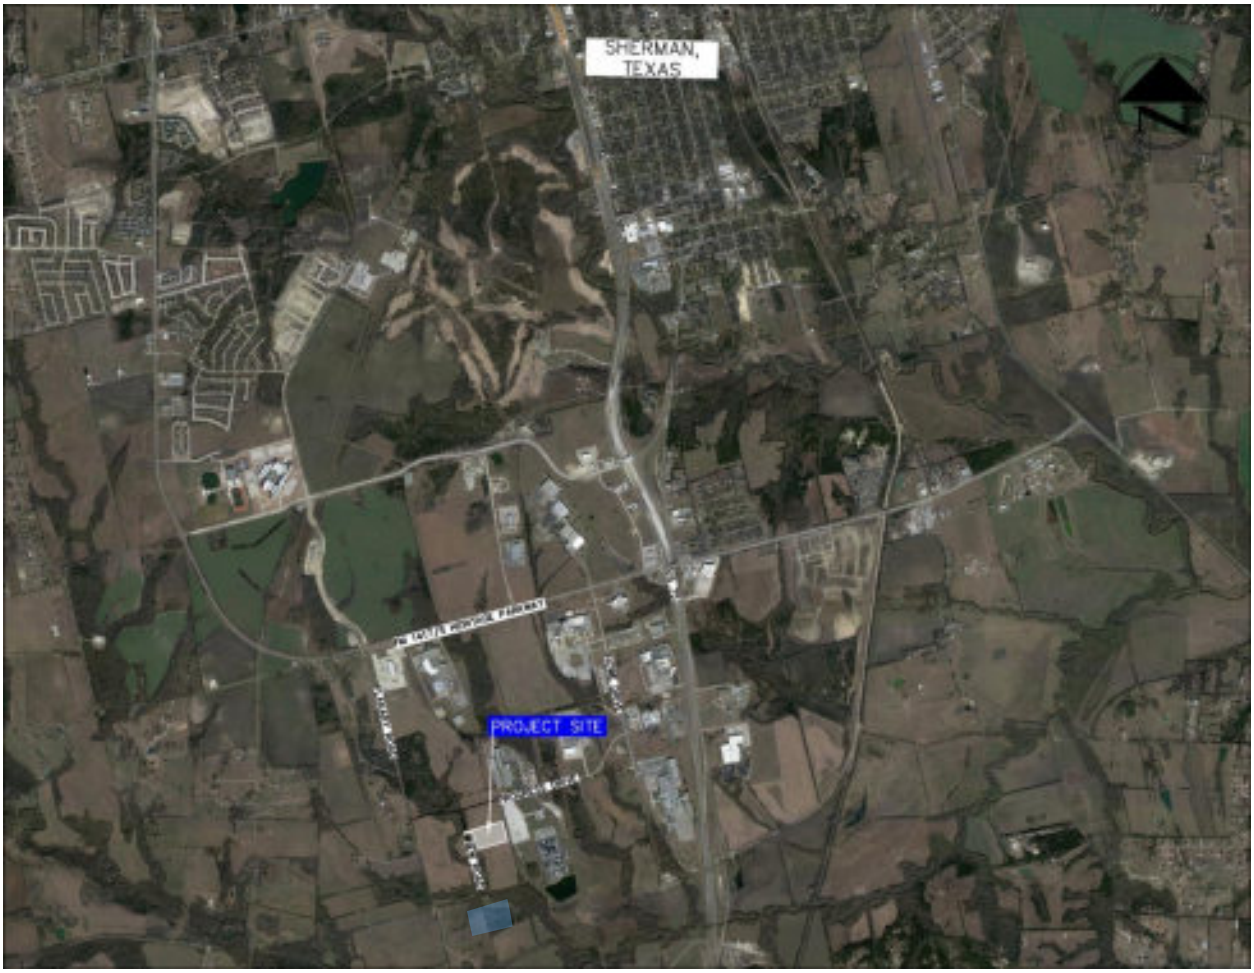

Figure 1: Vicinity Map

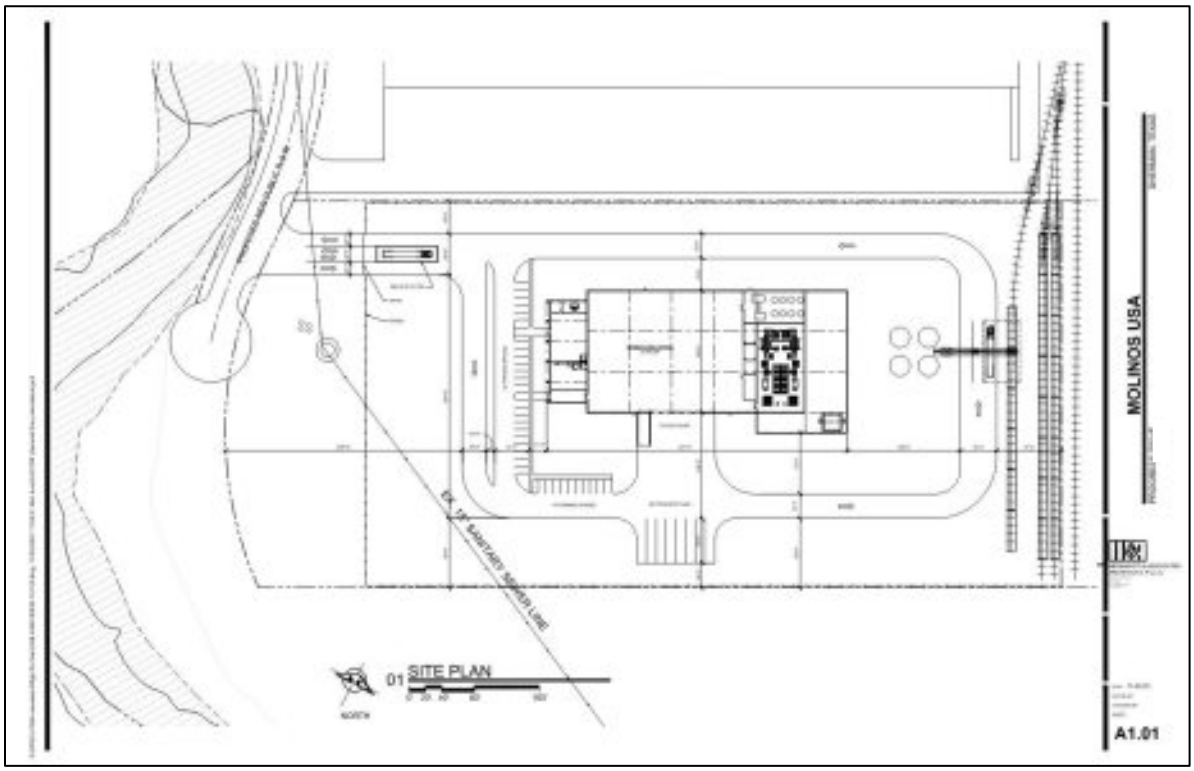

Figure 2: Proposed Molinos USA-Lawrence Site Layout

1.2 Methodology

This traffic study analyzed existing, background, and background plus site. The projected full buildout date of the development is 2025. Existing traffic volumes were directly counted on a typical weekday. Background volumes were generated by applying a growth rate to existing volumes and adding traffic from background development. Projected 2025 background plus site traffic was generated by adding traffic from the proposed development to this background traffic. The AM and PM peak hours were studied for traffic capacity analysis. Heavy trucks are present at the site, so for this study, a global heavy vehicle factor of 6% is used for the intersections on the external roadways and 40% is used for the internal roadways. For these traffic volume cases, the following analyses were performed:

- Intersection capacity analysis
- Two-lane facility analysis
-

This study used the Institute of Transportation Engineers' 11th Edition of *Trip Generation*, their web-based app "TripGen,",the Synchro 11 software to perform intersection capacity analysis, and Highway Capacity Software 2022 to perform two-lane facility capacity analysis. Synchro 11 used methods from the *Highway Capacity Manual, 6th Edition*. Highway Capacity Software 2022 used methods from the *Highway Capacity Manual, 7th Edition*.

2.0 Existing and Future Conditions

2.1 Roadway Characteristics

The proposed development is assumed to impact FM 1417/Heritage Parkway at Flanary Road near to the proposed site. The existing intersections included in this analysis are:

- FM 1417/Heritage Parkway at Flanary Road
- FM 1417/Heritage Parkway at Howe Drive
- Progress Drive/Dorset Drive at Howe Drive
- US 75 SBFR at Dorset Drive

The existing roadway network is shown in **Figure 3**.

2.1.1 FM 1417/Heritage Parkway

FM 1417/Heritage Parkway is a two-lane undivided roadway west of the intersection of FM 1417/Heritage Parkway at Howe Drive with a 60 mph posted speed limit. The total width of the roadway is approximately 44 feet wide with 12-foot wide lanes and 10 foot wide shoulders. The City of Sherman's *Master Thoroughfare Plan* classifies it as a Major Arterial Thoroughfare.

2.1.2 Flanary Road

Flanary Road is a two-lane undivided roadway with a 30 mph posted speed limit. The total width of the roadway is approximately 18 feet wide. Expansion is planned for Flanary Road north of FM 1417/Heritage Parkway into a four-lane divided. The City of Sherman's *Master Thoroughfare Plan* classifies it as a Minor Arterial Thoroughfare.

Flanary Road is currently under construction. North of FM 1417/Heritage Parkway, a new roadway section is being added north of FM 1417/Heritage Parkway. South of FM 1417/Heritage Parkway, the existing Flanary Road roadway is being replaced with a newly paved roadway. These new roadways will be one half of a future four-lane median divided roadway to operate as a two-way two-lane road. This construction is planned for completion by 2025.

2.1.3 Howe Drive

Howe Drive is a two-lane undivided roadway with a 30 mph posted speed limit. The total width of the roadway is approximately 24 feet wide with 12-foot wide lanes. The City of Sherman's *Master Thoroughfare Plan* classifies it as a Collector Thoroughfare.

2.1.4 Progress Drive/Dorset Drive

Progress Drive is a two-lane undivided roadway with a 30 mph posted speed limit. The total width of the roadway is approximately 24 feet wide with 12-foot wide lanes. A new link is planned to be built stretching from Flanary Road to the existing link of Progress Drive just west of Howe Drive. The City of Sherman's *Master Thoroughfare Plan* classifies it as a Minor Arterial Thoroughfare.

2.1.5 US 75

US 75 is a north-south freeway through Sherman, Texas. Near the proposed site, US 75 has four controlled access main lanes and one-way frontage roads on either side. The southbound frontage road was analyzed in this study. It has a 55 mph posted speed limit and has three 12-foot wide lanes. Near the proposed site, US 75 is under construction for expansion to six controlled access main lanes and other improvements. These improvements include two "Texas U-turn" lanes for the FM 1417/Heritage Parkway diamond interchange.

2.2 Proposed Development

The proposed site, Molinos USA-Lawrence, is located adjacent to Progress Drive on the extension from Flanary Road to the existing link of Progress Drive. The proposed development consists of 57,050 square feet of manufacturing use. The proposed site will be built in one phase and is scheduled for completion in 2025. **Figure 4** shows the future roadway network with the proposed site's connections.

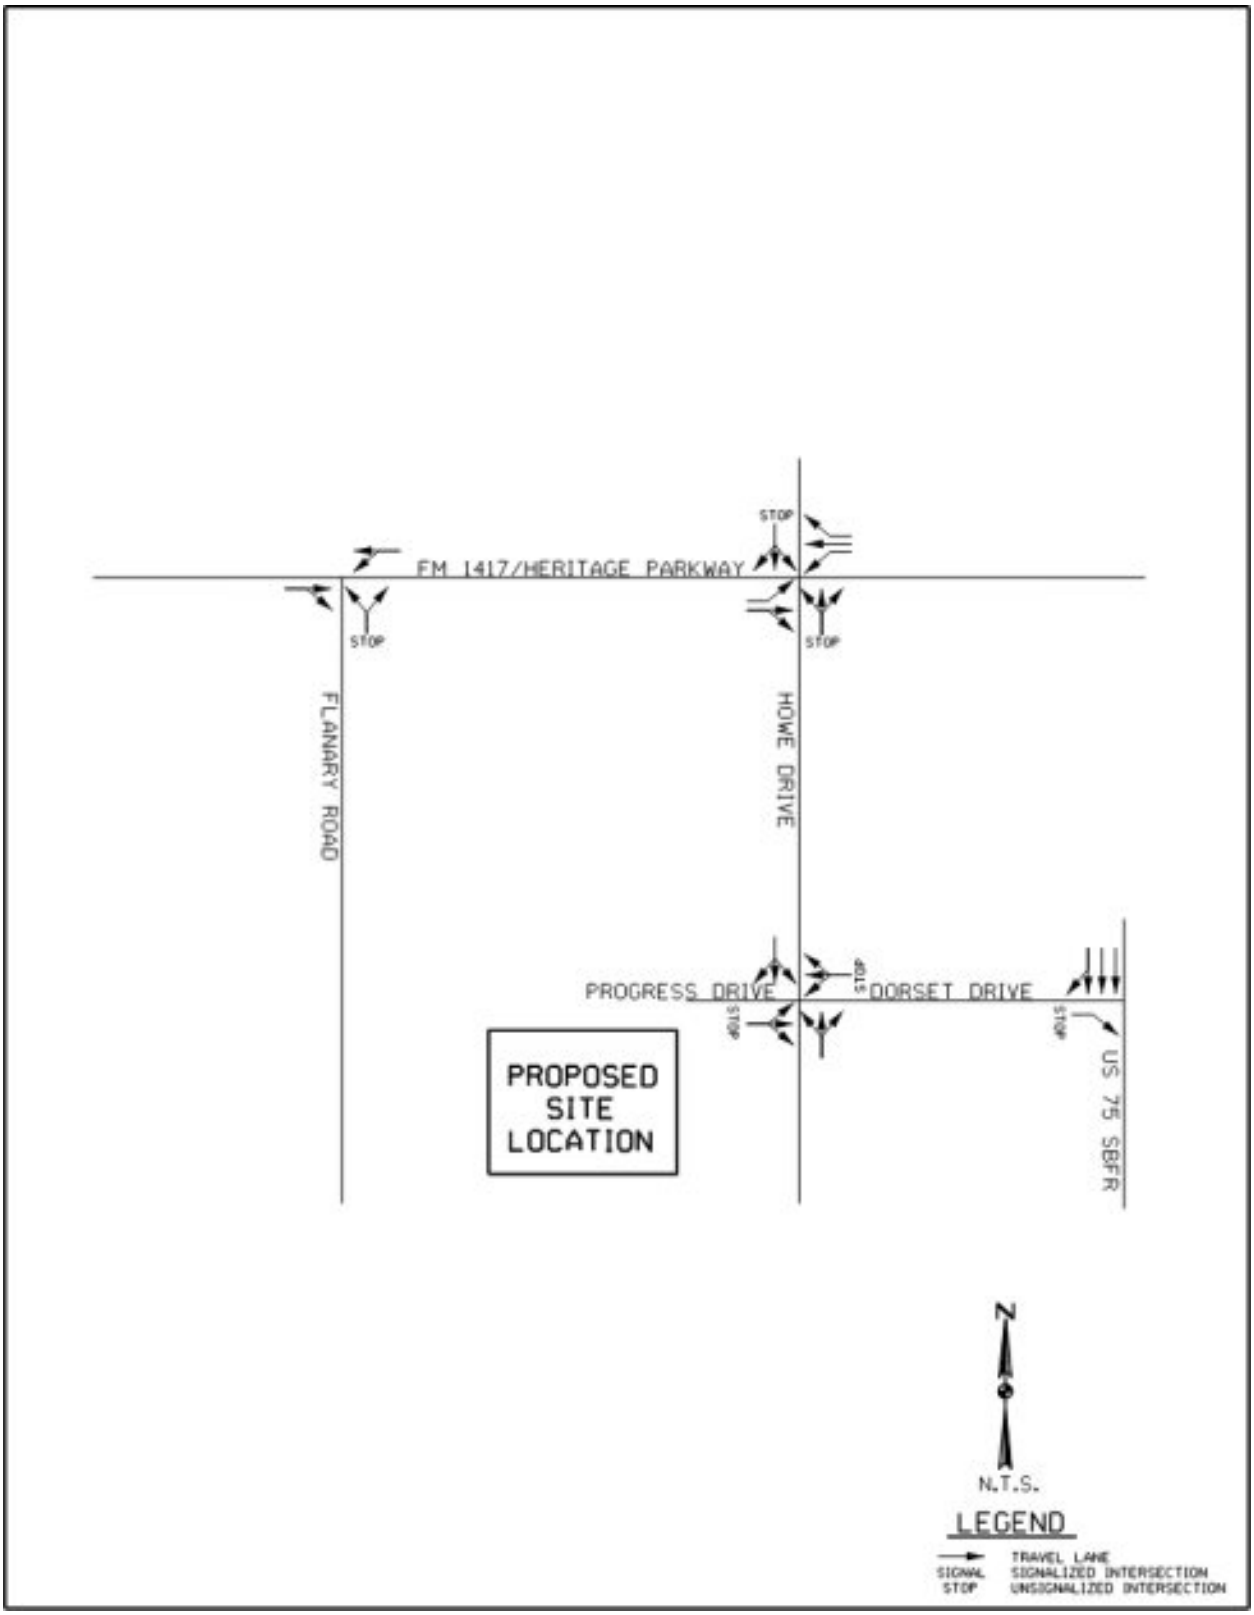

Figure 3: Existing Roadway Network

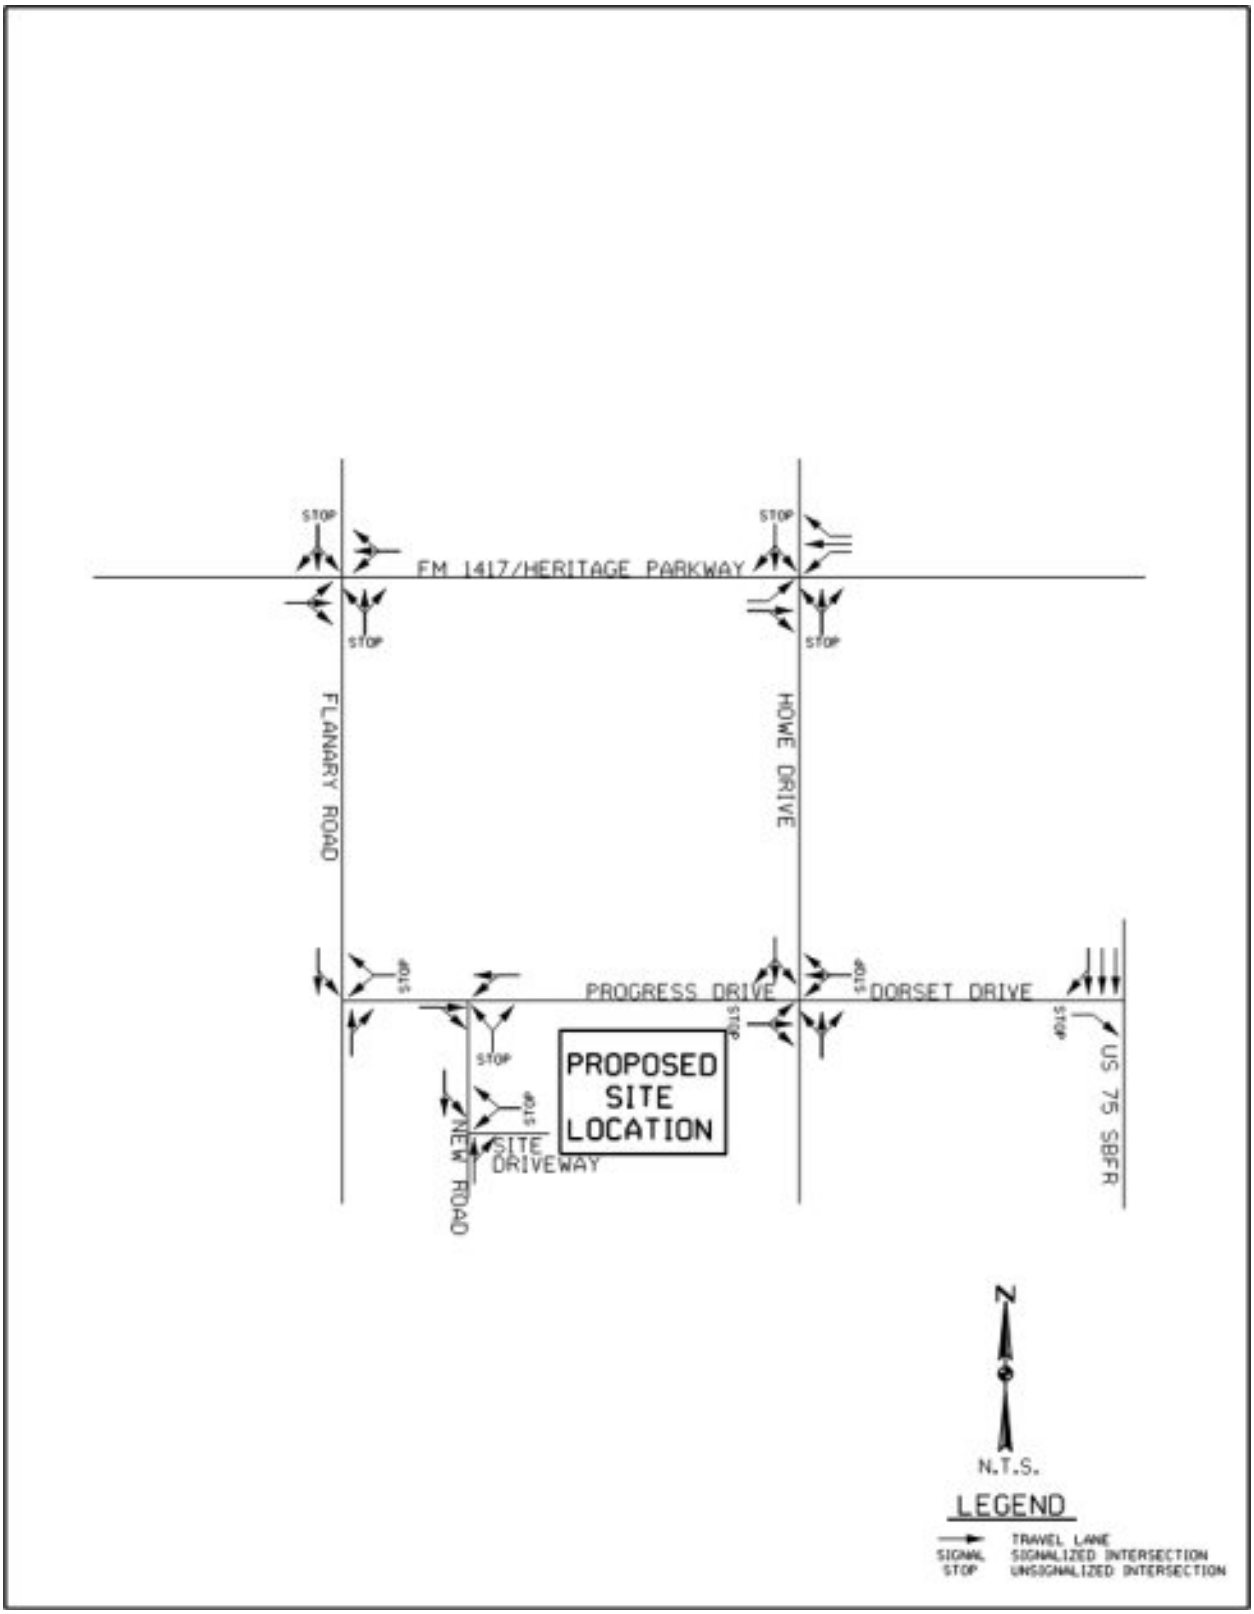

Figure 4: Proposed Roadway Network

2.3 Existing Traffic Volumes

Traffic data was collected at nearby key intersections and roads for the TIA. Turning movement counts (TMC) for 7-9 AM and 4-6 PM to capture the AM and PM peak hours were collected at the following locations on Thursday, January 5, 2023:

- FM 1417/Heritage Parkway at Flanary Road
- Progress Drive/Dorset Drive at Howe Drive
- US 75 SBFR at Dorset Drive

A 24-hour turning movement count was also collected at the following location on Wednesday, January 11, 2023:

- FM 1417/Heritage Parkway at Howe Drive

These traffic data are included in **Appendix B**. **Figure 5** shows existing 2023 peak hour traffic volumes.

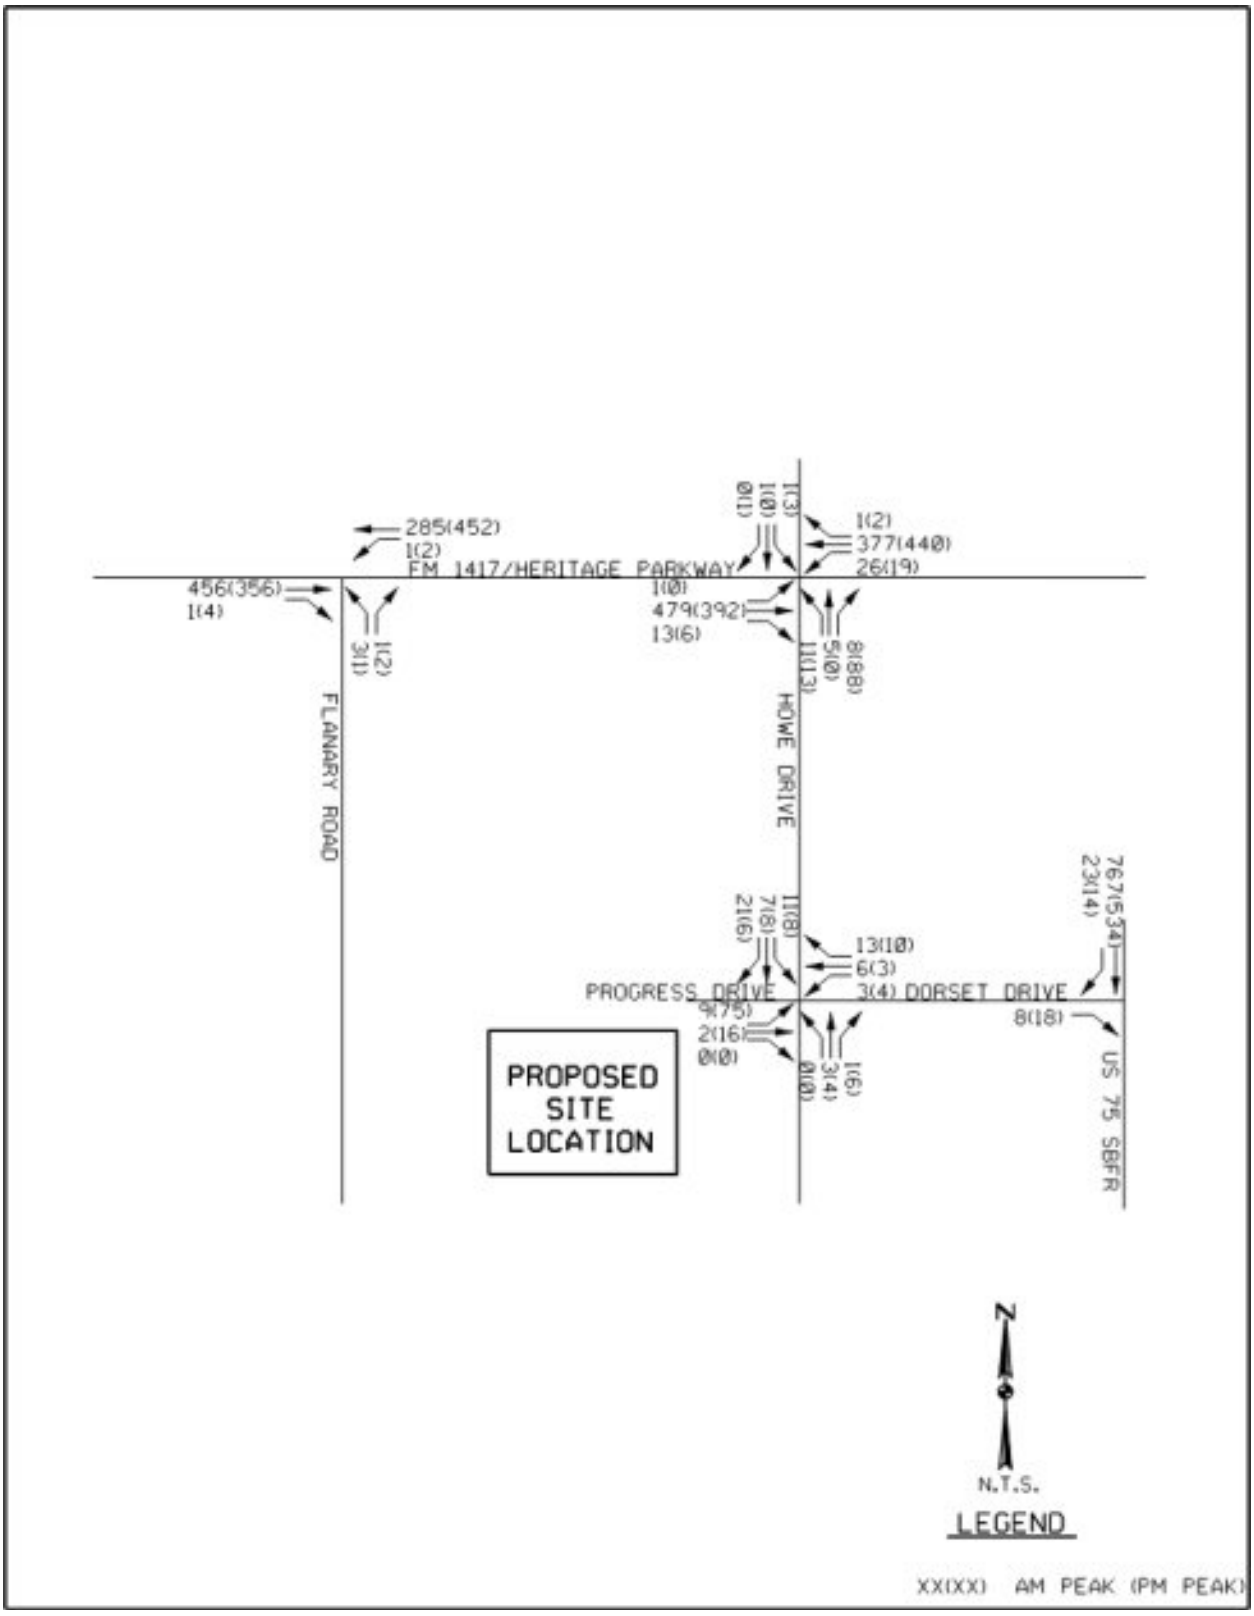

Figure 5: 2023 Existing Traffic

3.0 Project Traffic Characteristics

3.1 Site-Generated Traffic

The amount of traffic generated by a proposed site is estimated through a process known as trip generation. These trip generation rates are acquired from the 11th Edition of *Trip Generation* as published by the Institute of Transportation Engineers (ITE). The trip generation rates produced by ITE are the result of nationwide studies of similar land uses. Applying the trip generation rates provided by ITE to the proposed development results in the weekday AM peak hour and PM peak hour trips to and from the development.

The proposed development consists of ITE Land Use 140. The results of the trip generation are in **Table 1** below. Reports from ITE's TripGen web app for the proposed development are given in **Appendix C**.

Table 1: Proposed Site Trip Generation

Land Use	Variable	Quantity	Daily	Weekday Totals					
				AM PEAK Adjacent			PM PEAK Adjacent		
				In	Out	Total	In	Out	Total
140 - Manufacturing	SF	57,050	418	34	11	45	10	22	32

3.2 Trip Distribution and Traffic Assignment

The distribution of the site traffic onto the local roadway system was based on the characteristics of the local roadways, existing developments nearby, existing traffic patterns and the locations of the proposed driveways to and from the site. **Figure 6** shows trip distribution for the proposed site traffic. **Figure 7** shows the site generated AM and PM peak hour turning movements for each of the study intersections.

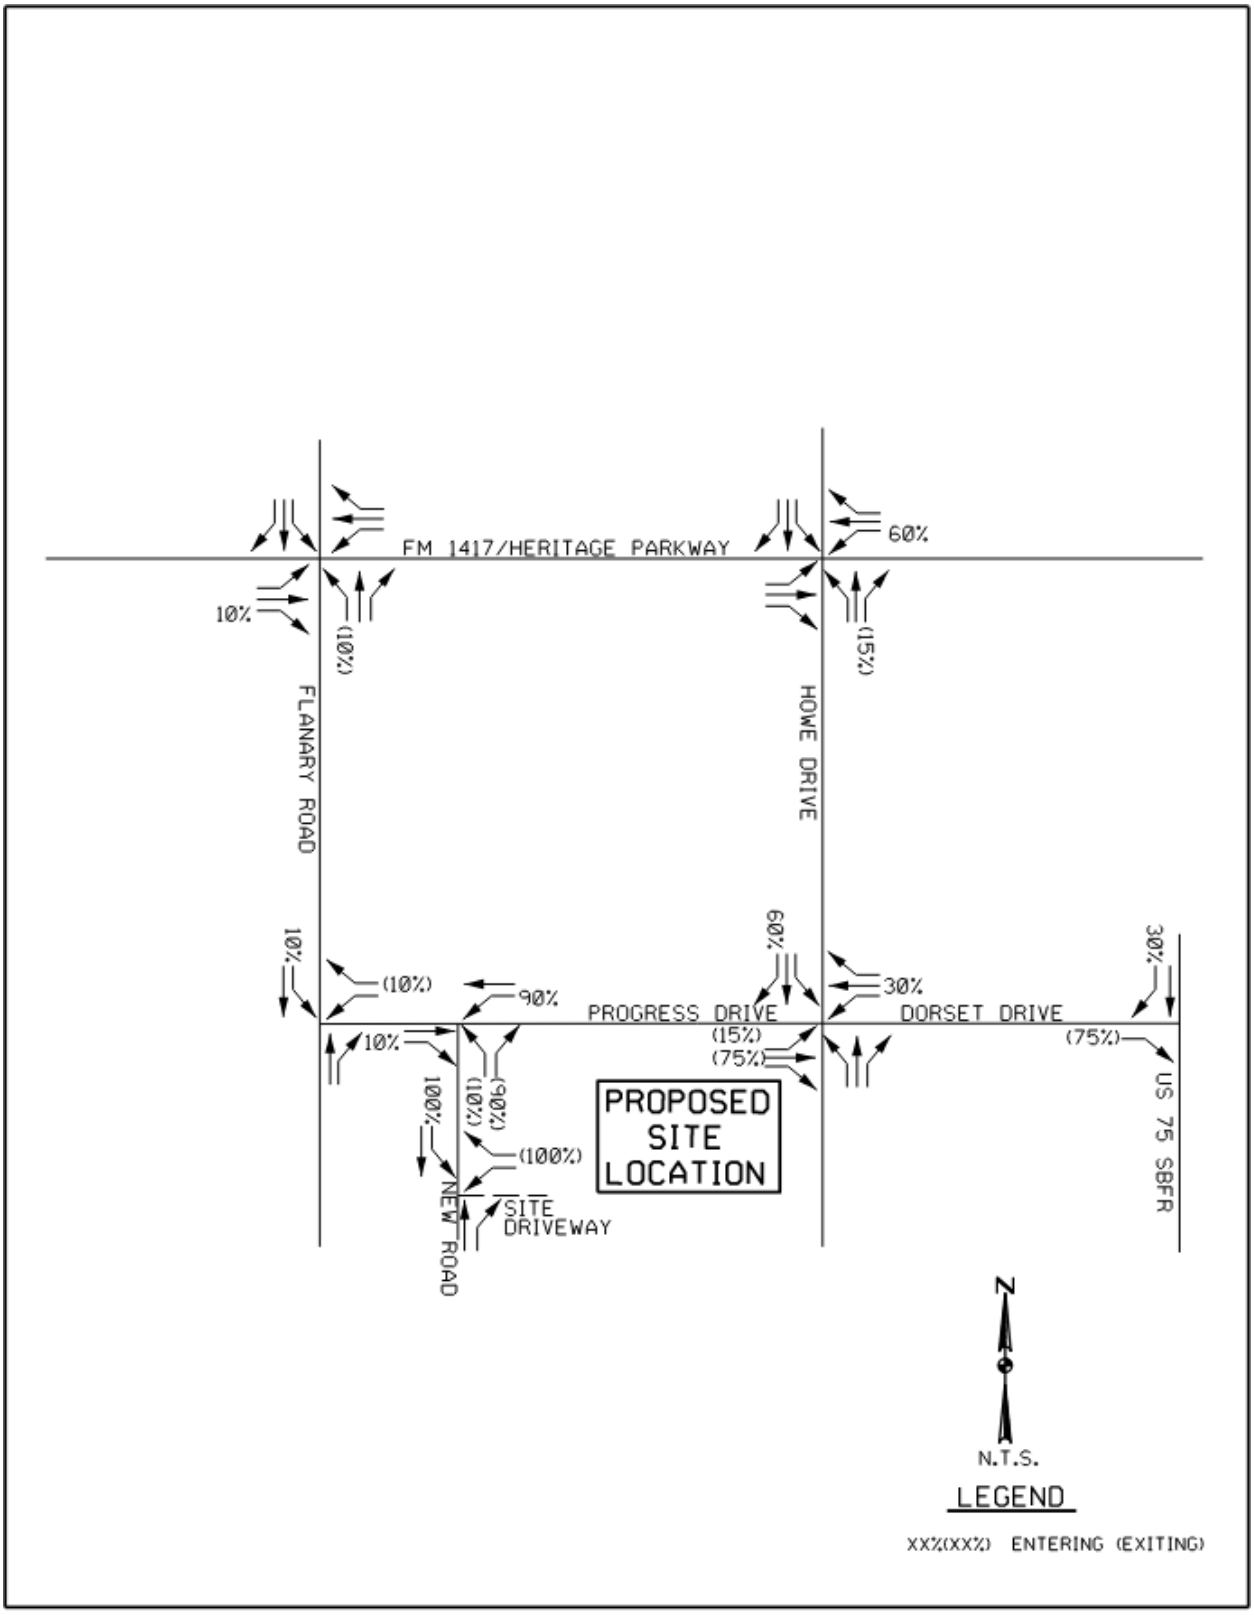

Figure 6: Proposed Site Trip Distribution

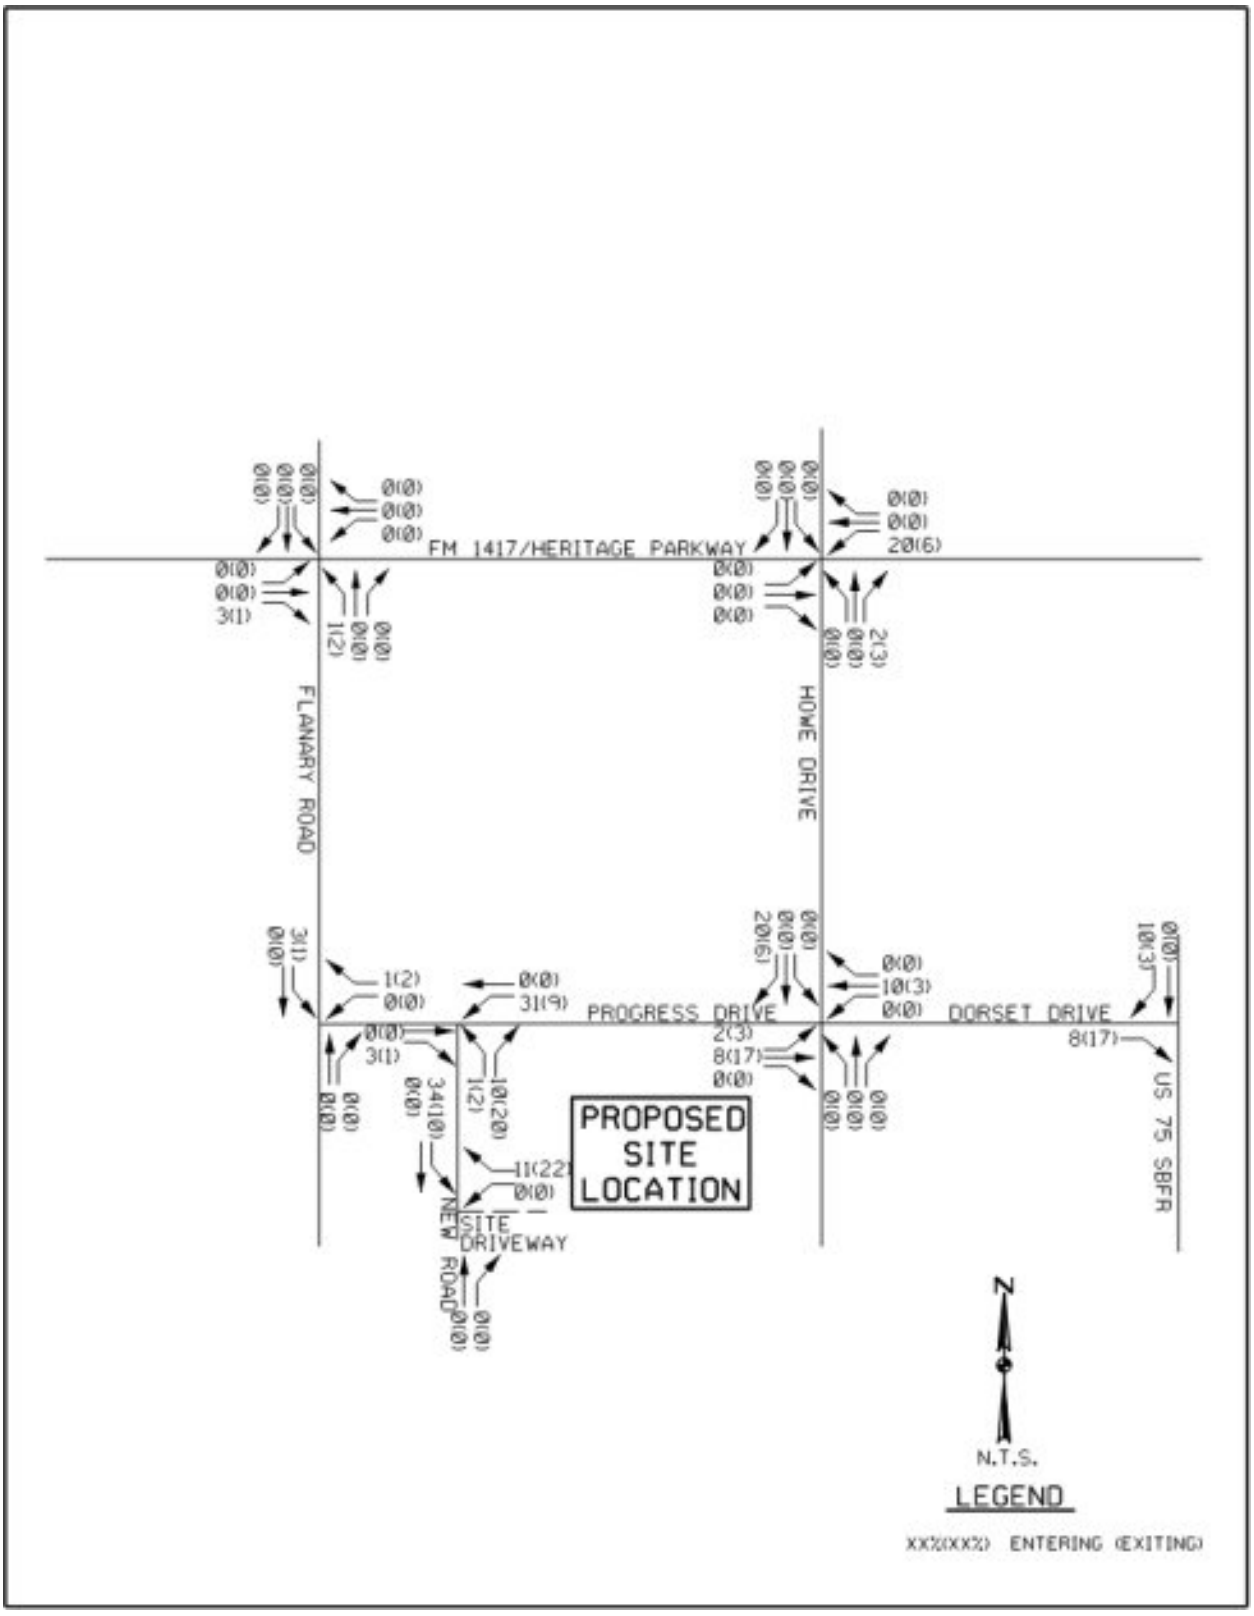

Figure 7: Proposed 2025 Site Traffic

3.3 Development of Background Traffic

To project the growth of existing traffic volumes, a growth rate of three percent was used. This growth rate is the annualized rate from the Texas Department of Transportation (TxDOT) Statewide Planning Map's historical Annual Average Daily Traffic (AADT) traffic volumes. The first component of background traffic was calculated by applying this growth rate to existing traffic volumes for two years.

Figure 8 shows the total AM peak hour and PM peak hour turning movements for each of the study intersections in the 2025 background conditions.

3.4 Development of Background Plus Site Traffic

The 2025 background plus site traffic was generated by adding proposed site traffic volumes from **Figure 7** to 2025 background traffic shown in **Figure 8**. Total 2025 background plus site traffic volumes are shown in **Figure 9**.

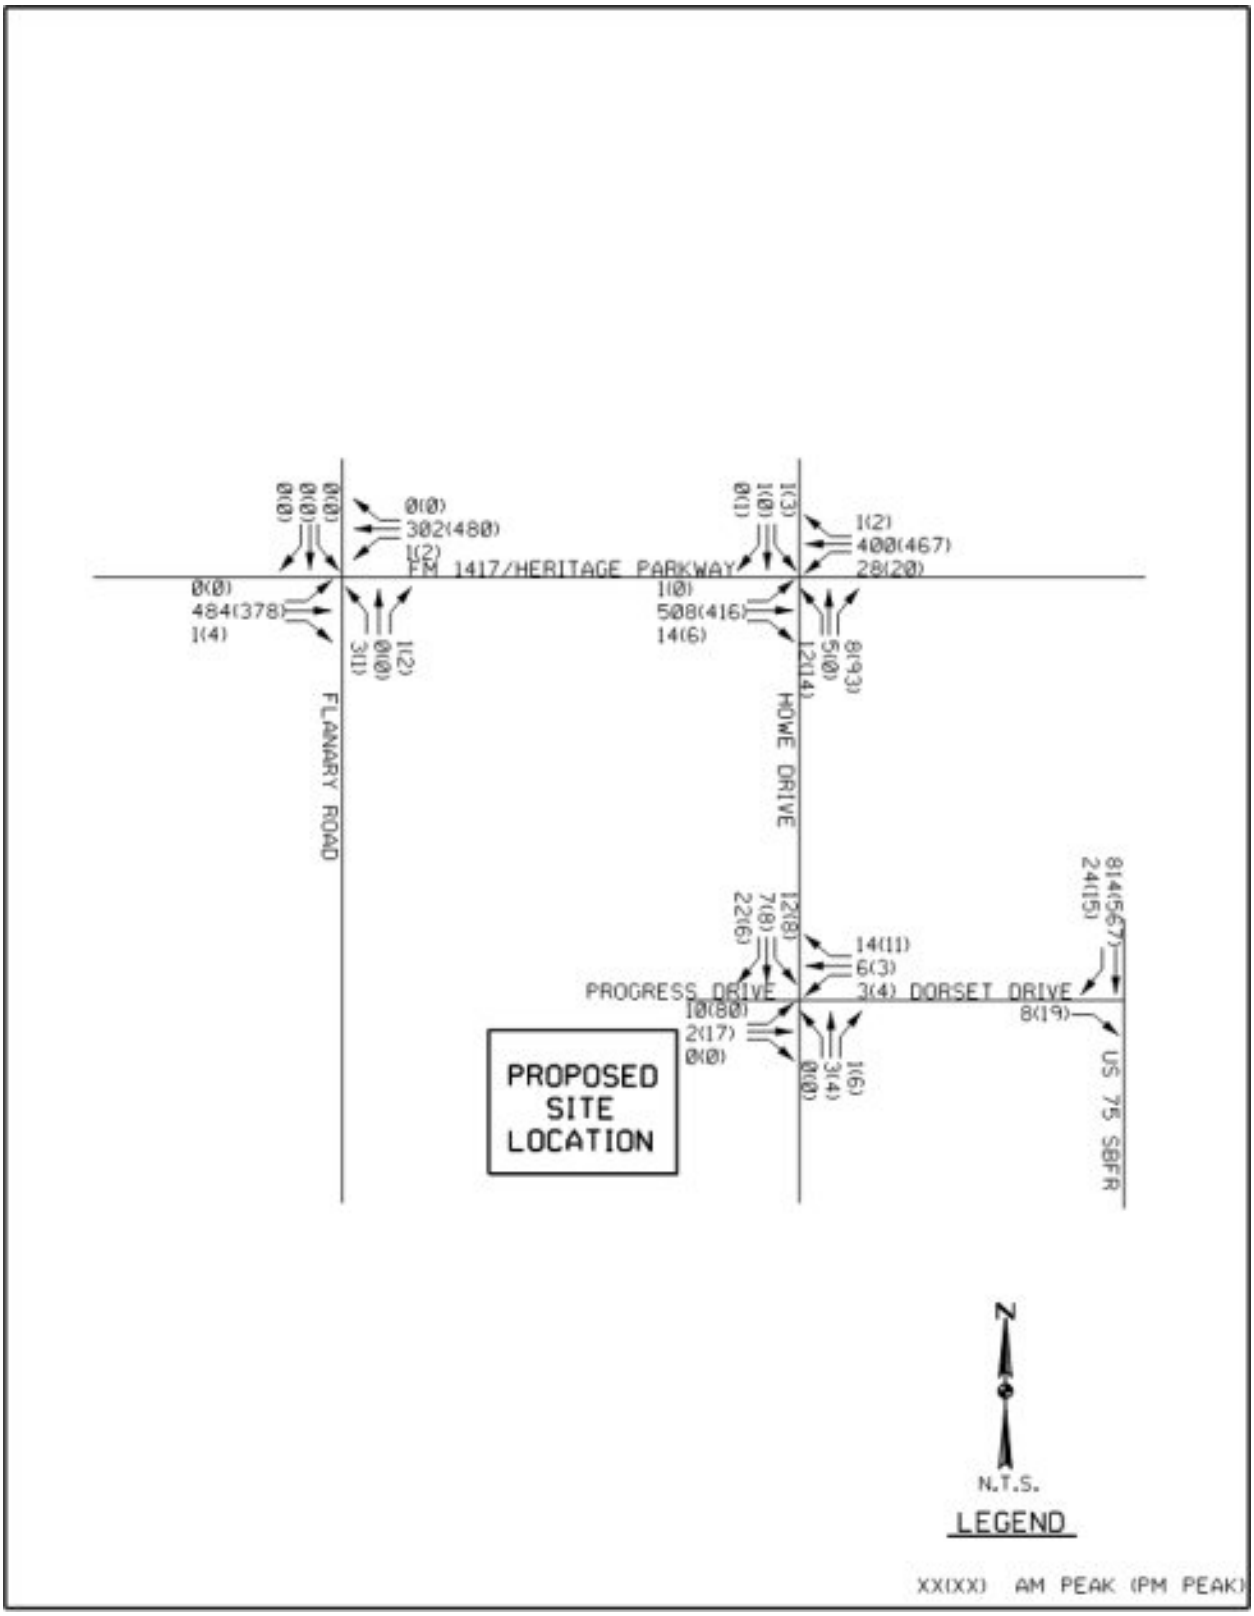

Figure 8: 2025 Background Traffic

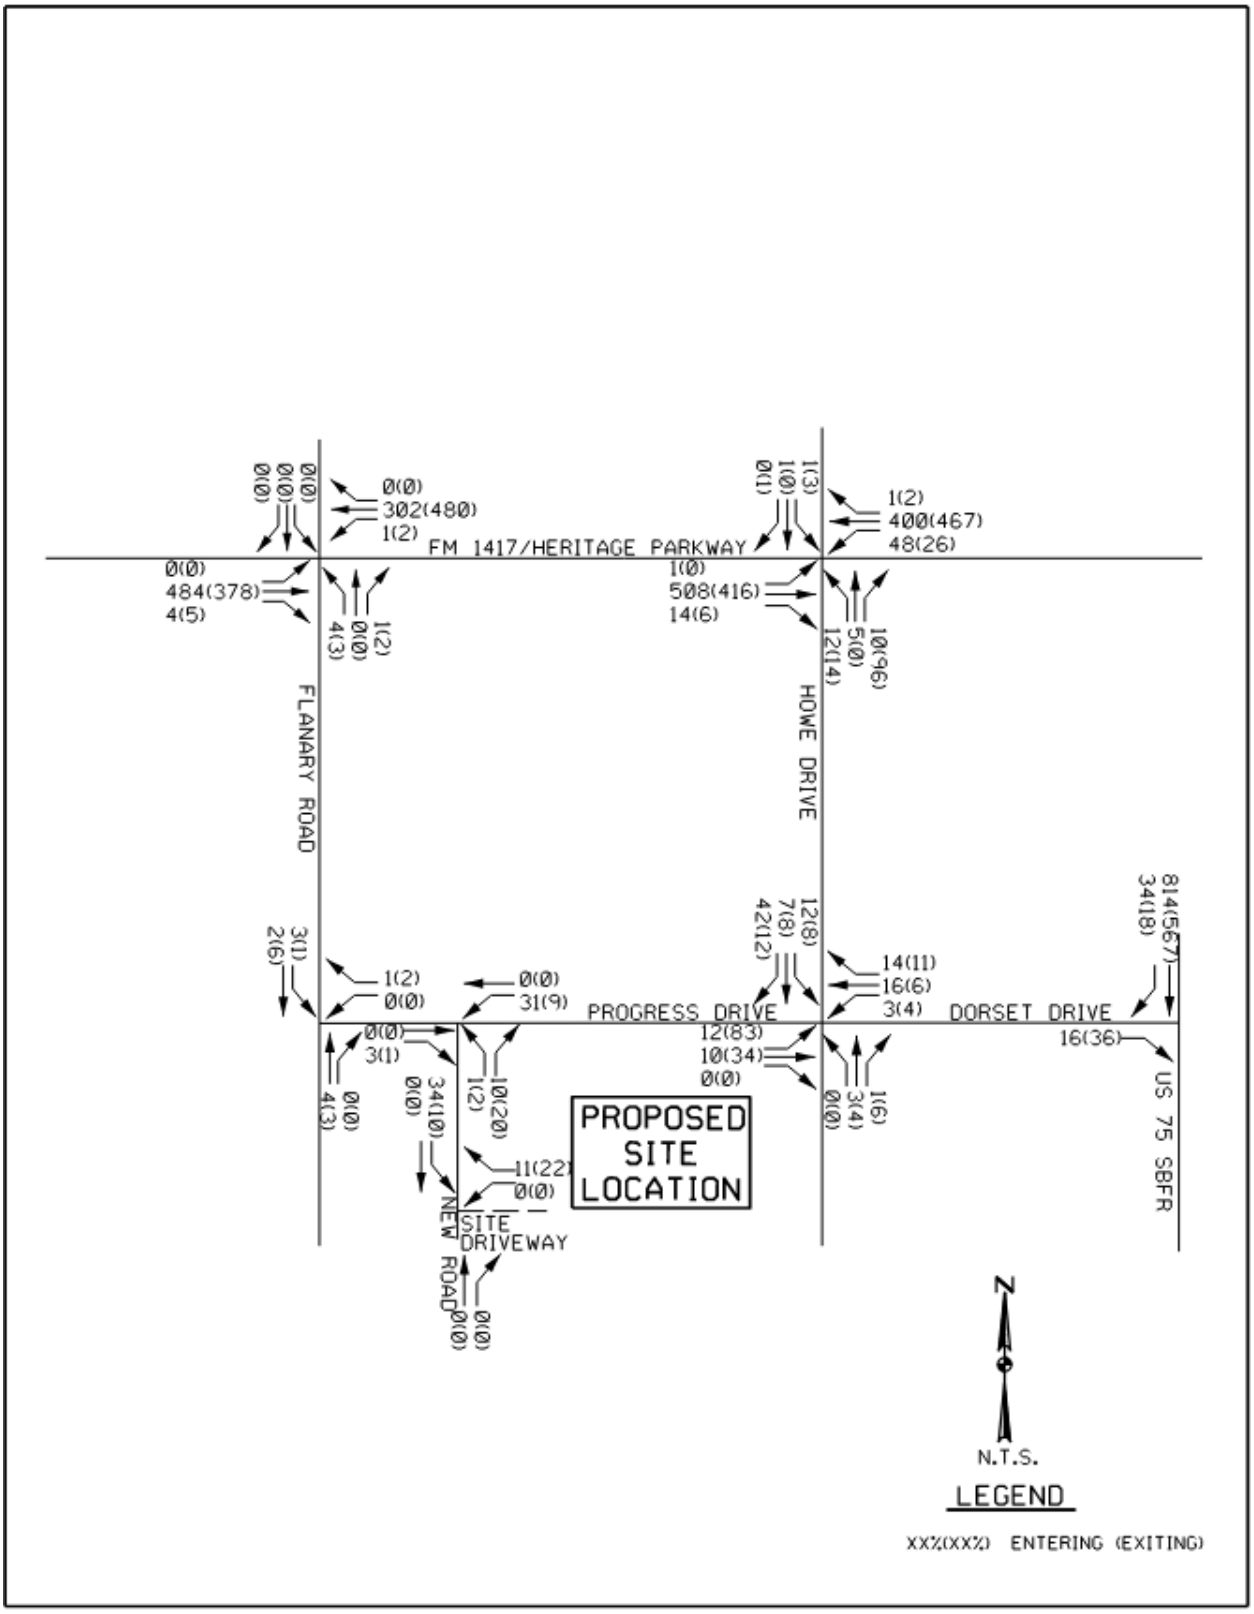

Figure 9: 2025 Background Plus Site Traffic

4.0 Traffic Operations Analysis

4.1 Intersection Capacity Analysis

4.1.1 Methodology

The results of a capacity analysis were defined in terms of Level of Service (LOS) based on the *Highway Capacity Manual, 6th Edition*. LOS is a qualitative measure used to describe the traffic conditions that a driver will experience while travelling along a particular roadway within a specified time interval. LOS is graded on a letter scale from "A" to "F." "A" represents little to no delay while "F" relates to long delays. Acceptable levels of service are "A" through "D." For an unsignalized intersection, "E" and "F" levels of service may be acceptable if the 95th percentile queue length is a reasonable length. **Table 2** shows level of service definitions for intersections according to the HCM.

Table 2: Intersection Level of Service Definitions

Level of Service	Unsignalized Intersection (seconds)	Signalized Intersection (seconds)
A	x≤ 10	x≤ 10
B	10<x≤15	10<x≤20
C	15<x≤25	20<x≤35
D	25<x≤35	35<x≤55
E	35<x≤50	55<x≤80
F	x>50	x>80

To account for heavy vehicle traffic adjacent to the site, Flanary Road, FM 1417/Heritage Parkway, and US 75 SBFR were analyzed with a heavy vehicle percentage of 6%. Other intersections internal to these roadways were analyzed with a heavy vehicle percentage of 40%. These percentages were based on heavy vehicle percentages recorded in traffic counts.

Capacity analysis was performed using the Synchro 11 software utilizing methods of the HCM. Results of this analysis are found below in **Table 3** for 2023 existing, **Table 4** for 2025 background, **Table 5** for 2025 background plus site conditions. Reports from the Synchro software are found in **Appendix D**.

4.1.2 2023 Existing Conditions

Table 5 shows that the southbound approach of FM 1417/Heritage Parkway at Howe Drive experienced level-of-service E in the PM peak hour in 2025 background plus site conditions. The delay was slightly increased compared to 2025 background conditions. However, this delay corresponded to very low traffic volumes, and queueing and volume-to-capacity ratio was low. A traffic signal was not warranted. Traffic signal warrant analysis is detailed in Section 4.3.

4.2 Roadway Capacity Analysis

4.2.1 Methodology

A roadway capacity analysis was performed for FM 1417/Heritage Parkway for the two-lane section between the intersections of Howe Drive and Flanary Road. The roadway capacity analysis was conducted based on the *Highway Capacity Manual, 7th Edition.* The analysis was a two-lane facility analysis and performed with Highway Capacity Software 2022.

FM 1417/Heritage Parkway was analyzed as a two-lane highway. For two-lane highways, the specified level of service thresholds are based on follower density. The level-of-service definitions are shown in **Table 6**.

Table 6: Two Lane Facility Level of Service Definitions

Level of Service	Follower Density (followers/mi)	
	Posted Speed Limit ≥ 50 mph	Posted Speed Limit < 50 mph

4.3 Traffic Signal Warrant Analysis

4.3.1 Methodology

A traffic signal warrant analysis was performed for the intersections of FM 1417/Heritage Parkway at Howe Drive. Traffic signal warrant analysis was performed for existing conditions and 2025 background plus site traffic in two-lane conditions. This traffic signal warrant was conducted based on the *Texas Manual on Uniform Traffic Control Devices* (TMUTCD). The TMUTCD provides the necessary requirements to warrant a traffic signal control.

The TMUTCD lists nine traffic signal warrants. These warrants and their inclusion in the warrant analysis are listed below.

- Warrant 1: Eight-Hour Vehicular Volume, applicable for analysis.
- Warrant 2: Four-Hour Vehicular Volume, applicable for analysis.
- Warrant 3: Peak Hour, applicable for analysis.
- Warrant 4: Pedestrian Volume, not applicable for analysis.

- Warrant 5: School Crossing, not applicable for analysis.
- Warrant 6: Coordinated Signal System, not applicable for analysis.
- Warrant 7: Crash Experience, applicable for analysis.
- Warrant 8: Roadway Network, not applicable for analysis.
- Warrant 9: Intersection Near a Grade Crossing, not applicable for analysis.

For this intersection, Warrant 1 – the eight hour warrant, Warrant 2 – the four hour warrant, Warrant 3 – the peak hour warrant, and Warrant 7 – the crash warrant was applied. Crash data from 2021 was analyzed. There is no major traffic generator in the proposed site, so Warrant 3 was only included for informational purposes. FM 1417/Heritage Parkway at Howe Drive does not warrant in existing conditions nor background plus site conditions as shown in **Table 10** and **Table 11.**

The full signal warrant analysis sheets can be found in **Appendix F**.

Table 10: Existing Conditions Signal Warrant Analysis

Intersection	Warrant 1: Eight-Hour Vehicular Volume	Warrant 2: Four-Hour Volume	Warrant 3: Peak Hour	Warrant 7: Crash Experience

5.0 Conclusions and Recommendations

This study analyzed the effects of the proposed development, Molinos USA-Lawrence, in Sherman, Texas on the surrounding roadway network. The Molinos USA-Lawrence development is planned to have 57,050 square feet of manufacturing use. The proposed site will generate 418 weekday trips, 45 AM peak hour trips, and 32 PM peak hour trips. The proposed site is expected to be completed in 2025.

This study analyzed the intersections of:

- FM 1417/Heritage Parkway at Flanary Road
- FM 1417/Heritage Parkway at Howe Drive
- Progress Drive/Dorset Drive at Howe Drive
- US 75 SBFR at Dorset Drive
- Flanary Road at Progress Drive
- New Road at Progress Drive
- New Road at Site Driveway

Existing traffic volumes were collected, and future volumes were projected. Intersection capacity and queue length analysis was performed for 2022 existing, 2025 background, and 2025 background plus site traffic conditions.

Intersection capacity was sufficient for all intersections except for FM 1417/Heritage Parkway at Howe Drive. The southbound approach experienced level-of-service E in the PM peak hour in 2025 background plus site conditions. However, this delay corresponded to very low traffic volumes, and queueing and volume-to-capacity ratio was low.

A signal warrant analysis was completed for the intersection of FM 1417/Heritage Parkway at Howe Drive. The intersection did not warrant a traffic signal in 2023 existing conditions nor 2025 background plus site conditions.

Two-lane facility analysis was performed for FM 1417/Heritage Parkway between Flanary Road and Howe Drive. This section experienced level-of-service C or better in all analysis cases.

REGIONAL COMMERCIAL

Intent & Character

The Regional Commercial category is intended to promote large-scale commercial development along US-75, while promoting community character through design. US-75 serves as the major gateway to and through the community; therefore, aesthetics and design should be promoted in this corridor. This category should allow large-scale commercial uses that serve the region and the community alike. A mix of uses and inter-connectivity between parcels should be encouraged.

Appropriate Land Use Types

- Retail and Restaurants
- Multi-Family Living
- Office Complex
- Medical
- Mixed Use
- Indoor Entertainment

Compatible Zoning Districts

- Retail Business
- General Commercial
- Office
- Multi-Family Residential (MF-15 and MF-30)
- Planned Development (for larger tracts)

Considerations

- Site design considerations should be given to parking, landscaping, and building articulation.
- Where possible, parking should be screened from view or well-landscaped with native, drought-tolerant plants.
- All buildings facades fronting a public street or within significant public view should have aesthetically-pleasing horizontal and vertical articulation.
- Signage should be multi-tenant, where possible, and should match the character of the primary structure.
- High density residential should be included in mixed use developments.
- High density residential is appropriate behind commercial areas, with inter-connectivity.
- If high density is stand alone, the surrounding uses and connectivity should be considered to avoid an "island."

TECHNOLOGY HUB

Intent & Character

The Technology Hub category is intended for areas of the community that are dedicated to large-scale employment uses. These areas are generally located north and south, anchored by the airport and Texas Instruments, respectively. These areas contribute to the community by providing a tax base and employment opportunities.

Appropriate Land Use Types

- Manufacturing
- Research and Development
- Warehousing and Distribution
- Multi-Family

Compatible Zoning Districts

- Light Manufacturing
- Heavy Manufacturing
- Multi-Family Residential (MF-15 and MF-30)

Considerations

- Multi-family uses can support employment uses and provide housing variety in the community. These uses should be integrated into planned developments.
- Industrial uses should be ones that are primarily operated inside.
- Outdoor storage should be limited and screened from public view.

RE: Meals on Wheels

2626 Hilltop Dr

Sherman, TX 75090

Fence Variance

It is the request of the Meals on Wheels project team to seek a variance to the perimeter fencing.

1. Seeking a variance for the installation of a ten (10') chain link fence to be constructed on the east, south and west sides of the property.
2. Seeking a variance for the installation of a six (6') ornamental fence in lieu of four (4') ornamental along Hilltop Drive.

Justification is that this property is not subject to use of the public. There is also security concerns with a homeless camp close proximity of the property. Also, there is various foot traffic on Hilltop from residents to the east.

Reference to General Zoning Ordinance 14A.7.13.d.3,5.

The project team respectfully request approval for these variances.

REGIONAL COMMERCIAL

Intent & Character

The Regional Commercial category is intended to promote large-scale commercial development along US-75, while promoting community character through design. US-75 serves as the major gateway to and through the community; therefore, aesthetics and design should be promoted in this corridor. This category should allow large-scale commercial uses that serve the region and the community alike. A mix of uses and inter-connectivity between parcels should be encouraged.

Appropriate Land Use Types

- Retail and Restaurants
- Multi-Family Living
- Office Complex
- Medical
- Mixed Use
- Indoor Entertainment

Compatible Zoning Districts

- Retail Business
- General Commercial
- Office
- Multi-Family Residential (MF-15 and MF-30)
- Planned Development (for larger tracts)

Considerations

- Site design considerations should be given to parking, landscaping, and building articulation.
- Where possible, parking should be screened from view or well-landscaped with native, drought-tolerant plants.
- All buildings facades fronting a public street or within significant public view should have aesthetically-pleasing horizontal and vertical articulation.
- Signage should be multi-tenant, where possible, and should match the character of the primary structure.
- High density residential should be included in mixed use developments.
- High density residential is appropriate behind commercial areas, with inter-connectivity.
- If high density is stand alone, the surrounding uses and connectivity should be considered to avoid an "island."

Jack in the Box – Sherman Crossing

Variance Request.

The proposed Jack in the Box that is being proposed to be developed within the Sherman Crossing development is requesting two variances to the development code.

Variance 1 – Building Setback (Southern Side)

Respectfully request that the side yard setback be reduced from 55.7 feet to 33.6'. This will allow for the building to be placed on the site and maintain a 10 car drive thru stack. During and post COVID the QSR market shifted most of the business running through the drive thru lane so being able to have a long drive thru stack is imperative to having a smooth customer experience with minimal back ups.

Variance 2 – Building Setback (West Side)

Respectfully request to have the rear or western setback reduced from the 55.7' setback to a 26.36' setback. This reduction will allow for the restaurant to install the menu board canopy structure that protects the patron from inclement weather while ordering food. The setback reduction is measured to the leading edge of the proposed structure at car #8.

Vertical Joints: Should be no higher than 8" on average or one large stone.

Horizontal Joints: Should not exceed 6' to 8'.

Sealing: Not required. However, if installed on an exterior exposed to excessive water from runoff or improper drainage, we suggest the product be sealed in that particular area to protect it from staining or spalling during freeze-thaw cycles.

Freeze-Thaw: When installing stone in a freeze-thaw environment, extra care should be taken to ensure a full coverage of mortar on the back of each stone, which will prevent water pooling behind the stone after it has been installed.

Drystacked: A polymer-modified mortar should be used for all drystacked applications.

Installation Info: Download Coronado's latest installation instructions at www.coronado.com for information on mortar and installation recommendations.

CORE NEIGHBORHOOD

Intent & Character

The Core Neighborhood category is intended to protect and enhance the existing residential areas of Sherman. This area is generally located in the center of the city, east and west of US-75. A majority of the Core Neighborhood category encompasses what is known as east Sherman. This category encourages infill development that maintains the existing character, while increasing the aesthetic appeal of the community. In certain areas, an increase in density can be appropriate through the development of single-family attached products, like townhomes or quad-plexes.

Appropriate Land Use Types

- Single-family detached
- Single-family attached
- Local/neighborhood commercial and office
- Parks and open space
- Schools and civic uses

Compatible Zoning Districts

- Single-Family Residential (R-5, R-4, R-2F, and R-TH)
- Multi-Family Residential (MF-15 and MF-30)
- Manufactured Housing
- Retail Business
- Neighborhood Commercial

Considerations

- Infill that increases density should match the character of the surrounding structures.
- Small-scale commercial uses are appropriate along larger streets and should be compatible with the surrounding residential development.

Re: Temporary Use Permit
Sherman GlobalWafers Temporary Concrete Batch Plant
Holcim-SOR, Inc.

To Whom It May Concern:

Holcim-SOR, Inc. (Holcim) is applying for a Temporary Use Permit for a temporary concrete batch plant. The batch plant will operate at 3200 Northgate Drive in Sherman, Texas. The batch plant will be operated in support of the GlobalWafers development. Holcim is contracted by Austin Commercial, LP to supply concrete to the construction project.

A TCEQ Permit Authorization is forthcoming. The project is intended to last up to 12 months, depending on the construction project. Hours of operation are dependent on the contractor's request for concrete to meet project demands. Upon completion of the project, the batch plant will be dismantled and removed from the site with appropriate restoration as required by future construction project use.

In support of this request, Holcim has attached the Development Application Checklist, the Zoning Application, the current Deed for the property, a Site Plan and Elevations.

Please do not hesitate to contact the undersigned for further assistance, if necessary.

Board of Adjustment

A. Public Hearing and Variance under Section 14.02.018(1) to allow a 16.4' side setback in lieu of the required 25' for an existing structure and an addition to the existing structure on the north side of the property in an M-1 (Light Manufacturing) District.
B. Public Hearing and Variance under Section 14.02.018(1) to allow a 23.9' side setback in lieu of the required 25' for an existing structure on the south side of the property in an M-1 (Light Manufacturing) District.

Planning and Zoning Commission

D. Final Plat of Double D Machining Addition
E. Site Plan of Double D Machining Addition

Background:

The property is located at 2513 South First Street near the intersection of East Ida Road and South First and is zoned M-1 (Light Manufacturing) District.

The owner is requesting the following:

- A Variance for side setbacks to an existing structure and an addition to the existing structure to store material from the weather as well as a Variance to allow a gravel parking lot with concrete

entry way from the road to the fence line of property.
- Final Plat and Site Plan of Double D Machining Addition.

The following has been approved for this location:

- October 13, 1998 - Zone Change from R-1 (One Family Residential) District to M-1 (Light Manufacturing) District

Adjacent Zoning:

R-6 (Single Family Residential)

Origination:

Dylan Garza (Owner)
Helvey-Wagner Surveying (Surveyor)

Master Plan Designation:

Suburban Neighborhood category is intended to allow primarily single-family detached in a "complete neighborhood" setting. New subdivisions should include a mix of housing products and lot sizes. Areas of supporting local commercial should be integrated into the neighborhoods, primarily along major streets near the entrance of neighborhoods. Community amenities such as parks, trails, open spaces, and civic uses should also be included in the creation of new subdivisions. This category gives flexibility for the creation of master-planned neighborhoods that are compatible with the surrounding area.

Project Narrative

Ref: Replat of Lot 4, Block 7, BH Moore Heirs Addition, City of Sherman, Texas, located at 300 W. Moore Street, Sherman, Texas

I own the property listed hereinabove under the name of COHO Real Estate, LLC. I am requesting variances for 3 lots as follows:

1. A variance for 3 lots (Lots 4R-A, 4R-B & 4R-C) to be 96 ft. depth in lieu of the 100 ft. depth requirement. This is due to the current platted lot width (along Moore Street) being only 98 ft. and a 2 ft. wide strip to be dedicated for right-of-way purposes along Elm Street to meet the 50 ft. wide right-of-way requirement per the Throughfare Plan.
2. A variance for 2 lots (4R-B & 4R-C) being less than 6,000 sq. ft. due to the current platted lot width being less than 100 ft. Both lots will have the full 60 ft. frontage and are 5,760 Sq. Ft., only 270 Sq. Ft. less than the area requirement.

My overall plan for this property is to demolish the existing house located at the corner and build 3 new single-family residences.

Kindest Regards,

Corby Hosea

We would like to voice our objection to the variance requested for the above referenced property to divide it into three lots. This variance would set a bad precedent for the neighborhood as it creates lots which would appear to be much smaller than the surrounding lots. The S. Crockett and S. Elm areas have been improving over the last several years and this would be a step back. Lots and the houses built on those lots would likely be built for rental use and not ownership. Over time this would deteriorate much like the existing house on the lots. I would assume three houses facing Elm St. on lots of the proposed size would create parking on the street which is already a problem.

We intend to attend the meeting but wanted our objection noted in case we could not attend.

Thank you for your consideration.

PROJECT NARRATIVE – WHATABURGER AT SHERMAN CROSSROADS

TO: CITY OF SHERMAN BOARD OF ADJUSTMENT **DATE: 01/24/2023**

FROM: PAPE DAWSON ENGINEERS

A variance is being requested to the zoning ordinance regarding the proposed Whataburger within the Sherman Crossroads development, which is part of the Blalock commercial overlay district. The 55.7' building setback requirement listed within the zoning ordinance do not suit the proposed use of the site or the lot size. It is not feasible to provide adequate parking, trash storage and pickup, drive-through service, and a suitable building with the requirements currently in place.

The attached site plan details the proposed development site layout and shows why the variance is required. Several adjacent sites have been granted similar requests regarding deviations from the building setback requirements for this overlay district. It is our intent to match the neighboring developments and maintain the consistency of the overall development.

Thank you,

Kevin Murphy, P. E.
Project Engineer

METHODS

A. SOIL PREPARATION
   1. BEFORE STARTING WORK, THE LANDSCAPE CONTRACTOR SHALL VERIFY THAT THE GRADE OF ALL LANDSCAPE AREAS ARE WITHIN +/-0.1' OF FINISH GRADE. THE CONTRACTOR SHALL NOTIFY THE OWNER IMMEDIATELY SHOULD ANY DISCREPANCIES EXIST.
   2. SOIL TESTING:
      a. AFTER FINISH GRADES HAVE BEEN ESTABLISHED, CONTRACTOR SHALL HAVE SOIL SAMPLES TESTED BY AN ESTABLISHED SOIL TESTING LABORATORY FOR THE FOLLOWING: SOIL TEXTURAL CLASS, GENERAL SOIL FERTILITY, pH, ORGANIC MATTER CONTENT, SALT (CEC), LIME, SODIUM ADSORPTION RATIO (SAR) AND BORON CONTENT. EACH SAMPLE SUBMITTED SHALL CONTAIN NO LESS THAN ONE QUART OF SOIL.
      b. CONTRACTOR SHALL ALSO SUBMIT THE PROJECT'S PLANT LIST TO THE LABORATORY ALONG WITH THE SOIL SAMPLES.
      c. THE SOIL REPORT PRODUCED BY THE LABORATORY SHALL CONTAIN RECOMMENDATIONS FOR THE FOLLOWING (AS APPROPRIATE): GENERAL SOIL PREPARATION AND BACKFILL MIXES, PRE-PLANT FERTILIZER APPLICATIONS, AND ANY OTHER SOIL RELATED ISSUES. THE REPORT SHALL ALSO PROVIDE A FERTILIZER PROGRAM FOR THE ESTABLISHMENT PERIOD AND FOR LONG-TERM MAINTENANCE.
   3. THE CONTRACTOR SHALL INSTALL SOIL AMENDMENTS AND FERTILIZERS PER THE SOILS REPORT RECOMMENDATIONS. ANY CHANGE IN COST DUE TO THE SOIL REPORT RECOMMENDATIONS, EITHER INCREASE OR DECREASE, SHALL BE SUBMITTED TO THE OWNER WITH THE REPORT.
   4. FOR BIDDING PURPOSES ONLY, THE SOIL PREPARATION SHALL CONSIST OF THE FOLLOWING:
      a. TURF: INCORPORATE THE FOLLOWING AMENDMENTS INTO THE TOP 8" OF SOIL BY MEANS OF ROTOTILLING AFTER CROSS-RIPPING:
         i. NITROGEN STABILIZED ORGANIC AMENDMENT - 4 CU. YDS. PER 1,000 S.F.
         ii. AMMONIUM PHOSPHATE 16-20-0 - 15 LBS PER 1,000 S.F.
         iii. AGRICULTURAL GYPSUM - 100 LBS PER 1,000 S.F.
      b. TREES, SHRUBS, AND PERENNIALS: INCORPORATE THE FOLLOWING AMENDMENTS INTO THE TOP 8" OF SOIL BY MEANS OF ROTOTILLING AFTER CROSS-RIPPING:
         i. NITROGEN STABILIZED ORGANIC AMENDMENT - 4 CU. YDS. PER 1,000 S.F.
         ii. 12-12-12 FERTILIZER - 10 LBS. PER CU. YD.
         iii. AGRICULTURAL GYPSUM - 10 LBS. PER CU. YD.
         iv. IRON SULPHATE - 2 LBS. PER CU. YD.
   5. CONTRACTOR SHALL ENSURE THAT THE GRADE IN SOD AREAS SHALL BE 1" BELOW FINISH GRADE BEFORE INSTALLING SOIL AMENDMENTS, AND 2" BELOW FINISH GRADE IN SHRUB AREAS BEFORE INSTALLING SOIL AMENDMENTS. MULCH COVER WITHIN 6" OF CONCRETE WALKS AND CURBS SHALL NOT PROTRUDE ABOVE THE FINISH SURFACE OF THE WALKS AND CURBS. MULCH COVER WITHIN 12" OF WALLS SHALL BE AT LEAST 3" LOWER THAN THE TOP OF WALL.
   6. ONCE SOIL PREPARATION IS COMPLETE, THE LANDSCAPE CONTRACTOR SHALL ENSURE THAT THERE ARE NO DEBRIS, TRASH, OR STONES LARGER THAN 1" REMAINING IN THE TOP 6" OF SOIL.

B. GENERAL PLANTING
   1. REMOVE ALL NURSERY TAGS AND STAKES FROM PLANTS.
   2. EXCEPT IN AREAS TO BE PLANTED WITH ORNAMENTAL GRASSES, APPLY PRE-EMERGENT HERBICIDES AT THE MANUFACTURER'S RECOMMENDED RATE.
   3. TRENCHING NEAR EXISTING TREES:
      a. CONTRACTOR SHALL NOT DISTURB ROOTS 1-1/2" AND LARGER IN DIAMETER WITHIN THE CRITICAL ROOT ZONE (CRZ) OF EXISTING TREES, AND SHALL EXERCISE ALL POSSIBLE CARE AND PRECAUTIONS TO AVOID INJURY TO TREE ROOTS, TRUNKS, AND BRANCHES. THE CRZ IS DEFINED AS A CIRCULAR AREA EXTENDING OUTWARD FROM THE TREE TRUNK, WITH A RADIUS EQUAL TO 1' FOR EVERY 1" OF TRUNK DIAMETER-AT-BREAST-HEIGHT (4.5' ABOVE THE AVERAGE GRADE AT THE TRUNK).
      b. ALL EXCAVATION WITHIN THE CRZ SHALL BE PERFORMED USING HAND TOOLS. NO MACHINE EXCAVATION OR TRENCHING OF ANY KIND SHALL BE ALLOWED WITHIN THE CRZ.
      c. ALTER ALIGNMENT OF PIPE TO AVOID TREE ROOTS 1-1/2" AND LARGER IN DIAMETER. WHERE TREE ROOTS 1-1/2" AND LARGER IN DIAMETER ARE ENCOUNTERED IN THE FIELD, TUNNEL UNDER SUCH ROOTS. WRAP EXPOSED ROOTS WITH SEVERAL LAYERS OF BURLAP AND KEEP MOIST. CLOSE ALL TRENCHES WITHIN THE CANOPY DRIP LINES WITHIN 24 HOURS.
      d. ALL SEVERED ROOTS SHALL BE HAND PRUNED WITH SHARP TOOLS AND ALLOWED TO AIR-DRY. DO NOT USE ANY SORT OF SEALERS OR WOUND PAINTS.
C. TREE PLANTING
   1. TREE PLANTING HOLES SHALL BE EXCAVATED TO MINIMUM WIDTH OF TWO TIMES THE WIDTH OF THE ROOTBALL, AND TO A DEPTH EQUAL TO THE DEPTH OF THE ROOTBALL LESS TWO TO FOUR INCHES.
   2. SCARIFY THE SIDES AND BOTTOM OF THE PLANTING HOLE PRIOR TO THE PLACEMENT OF THE TREE. REMOVE ANY GLAZING THAT MAY HAVE BEEN CAUSED DURING THE EXCAVATION OF THE HOLE.
   3. FOR CONTAINER AND BOX TREES, TO REMOVE ANY POTENTIALLY GIRDLING ROOTS AND OTHER ROOT DEFECTS, THE CONTRACTOR SHALL SHAVE A 1" LAYER OFF OF THE SIDES AND BOTTOM OF THE ROOTBALL OF ALL TREES JUST BEFORE PLACING INTO THE PLANTING PIT. DO NOT "TEASE" ROOTS OUT FROM THE ROOTBALL.
   4. INSTALL THE TREE ON UNDISTURBED SUBGRADE SO THAT THE TOP OF THE ROOTBALL IS TWO TO FOUR INCHES ABOVE THE SURROUNDING GRADE.
   5. BACKFILL THE TREE HOLE UTILIZING THE EXISTING TOPSOIL FROM ON-SITE. ROCKS LARGER THAN 1" DIA. AND ALL OTHER DEBRIS SHALL BE REMOVED FROM THE SOIL PRIOR TO THE BACKFILL. SHOULD ADDITIONAL SOIL BE REQUIRED TO ACCOMPLISH THIS TASK, USE STORED TOPSOIL FROM ON-SITE OR IMPORT ADDITIONAL TOPSOIL FROM OFF-SITE AT NO ADDITIONAL COST TO THE OWNER. IMPORTED TOPSOIL SHALL BE OF SIMILAR TEXTURAL CLASS AND COMPOSITION IN THE ON-SITE SOIL.
   6. THE TOTAL NUMBER OF TREE STAKES (BEYOND THE MINIMUMS LISTED BELOW) WILL BE LEFT TO THE LANDSCAPE CONTRACTOR'S DISCRETION. SHOULD ANY TREES FALL OR LEAN, THE LANDSCAPE CONTRACTOR SHALL STRAIGHTEN THE TREE, OR REPLACE IT SHOULD IT BECOME DAMAGED. TREE STAKING SHALL ADHERE TO THE FOLLOWING GUIDELINES:

a.	1"-2" TREES	TWO STAKES PER TREE
b.	2-1/2"-4" TREES	THREE STAKES PER TREE
c.	TREES OVER 4" CALIPER	GUY AS NEEDED
d.	MULTI-TRUNK TREES	THREE STAKES PER TREE MINIMUM, QUANTITY AND POSITIONS AS NEEDED TO STABILIZE THE TREE

   7. UPON COMPLETION OF PLANTING, CONSTRUCT AN EARTH WATERING BASIN AROUND THE TREE. COVER THE INTERIOR OF THE TREE RING WITH THE WEED BARRIER CLOTH AND TOPDRESS WITH MULCH (TYPE AND DEPTH PER PLANS).
D. SHRUB, PERENNIAL, AND GROUNDCOVER PLANTING
   1. DIG THE PLANTING HOLES TWICE AS WIDE AND 2" LESS DEEP THAN EACH PLANT'S ROOTBALL. INSTALL THE PLANT IN THE HOLE. BACKFILL AROUND THE PLANT WITH SOIL AMENDED PER SOIL TEST RECOMMENDATIONS.
   2. INSTALL THE WEED BARRIER CLOTH, OVERLAPPING IT AT THE ENDS. UTILIZE STEEL STAPLES TO KEEP THE WEED BARRIER CLOTH IN PLACE.
   3. WHEN PLANTING IS COMPLETE, INSTALL MULCH (TYPE AND DEPTH PER PLANS) OVER ALL PLANTING BEDS, COVERING THE ENTIRE PLANTING AREA.
E. SODDING
   1. SOD VARIETY TO BE AS SPECIFIED ON THE LANDSCAPE PLAN.
   2. LAY SOD WITHIN 24 HOURS FROM THE TIME OF STRIPPING. DO NOT LAY IF THE GROUND IS FROZEN.
   3. LAY THE SOD TO FORM A SOLID MASS WITH TIGHTLY FITTED JOINTS. BUTT ENDS AND SIDES OF SOD STRIPS - DO NOT OVERLAP. STAGGER STRIPS TO OFFSET JOINTS IN ADJACENT COURSES.
   4. ROLL THE SOD TO ENSURE GOOD CONTACT OF THE SOD'S ROOT SYSTEM WITH THE SOIL UNDERNEATH.
   5. WATER THE SOD THOROUGHLY WITH A FINE SPRAY IMMEDIATELY AFTER PLANTING TO OBTAIN AT LEAST SIX INCHES OF PENETRATION INTO THE SOIL BELOW THE SOD.
F. CLEAN UP
   1. DURING LANDSCAPE PREPARATION AND PLANTING, KEEP ALL PAVEMENT CLEAN AND ALL WORK AREAS IN A NEAT, ORDERLY CONDITION.
   2. DISPOSED LEGALLY OF ALL EXCAVATED MATERIALS OFF THE PROJECT SITE.
G. INSPECTION AND ACCEPTANCE
   1. UPON COMPLETION OF THE WORK, THE LANDSCAPE CONTRACTOR SHALL PROVIDE THE SITE CLEAN, FREE OF DEBRIS AND TRASH, AND SUITABLE FOR USE AS INTENDED. THE LANDSCAPE CONTRACTOR SHALL THEN REQUEST AN INSPECTION BY THE OWNER TO DETERMINE FINAL ACCEPTABILITY.
   2. WHEN THE INSPECTED PLANTING WORK DOES NOT COMPLY WITH THE CONTRACT DOCUMENTS, THE LANDSCAPE CONTRACTOR SHALL REPLACE AND/OR REPAIR THE REJECTED WORK TO THE OWNER'S SATISFACTION WITHIN 24 HOURS.
   3. THE LANDSCAPE WARRANTY PERIOD WILL NOT COMMENCE UNTIL THE LANDSCAPE WORK HAS BEEN RE-INSPECTED BY THE OWNER AND FOUND TO BE ACCEPTABLE. AT THAT TIME, A WRITTEN NOTICE OF FINAL ACCEPTANCE WILL BE ISSUED BY THE OWNER, AND THE WARRANTY PERIOD WILL COMMENCE.
H. PLANT GUARANTEE AND REPLACEMENTS
   1. THE LANDSCAPE CONTRACTOR SHALL GUARANTEE ALL TREES, SHRUBS, PERENNIALS, SOD, SEEDED/HYDROMULCHED AREAS, AND IRRIGATION SYSTEMS FOR A PERIOD OF ONE YEAR FROM THE DATE OF THE OWNER'S FINAL ACCEPTANCE (90 DAYS FOR ANNUAL PLANTS). THE CONTRACTOR SHALL REPLACE, AT HIS OWN EXPENSE AND TO THE SATISFACTION OF THE OWNER, ANY PLANTS WHICH DIE IN THAT TIME, OR REPAIR ANY PORTIONS OF THE IRRIGATION SYSTEM WHICH OPERATE IMPROPERLY.
   2. DURING THE GUARANTEE PERIOD, THE LANDSCAPE CONTRACTOR SHALL ONLY BE RESPONSIBLE FOR REPLACEMENT OF PLANTS WHEN PLANT DEATH CANNOT BE ATTRIBUTED DIRECTLY TO OVERWATERING OR OTHER DAMAGE BY HUMAN ACTIONS.
I. PROVIDE A MINIMUM OF (2) COPIES OF RECORD DRAWINGS TO THE OWNER UPON COMPLETION OF WORK. A RECORD DRAWING IS A RECORD OF ALL CHANGES THAT OCCURRED IN THE FIELD AND THAT ARE DOCUMENTED THROUGH CHANGE ORDERS, ADDENDA, OR CONTRACTOR/CONSULTANT DRAWING MARKUPS.

NOTE: ALL PLANTS SHALL BE PLANTED AT EQUAL TRIANGULAR SPACING (EXCEPT WHERE SHOWN ON PLANS AS INFORMAL GROUPINGS). REFER TO PLANT LEGEND FOR SPACING DISTANCE BETWEEN PLANTS.

1) STEP 1: DETERMINE TOTAL PLANTS FOR THE AREA WITH THE FOLLOWING FORMULA:
TOTAL AREA / AREA DIVIDER = TOTAL PLANTS

PLANT SPACING	AREA DIVIDER	PLANT SPACING	AREA DIVIDER
6"	0.22	18"	1.95
8"	0.39	24"	3.46
10"	0.60	30"	5.41
12"	0.87	36"	7.79
15"	1.35		

2) STEP 2: SUBTRACT THE ROW (S) OF PLANTS THAT WOULD OCCUR AT THE EDGE OF THE PLANTED AREA WITH THE FOLLOWING FORMULA: TOTAL PERIMETER LENGTH / PLANT SPACING = TOTAL PLANT SUBTRACTION

EXAMPLE: PLANTS AT 18" O.C. IN 100 SF PLANTING AREA, 40 LF PERIMETER
STEP 1: 100 SF/1.95 = 51 PLANTS
STEP 2: 51 PLANTS - (40 LF / 1.95 = 21 PLANTS) = 30 PLANTS TOTAL

The Core Neighborhood category is intended to protect and enhance the existing residential areas of Sherman. This area is generally located in the center of the city, east and west of US-75. A majority of the Core Neighborhood category encompasses what is known as east Sherman. This category encourages infill development that maintains the existing character, while increasing the aesthetic appeal of the community. - Single-family attached
- Local/neighborhood commercial and office
- Parks and open space

Compatible Zoning Districts

- Single-Family Residential (R-5, R-4, R-2F, and R-TH)
- Multi-Family Residential (MF-15 and MF-30)
- Manufactured Housing
- Retail Business
- Neighborhood Commercial

Considerations

- Infill that increases density should match the character of the surrounding structures.
- Small-scale commercial uses are appropriate along larger streets and should be compatible with the surrounding residential development.

Re: The Hills of Sherman Rezoning

Dear Mr. Rae:

My client, AJH Enterprises, LTD. has purchased approximately 133 acres along the south side of US 81, between Rex Cruse Drive and Hickory Street in Sherman. The owner's intent is to develop approximately 48 acres of the property as R-5 (single family zoning) district. The current property is zoned as R-6 and will require a rezone to R-5. The subject property had a preliminary plat (The Hills of Sherman) submitted last May. It is our goal to change direction from a patio home (PH) specific use permit and comply with the city's recently updated zoning district R-5. We would appreciate your assistance and support in this rezoning process. Project details are listed below:

- 48 acres
- Existing zoning is R-6
- Rezone to R-5

Thank you in advance for your consideration of this rezoning request. Please contact me if you have any questions or concerns.

Sincerely,

To Whom It May Concern:

Please consider this letter my formal opposition to the above request to change zoning. I live in the direct path of the storm water flow of the above mentioned property. I have attached a video of the current flow of a gentle rain occurring this very morning. The video is from my back yard's view of the current storm drain. As you can see, even a gentle rain causes quite a flow behind my home.

I have very serious flooding concerns associated with the proposed housing development. There does not seem to be adequate planning for the additional storm water problems that will be caused by this development.

The current drainage culvert behind my home is already inadequate. My driveway and garage flood on a regular basis. This proposal is unacceptable unless it includes major storm water planning. Please consider our beautiful, long-established neighborhood as you plan for growth in our area.

I appreciate your consideration.

Members of the Board of Adjustment

I write in opposition to re-zoning and construction that does not provide adequate protection from stormwater flooding. We have lived at 2810 Yorkshire Drive for more than 50 years. The city made mistakes in allowing recent development around our neighborhood without adequate stormwater planning that has caused flooding events to become much more frequent in the past few years.

The water flow from the acreage under consideration (as well as tracts that might follow) will reduce water absorption and thereby create additional runoff. The runoff will flow to the culvert under Yorkshire Drive between Devonshire Drive and Windsor Drive.

That culvert has limited capacity. Recent property development north and northeast of the intersection of North Ricketts Street and Yorkshire Drive has caused water to backup and overflow onto properties' back yards on Yorkshire Drive and Windsor Drive. It has also caused flooding into the garage of the house at 2810 Devonshire Drive.

Stormwater from the subject property needs to be either redirected to the stream bed that runs east of North Travis and flows south into larger culverts. The stormwater might also be captured and stored on the subject property with either a retention basis or a detention basin to moderate the flow rate downstream as it is redirected to the stream bed on the east side of North Travis.

The zoning change request will increase the development density and create higher water runoff rates and volumes if allowed as requested. The request must be denied as submitted and only considered once adequate stormwater runoff planning has occurred.

This letter is in response to your February 2 letter to me and reflects the comments I would make at the February 21 meeting if I were able to attend that meeting.

Thank you for your consideration.

- Indoor Entertainment

Compatible Zoning Districts

- Retail Business
- General Commercial

- Multi-Family Residential (MF-15 and MF-30)
- Planned Development (for larger tracts)

Considerations

- Site design considerations should be given to parking, landscaping, and building articulation.
- Where possible, parking should be screened from view or well-landscaped with native, drought-tolerant plants.
- All buildings facades fronting a public street or within significant public view should have aesthetically-pleasing horizontal and vertical articulation.
- Signage should be multi-tenant, where possible, and should match the character of the primary structure.
- High density residential should be included in mixed use developments.
- High density residential is appropriate behind commercial areas, with inter-connectivity.
- If high density is stand alone, the surrounding uses and connectivity should be considered to avoid an "island."

FOUR SEASONS RACQUET CLUB AT SHERMAN, LLC

4801 N. FM 1417 SHERMAN, TX 75092

PROJECT NARRATIVE

The real property, located at 4801 N. FM 1417, Sherman, Texas, is approximately six acres. It is relatively secluded and many hundreds of feet from any nearby buildings or other businesses. It is self-contained and has its own ample parking.

For many years, it was the Four Seasons Tennis and Health Club in Sherman. The Club included seven lighted outdoor tennis courts, two indoor tennis courts, and a swimming pool. It was a facility that the City of Sherman was proud of. Hundreds of families raised their children while playing tennis at Sherman's tennis club.

For the last several years, the facility has been used for warehousing by a cosmetics company. The cosmetics company has left the business and listed the property for sale. On December 12, 2002, Brian Previaty purchased the property.

Mr. Previaty is a tennis enthusiast. His business partner is Mr. Scott Whiteman. Coach Whiteman is a graduate of the prestigious Bollettieri Tennis Academy in Bradenton, Florida. He is a well-known tennis instructor in North Texas. He has coached numerous high-level junior players and high school athletes who received college scholarships. For many years, he has dreamed of opening his own tennis academy, like the Bollettieri Academy.

Mr. Previaty and Coach Whiteman want to return 4801N. FM 1417, Sherman, Texas, to its former glory. Outside, they will restore the seven outdoor tennis courts and the swimming pool. Inside, they will revert the warehouse to two indoor courts that can be used for either tennis or pickleball.

It will be an investment of approximately $2,000,00.00 in the community. By re-establishing the tennis club, the community will have an asset that will pay dividends for decades.
